Re: Phase III Environmental Site Assessment, Eaton Corporation, Shenandoah, Iowa, dated April 12, 2021

Dear Ms. Sutton:

The Iowa Department of Natural Resources, Contaminated Sites Section, (Iowa DNR) has reviewed the above referenced phase III environmental site assessment submitted by Golder Associates Inc. on behalf of the Eaton Corporation. Iowa DNR has no comments and approves the site assessment as written, including Section 6.0, Recommendations. At this time no further environmental action are required at the Eaton Corporation facility in Shenandoah, Iowa concerning Iowa DNR Contaminated Sites Section issues.

All monitoring wells not needed for other purposes will need to be properly plugged as noted in 567-Iowa Administrative Code (IAC)-39, *Requirements for Properly Plugging Abandoned Wells*. 567-IAC-39.5(4) notes that wells must be properly plugged within 90 days after abandonment. As noted in 567-IAC-39.6(2) please submit DNR Form 542-1226, Abandoned Water Well Plugging Record, to my attention within 30 days of the date the wells were plugged.

If you have any questions or need further information, please feel free to contact me.

Sincerely,

Daniel Cook  
Environmental Specialist Senior  
Solid Waste & Contaminated Sites Section
