CON 12-15
Doc #30772

Mike,

The free product report should be submitted with the Site Assessment Report which I anticipate will be submitted by the end of the 3rd quarter of 2015. If the Site Assessment Report takes longer to complete, I may request that the free product report be submitted separately. Our main concern is that we are notified as soon as possible if there is a significant change in the amount of free product observed, the amount recovered, or product is observed in additional monitoring wells that could warrant a change in the monitoring plan. Once the site has been fully assessed we will set more formal deadlines for the reporting.

Let me know if there are any other questions, comments, or concerns.

Thanks,
Tami

Good afternoon Tami

Blaine Kussatz is no longer with Seneca Companies and the project has been reassigned to me, so I wanted to informally introduce myself as the new project manager.

I am all caught up on this site and have received your most recent correspondence in regards to preparing a site assessment work plan by March 31. We will continue to do the monthly free product checks and recovery, however I am not clear on the frequency in which these reports must be submitted to DNR. My CGP in Des Moines will continue to prepare the reports, I just want to make sure we submit them on time.

Please advise at your convenience. Thank you and I look forward to working with you.

Best,
Mike
