Re: BP Dubuque Terminal Site (15393 Old Highway Road, Peosta, Iowa 50268)
Contaminated Sites Database Site ID No. 2509
Response to Iowa Department of Natural Resources Letter

Dear Mr. Frisch:

The Iowa Department of Natural Resources, Solid Waste and Contaminated Sites Section (DNR) has reviewed the May 22, 2024 Response to Iowa Department of Natural Resources Letter ([Doc #41597](#)) for the BP Dubuque Terminal Site at 15393 Old Highway Road in Peosta, Iowa. The letter addresses the April 15, 2024 DNR Response Letter ([Doc #41499](#)) to the March 6, 2024 Assessment and Monitoring Report ([Doc #41478](#)). In particular, the letter addresses the DNR comment requiring additional wells to be installed at the site to further delineate the contamination plume to the west and northwest on the site. BP proposes the installation of two new permanent monitoring wells to meet this requirement, one in the northwest corner of the site and one along the western boundary of the site. The wells will be installed to a depth of approximately 20 feet below ground surface, and after development samples will be collected and analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX) as well as total extractable hydrocarbons (TEH) for diesel. After initial sampling, the two new wells will be added to the annual site-wide sampling program. DNR accepts the work plan as written with no additional comments.

DNR appreciates your continued efforts to address contamination issues at the site and requests that updates be provided as progress is made. If you have any questions or would like to discuss further, please contact me at [\(515\) 415-0889](tel:515-415-0889) or jake.bucklin@dnr.iowa.gov.

Sincerely,

Jake Bucklin
