Re: Drainage Tile Installation

North Deep-Pit Building:

On the week of June 18, 2018 we installed 5" drainage tile around the footing of our North deep-pit cattle building. We covered it with 2 foot of pea gravel and then covered the rest with compacted soil. We connected the drainage tile to an existing field tile.

South Deep-Pit Building:

On the week of April 22, 2019 we installed 5" drainage tile around the footing of our South deep-pit cattle building. We covered it with 2 foot of pea gravel and then covered the rest with compacted soil. We connected the drainage tile to an existing field tile.

If you have any additional questions you can call me at 712-830-9886.

Thanks,
Tom Scharfenkamp
