September 9, 1998

Mr. Lavoy Haage  
Solid Waste Division  
Iowa Dept. of Natural Resources  
502 E. 9<sup>th</sup>  
Des Moines, IA 50309

RE: Henke Manufacturing - disposal of drums

Dear Mr. Haage:

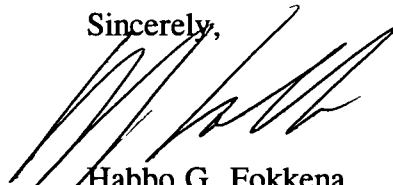

I wanted to confirm and advise you that I have removed the drum of hazardous substance as reported in the environmental study pertaining to the above property. A complete copy of the waste profile packet is enclosed for your reference.

I have been advised that these records should really be maintained at the site. However, in light of the title position of the company, and that this property will either go back for taxes or be sold, I am requesting permission to maintain these records with all other Henke Manufacturing Liquidating trust records. Unless I hear otherwise from you, I will assume that is acceptable.

To the best of my knowledge and belief, I think this takes care of the drum. If not please advise. I do understand that the other issue, the contamination of the soil, is still an open issue. I will write you a separate letter on that matter.

Thank you for your assistance in this matter.

Sincerely,

Habbo G. Fokkena,  
Liquidating Trustee

HGF:msl

LAB NOTES

**MATERIAL PRESENTING UNUSUAL HAZARDS TO PERSONNEL AND PROPERTY ARE SPECIFICALLY NOT ALLOWED IN THE HYDRITE PROCESSING FACILITY.**

This restriction applies to items intended for shipment into Hydrite processing facilities. Some materials can be accepted at varying concentrations **WITH PRIOR APPROVAL**. It is the generator's responsibility and in their interest to ensure that waste shipments are representative of the initial waste sample. Hydrite, as a policy, **DOES NOT RECOMMEND** intermixing waste streams; this practice is solely at the discretion and liability of the generator. Presence of some of the following substances may make your waste non-acceptable for Hydrite to handle.

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

**CUSTOMER PROCEDURES FOR WASTE SHIPMENTS**

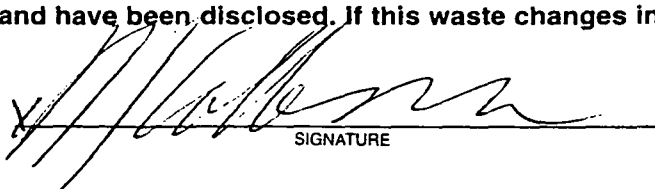

- When waste material is ready for pick-up, call Hydrite Customer Service and indicate your waste master number. Customer Service will then give you an authorization number for the pickup.
- All containers are to be labeled BEFORE pick-up. The labels will be furnished by Hydrite Chemical upon request.
- The proper waste manifest, bill of lading, and Land Disposal Notification and Certification form must be filled out as required by RCRA and D.O.T. and must include Hydrite's authorization number.
- All waste material must be shipped in containers that conform with D.O.T. U.N. Shipping regulations. Regulations require that no hazardous material may remain on the outside of the package after filling. Containers should not exhibit excessive structural integrity such as denting, leaking, excessive rust, and improper closure.
- All services provided by Hydrite Chemical Co. are subject to the terms and conditions printed on the back of this page.

**CERTIFICATION STATEMENT**

I hereby certify that all the information, to the best of my knowledge, on this and any attached documents, is complete, correct, and that all known hazards are accurate and have been disclosed. If this waste changes in any manner, Hydrite will immediately be notified in writing.

MATERIAL:  
**MINERAL SPIRITS**

WASTE MASTER NO:  
**122557**

DATE:  
**7/31/98**

In accordance 40CFR 264.12(b), this letter is to inform you that Hydrite Chemical has the appropriate permits for, and will accept, the waste described on the attached Waste Code Worksheet and Lab Analysis.

The attached Waste Code Worksheet provides US DOT and EPA Shipping Info. pertaining to your waste. The information on this sheet is based on our review of the "Materials Not Acceptable Without Prior Approval form, Customer Waste Profile Form, and any additional information you may have provided when we initially sampled your waste (MSDS, Lab Analysis). We have also considered our laboratory analytical report for your waste in completing the Waste Code Worksheet. The Waste Code Worksheet can be used as a guide for completing the shipping papers and land disposal restriction forms for your waste.

In accordance with guidance from US EPA; Region V, Hydrite Chemical is using a conservative method, termed "Protective Filing" in applying the EPA TCLP waste codes to your waste. Protective Filing is the process where potentially applicable TCLP waste codes are assigned to a waste where there is evidence that TCLP waste constituents may be present, and actual TCLP analysis has not been performed. If based on actual TCLP analysis, these constituents are not found to be present, you do not need to continue to apply those codes. However, in lieu of actual TCLP analytical data this approach limits your liability from illegally offering your waste for shipment by insuring all applicable waste codes are accounted for, and appear on your shipping papers.

These are only suggestions and recommendations based on the information supplied to us at the time the sales sample was taken. You, as the generator of the waste, are more familiar than Hydrite Chemical with the process used to generate your waste, and are responsible for the complete and accurate completion of your shipping papers and disposal restriction forms. We hope that these recommendations are helpful in preparing your waste for shipment to Hydrite Chemical. If you are in need of any further assistance or have any comments, please feel free to contact us.

<input type="checkbox"/> Liquid hazardous wastes having a pH less than or equal to two (2) <input type="checkbox"/> Liquid hazardous wastes containing PCBs at a concentration greater than or equal to 50 ppm <input type="checkbox"/> Liquid hazardous wastes that contain HOCs in total concentration greater than or equal to 1000 mg/l <input type="checkbox"/> Nonliquid hazardous wastes containing HOCs in total concentration greater than or equal to 1000 mg/kg <input type="checkbox"/> Free (amenable to chlorination) cyanides greater than or equal to 1000 mg/l <input type="checkbox"/> One or more of the following metals greater than or equal to the following: Arsenic and/or compounds: 500 mg/l; Cadmium and/or compounds: 100 mg/l; Chromium and/or compounds: 500 mg/l; Lead and/or compounds: 500 mg/l; Mercury and/or compounds: 20 mg/l; Nickel and/or compounds: 134 mg/l; Selenium and/or compounds: 100 mg/l; Thallium and/or compounds: 130 mg/l.	

SECTION G UNDERLYING HAZARDOUS CONSTITUENTS	
If there are underlying hazardous constituents of concern which do not meet the treatment standard of 40 CFR 268.48, Table UST-Universal Treatment Standard, then mark all underlying constituents on page #2. D001, D002, or D012-D043 to be treated in a non-CWA system, and that contain underlying hazardous constituents - Check all underlying hazardous constituents present. An underlying hazardous constituent is defined at 40 CFR 268.2(i) as any constituent listed in the universal treatment standards table (40 CFR 268.48), present at a concentration above the constituent-specific treatment standard. These constituents and their treatment standards are listed on next page. D001 wastes (only) treated by incineration, fuels substitution, or organics recovery system do not require identification of underlying hazardous constituents.

## THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

SHIPPERS NO.

RECEIVE, subject to the classifications and lawfully filed tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading the property described below, in apparent good order, except as noted (content and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Uniform Freight Classification in effect on the date hereof, if this is a rail or a rail water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment.

Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.
