Subject: Enrollment of the Former Cryovac site in Cedar Rapids, Iowa in the Iowa Land Recycling Program.

Dear Mr. Williams:

The Contaminated Sites Section of the Iowa Department of Natural Resources has reviewed the Enrollment Application and Participation Agreement for the Former Cryovac facility in Cedar Rapids, Iowa. The site is approved for enrollment in the Land Recycling Program (LRP) pending addressing the following comments.

Enrollment Application, Page 7, Attachment E3, Time Table: The Time Table is missing two public notices. The first public notice (Chapter 137.8(6)) is sent to adjacent and/or affected property owners during site assessment activities. The second public notice (Chapter 137.7(4)) is published in a local paper after the Department has approved the Risk Evaluation and Response Action but before response actions have been implemented.

The Time Table lists five quarters of quarterly groundwater monitoring sampling. Eight quarters of compliance groundwater monitoring are required, although less monitoring may be allowed if specific conditions are met (Chapter 137.10(3)). In addition, compliance monitoring begins when site assessment activities are completed and response actions have been implemented.

The Time Table also doesn't include submittal of the Final Report (Chapter 137.10(8)) and issuance of the No Further Action Certificate (Chapter 137. 11).

Ms. Tami Quam will be the Project Manager of your site. Please feel free to call Ms. Quam with any questions, comments, or concerns at 515/281-4420 or by email at tami.quam@dnr.iowa.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Greg Fuhrmann".

Greg Fuhrmann
Land Recycling Program Coordinator
