Review of the Chapter 133 Site Assessment Work Plan

Dear Mr. Stoll:

Thank you for the submittal of the Site Assessment Work Plan, dated August 25, 2009, for the property referenced above. We have completed our review of the Plan and approve the Plan with the following comments:

- The Plan states that the RBCA Tier I look-up table found in 567 Iowa Administrative Code (I.A.C.) Chapter 135 will be used to evaluate risk to the public health and environment, and that evaluation will result in recommendations for site closure if no receptors of concern are identified. While the Department considers Chapter 135 (which addresses underground storage tanks) when evaluating releases from aboveground petroleum storage tank sites, the primary Chapter governing this site is 567 I.A.C. Chapter 133. This may result in different conclusions about site risk and appropriate responses to that risk than those reached following Chapter 135.
- Note that based on the results of this assessment, additional assessment could be required in order to define the extent of contamination at the site.

Please submit the Site Assessment Report **no later than December 15, 2009**. An extension may be requested if additional time is required. Feel free to contact me if there are any questions, comments, or concerns at 515-281-4117 or jim.kacer@dnr.iowa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Kacer".
