RE: Environmental Assessment
Salvation Army Homeless Site

Dear Mr. Nnadi:

This letter is a follow up to our conversation today regarding ground water testing at the Salvation Army Homeless Site.

I spoke to Angela Erhardt at Maxim Technologies about doing two ground water tests. She stated that they would have to go down at least 25 feet to get through the bedrock to ground water. They had done some other testing in that area recently so feel this testing would require the same depth. Since the depth of digging for this facility will be less than that, we will not be doing ground water testing unless we are directed to do so by your department.

If you have any questions, please call me at (319) 291-4429.

Sincerely,

Nancy Gulick
Community Development Coordinator
