Dear Mr. Pauli,

This letter is to inform you that the Iowa Department of Natural Resources (DNR) has reviewed and approved the 2021 Annual Ground Water Monitoring and LNAPL Recovery Report for the Buckeye Terminal in Council Bluffs, Iowa.

The Iowa DNR notes the installation of five new recovery wells in 2021 located near two existing productive recovery wells (R-205, 305) and recovery of 166 gallons of LNAPL in 2021, 96 percent of which was recovered from the new recovery wells 100, 102 and 103 and existing recovery wells 205 and 305.

The Iowa DNR concurs with the report conclusions regarding the location, stability and extent of the dissolved plume and the recommendations for continued groundwater monitoring and free product recovery in 2022.

Please contact me at 1-515-725-8337 if you have any questions.

Regards

Matt Culp
