Re:	Phase II Reports for Ottumwa Brownfields

To: Mr. Mel Pins
IDNR Brownfields Coordinator
502 E. 9th Street
Des Moines, IA 50319-0034

We are sending you the following items:

- ☒ Attached
☐ Under Separate Cover
☒ Via USPS or UPS

- ☐ Shop Drawings ☐ Prints ☐ Plans ☐ Samples ☐ Submittals
☐ Specifications ☐ Copy of Letter ☐ Change Order ☒ Phase I and II ESA Reports

Copies	Date	No.	Description
1 each			Phase II Environmental Site Assessment Report for Hazardous Grant Sites: 327 E. Main Street and 331 E. Main Street, Ottumwa, Iowa
1 each			Phase I Environmental Site Assessment Reports for Hazardous Grant Sites: 327 E. Main Street and 331 E. Main Street, Ottumwa, Iowa

Hi Mel,
Attached are copies of Phase I and II ESA reports completed for site adjacent properties in Ottumwa. Because the RECs were the same for both properties but ownership was different, separate reports were issued; however data points were shared. Mercury was detected in shallow soil (SB-4) on the 327 E. Main Street property. Petroleum contamination was detected in soil and groundwater (SB-3) at the 331 E. Main Street property.

We are submitting these reports as the request of the City of Ottumwa for IDNR review and opinion of hazardous conditions.

Thank you,

Copies to: Nick Klimek, City of Ottumwa
(transmittal only)

Signed: *Robin Husman*
