Review of 2023 Annual Monitoring Report**

Dear Mr. Tollin:

The Iowa Department of Natural Resources (DNR) received the 2023 Annual Groundwater Monitoring Report dated March 12, 2024. Thank you for the submission. The Report summarizes groundwater monitoring completed in May and October, 2023 at the facility.

Based off the report, groundwater concentrations for both petroleum volatile organic compounds (VOCs) and chlorinated VOCs remain relatively stable at the site. Contaminant plume migration continues to be controlled through pumping at AW007 at a rate of over 30 gallons per minute, which remains effective if the well is operable. Long term source area remedial options are still being planned per our last conversation. The DNR agrees with the recommended biannual groundwater sampling and will look forward to receiving the next monitoring report by March 15, 2025.

Feel free to contact me with any questions at [\(515\) 721-7024](tel:5157217024) or by email at [andrew.carver@dnr.iowa.gov](mailto:andrew.carver@dnr.iowa.gov).

Sincerely,

Andrew Carver, CGP
