**Re: HNI Geneva Plant (2900 and 2918 Hwy 22, Muscatine, IA 52761)
Contaminated Sites Database Site ID No. 2541
Water Well Survey Report**

Dear Ms. Mishler:

The Iowa Department of Natural Resources, Solid Waste and Contaminated Sites Section (DNR) has reviewed the March 24, 2026 Water Well Survey Report ([Doc #43450](#)) for the HNI Geneva Plant site located in Muscatine, Iowa. The report details a survey of all nearby groundwater wells in the vicinity of the site and efforts undertaken to collect samples from them. As described in the report, multiple attempts were made via phone and in person to contact the owners of the nearby wells in order to obtain permission to collect samples from them, none of which were successful. DNR considers this to be a good-faith attempt to collect the samples as requested by DNR. As a result, ***no additional assessment is required at this time*** and the status of the site will be changed to “closed” in the DNR Contaminated Sites online database.

If you have any questions or if we may be of further assistance, please contact me at [\(515\) 415-0889](tel:515-415-0889) or jake.bucklin@dnr.iowa.gov.

Sincerely,

Jake Bucklin
