Hi Scott

As I noted during our phone conversation, I have been assigned as the Iowa DNR project manager for the potential petroleum contamination at the Farson, Iowa former depot and all correspondence for this site should be sent to me. Please send a brief description of your proposed environmental field activities to assess the potential petroleum contamination within a few weeks of receiving this email. The actual work plan will need to be submitted for Iowa DNR review by the end of March 2019 with the anticipated field work to be completed by June 30, 2019.

This site is under the authority of Iowa Administrative Code (IAC) -567-133, Rules for Determining Cleanup Actions and Responsible Parties. I have attached a copy of IAC-567-133 for your reference.

If you have any questions please ask,

Dan
