Re: Interstate Power and Light Company
Report of an Oil Spill – Riverside, IA
Spill Number: 090319-JJS-1220

Dear Josh Sobaski:

This letter is being sent on behalf of Interstate Power and Light Company (an Alliant Energy company), as a follow-up to the IDNR visit on September 13, 2019 to our spill site at the Riverside Voyager Substation in Riverside, IA. As a result of this visit, Dan Cook requested that we continue to monitor the site for eight (8) weeks after the visit and document if the installed monitoring points contained any oil.

There was no oil detected in any of the five (5) monitoring points during that 8 weeks. Attached is a spreadsheet containing dates of the site visits, the observer, and data for each monitoring point.

At this time, our plan is to close the monitoring points and conduct any further remediation for the remaining oil on site when the substation is retired. The retirement date for this site has not been determined. However, we have placed documentation in the substation files requiring site remediation upon closure.

Please do not hesitate to contact me at 641-437-5262 if you have additional questions.

Sincerely,

A handwritten signature in black ink that reads 'Tasha Campbell'.
