Urbandale, IA 50322

Dear Mr. Dodson,

This letter is to confirm the IDNR has received and reviewed the Year Four Annual Report of DNAPL gauging for the former Manufactured Gas Plant site located in Red Oak, Iowa.

The IDNR notes the results of the gauging indicating no detection of DNAPL in five of the monitoring wells with the exception of MW-116. Although not required under the terms of the conditional no further action certificate the IDNR encourages Mid American Energy to consider recovery of DNAPL from MW-116 during the remainder of the required DNAPL gauging period.

Thank you for the prompt submittal of the annual report.

Sincerely,

A handwritten signature in black ink, appearing to read "Mc", written in a cursive style.

Matthew Culp
IDNR
