RE: Contaminated Soil Disposal, sump Contamination
American Concrete Inc., Hwy P59 East, Fort Dodge

I stopped at this facility on 26 May to check whether the contaminated soil had been removed from the site as required in my letter dated 11 May. I found that the entire pile of soil was gone. I talked with John Webb from American by phone a few days later. He stated that the soil was taken to the Webster County Landfill. He had the receipts and he would send a copy to me. I received those receipts on 10 June with a letter from Mr. Webb. This concludes the cleanup requirements for this particular incident. There are other areas of contamination at this site and are being addressed by the Uncontrolled Sites Section. No further action is required.
