

Grey Iron Castings
Ductile Iron Castings

Date: October 5, 2022

Ryan Stouder-Environmental Specialist Senior
Field Office 6
Iowa Department of Natural Resources
1023 W. Madison St
Washington, IA 52353

Facility Name: Faircast, Inc.

Permit Number: 99-TV-058R3

Subject: Permit Violation- Excess Emissions Report-EP201, EU102 Cupola Baghouse

Dear Mr. Stouder:

The following is in response to the NOV dated 9/27/2022 requiring the following follow-up actions:

1. Comply with excess emission reporting requirements, both verbal and written.
2. Make the necessary repairs to the cupola baghouse as soon as possible.
3. Submit an excess emission written report to DNR Field Office 6 including the efforts that you have taken to address and repair in the interim of the cupola baghouse by October 5, 2022.

Compliance Plan:

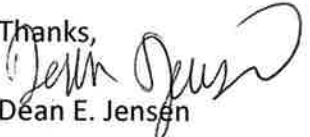

1. Excess emission reporting- we submitted an excessive emission report on September 7th subsequent to the verbal report.
 - a. I have reviewed our permit and have taken Method 9 smoke training so I have a better understanding of the requirements.
 - b. We have one backup person trained in the monitoring and reporting of any deficiencies.
 - c. A second backup person is scheduled to be trained on Oct 6, 2022.
2. Baghouse Cupola is back into compliance
 - a. PMs will be closely monitored for discrepancies for all bag houses.
 - b. Venturies, bags and cages were inspected and replaced as necessary in the West and East section of the baghouse.
 - c. Center section has been closed off until necessary repairs can be made when supplies are available
 - d. A backup set of bags and cages/venturies have been procured and inventory will be maintained for a quicker turn around in the unlikely event of a problem.

- e. The pulsing computer is currently down on the West side. We will manually pulse until that has been put back into operation.

Faircast takes all environmental issues seriously. We appreciate you working with us during the learning process as we have had some turnover affecting the knowledge of our permits.

If you have any questions or concerns, please contact me with the information listed below.

Thanks,

Dean E. Jensen
