Review of Q2/Q4 2023 Semiannual Monitoring Reports**

Dear Mr. Bertrand:

The Iowa Department of Natural Resources (DNR) received the 2023 Semiannual Groundwater Monitoring Reports dated September 13, 2023 and January 10, 2024. Thank you for the submissions. The reports summarize groundwater monitoring completed at the facility in May and October, 2023.

Based off the reports, groundwater nitrate-nitrite concentrations exceeded the Maximum Contaminant Level (MCL) and DNR protected groundwater source (PGWS) Statewide Standard (SWS) of 10 mg/L at three monitoring wells, and the non-PGWS SWS of 56 mg/L at five additional monitoring wells. The DNR agrees with the recommended semiannual groundwater sampling and will look forward to receiving the next monitoring report.

Feel free to contact me with any questions at [\(515\) 721-7024](tel:515-721-7024) or by email at [andrew.carver@dnr.iowa.gov](mailto:andrew.carver@dnr.iowa.gov).

Sincerely,

Andrew Carver, CGP
