RE: Transmittal of Long-Term Stewardship Assessment Report for
Clow Valve Company (Mitrising Land disposal facility)
Oskaloosa, Iowa
Consent Order Docket Number VII-89-H-0007
EPA ID # IAD981711807

Dear Mr. Netland:

The purpose of this letter is to provide you with a copy of the activity report for long-term stewardship assessment activities conducted on November 17, 2021, at the Clow Valve Company (Mitrising Landfill) facility located in Oskaloosa, Iowa. The assessment was conducted as part of the U.S. Environmental Protection Agency's Region 7 LTS assessment program to periodically evaluate the effectiveness and adequacy of long-term institutional and engineering controls, as applicable, at RCRA corrective action facilities once such controls have been established. Please know that this facility was selected for assessment based on the effective date of the controls and the fact that the EPA last conducted such an assessment at this facility in 2018.

Based on the findings of the LTS assessment, no deficiencies were identified requiring action and it was verified that the engineering controls (cap maintenance, site security fencing, groundwater monitoring well maintenance, and monitoring) and institutional control (deed notice) are being implemented.

The EPA thanks you for your ongoing time and cooperation in this matter. Should you have any questions, please do not hesitate to contact me at (913) 551-7627, by email at murrow.patricia@epa.gov or at the letterhead address above.

Sincerely,

Patricia Murrow
Project Manager
RCRA Direct Implementation Section
Land, Chemical & Redevelopment Division
