RE: RIVER PLACE FLOOD WALL IMPROVEMENTS (2309 EUCLID AVE.)
DNR AUTHORIZATION NO: IA-18208-17984

Dear Mr. Perry:

We are in receipt of your correspondence dated April 6, 2011 concerning the above referenced project. Per your request, we have enclosed amended sections of the Storm Water Pollution Prevention Plan to be replaced in the previously submitted document. In summary, the modifications are as follows:

1. The slope stabilization section of the SWPPP has been modified to reflect that we will coordinate with the Corps of Engineers to select a permanent seed mixture that is acceptable to them.
2. The Corps of Engineers has concerns with the post construction condition at the outlets of storm sewers. We have included additional information on the design of each roof drain outlet. This includes replacement of the existing broken concrete at the roof drain outlets with rip rap energy dissipation devices including the type of rip rap.
3. A meeting between Polk County and the Corps of Engineers is scheduled for April 20, 2011. One of the items to be discussed at this meeting is easements for the storm sewer outlets. Such easement would allow Polk County to provide maintenance of the storm sewer outlets.
4. We have contacted Soil-Tek to complete further erosion control measures as noted in your letter dated April 6, 2011.

Should you have any questions concerning the response to these items, do not hesitate to contact me.

Sincerely,

POLK COUNTY PUBLIC WORKS

Larry L. Land
