Sue,

As we discussed, this proposed schedule for work activities and reporting is approved. Thank you for submitting this brief explanation. I will enter it in the site record.

Subject: Oelwein, IA - Union Pacific Fauser Oil Lease Site Properties site (Con Site #1192)

Good Afternoon, Hylton. I'm writing with regard to our recent discussion about 2015 excavation activities at the Oelwein site.

Delays associated with the City water line encounter resulted in late-season backfill operations and monitoring well replacement. We were unable to complete top soil placement, seeding, and road replacement, as planned.

As such, you and I discussed the possibility of incorporating 2nd quarter groundwater sampling results into a comprehensive remediation report that could be submitted near the end of July 2016. This will allow us to account for the site restoration activities in a single report for our Client. Please note, monthly well gauging activities have been completed since December 2015 and 1st quarter groundwater sampling has been completed.

In our call, you indicated this would be an acceptable approach and asked that I follow-up with this written request. Please let me know if this is still approved, or if you have any questions or concerns.

Thank you for your assistance with this project.
