Review of the Site Assessment Work Plan

Dear Mr. Joyce:

Thank you for submittal of the Site Assessment Work Plan for the above-referenced site, dated April 12, 2010. We have completed our review of the Plan and approve it as proposed, subject to the comments below.

We understand that the proposed work involves installation and sampling of four monitoring wells, slug testing of three of the wells, and completion of a survey of potential receptors. We request that the report include a map showing the location of the identified potential receptors in the vicinity of the site.

It is understood that defining the extent of contamination may require modification of the work plan during field activities. Please include any modifications to the work plan in the final report. It is also understood that additional investigation may be necessary to define the extent of contamination. Feel free to contact me if there are any questions, comments, or concerns at [jim.kacer@dnr.iowa.gov](mailto:jim.kacer@dnr.iowa.gov) or (515) 281-4117.

Sincerely,

A handwritten signature in cursive script, appearing to read "Jim Kacer".
