

11/14/2025

Users can no longer start a modification from an issued permit using the "Action" button found on the My Dashboard screen in Iowa EASY Air.

Old Permit/Licenses screen

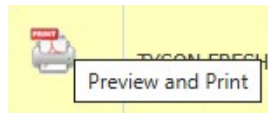

New Permit/Licenses screen

This process was not working because copying the original issued permit forms did not properly populate the newer forms within the new application. Data that could not be copied into the new forms would appear to be "missing".

All pending permit applications, created by using the "Action" button, whether for new equipment or permit modifications, must now be initiated by starting a new submittal and identifying it as a modification on Form FI or Form 1.0.

If you have a Pending Submittal created by using the "Action" button please contact the Iowa EASY Air Help Desk for assistance.

You may still click on the Print icon to launch the Print Preview through your preferred PDF program or in a popup through your browser.
