Oelwein, Iowa 50662

Subject: Report Findings for Groundwater Impact Delineation at the former Speedy Manufacturing site.

Dear: Mr. Kendall,

Thank you for the submittal of the additional assessment for the property referenced above.

The initial Phase II indicated that VOC and SVOC and TEH-d were detected in groundwater at concentrations exceeding the applicable statewide standards, and concluded that further assessment was recommended. The result of the additional groundwater assessment has adequately delineated the extent of ground water contamination and no further assessment will be required.

Feel free to contact me with any questions, comments, or concerns at 515-242-5087

Sincerely,

A handwritten signature in black ink, appearing to be "MC" or "M. Culp", written in a cursive style.
