**Re: Magellan Pipeline – Sioux City (4300 41st St, Sioux City, IA 51108)
Contaminated Sites Database Site ID No. 105
Free Product Recovery Report, 1st Half of 2025**

Dear Ms. Tittjung:

The Iowa Department of Natural Resources (DNR), has reviewed the referenced Free Product Recovery Report, 1st Half of 2025 Report (AMR) submitted on July 28, 2025, by WSP USA on behalf of the Magellan Pipeline Company L.P. ([Doc# 42767](#)).

DNR acknowledges the recovery of 124 gallons of product during the 1st half of 2025.

DNR approves the removal of R-26 (Sump-1) from monthly product recovery activities having met requirements stipulated in IAC 567-135.7(11)f. Additionally, as stipulated in IAC 567-135.7(11)f when free product activities have been terminated, owners and operators must inspect the monitoring wells monthly for at least one (1) year. Should product thickness exceed 0.02 inches during that time free product activities will need to resume.

DNR agrees with the request to combine the “2nd half Free Product Report” with the “Annual Monitoring Report” that is submitted to DNR in February. While approved, please note that this will likely delay response to any requested modifications to free product recovery procedures for the 1st half of the year. As stated, the “1st Half Free Product Recovery Report” will continue to be submitted to DNR July of each year. DNR expects the combination free product recovery and annual monitoring report no later than February 28, 2026.

If you have any questions or need further information please feel free to contact me at [515-415-1331](tel:515-415-1331) or by email at brad.davison@dnr.iowa.gov.

Sincerely
