Dear Mr. Lundberg,

Per our telephone conversation, the bank writing the SBA loan for Trail's End Auto & Truck Salvage would appreciate a review of the attached results from a Phase II Environmental Assessment.

I have attached the Phase II findings as well as the Drinking Water samples that were taken prior to the Phase II borings. I think you will find the few parameters that narrowly exceed the threshold were from the area where the automotive crusher is located in the auxiliary lot of the salvage yard which is as far away from the well as possible.

Please review the attached information and respond to Mike Swift, owner of Trail's End Auto & Truck Salvage and/or me at these email addresses. If appropriate, the review may be addressed to banking agent at:

Geoff Gade, Vice President
West Bank
1601 22nd Street
West Des Moines, IA 50266

Sincerely,

Sue Schauls

Environmental Consultant
