Subject: **LETTER OF INQUIRY** – Air Discharge Permit for Gypsum Crusher at NCIRSWA Landfill, Fort Dodge

Dear Mr. Krug:

The Iowa Department of Natural Resources (DNR) conducted a routine inspection of the North Central Iowa Regional Solid Waste Agency (NCIRSWA) landfill on July 31, 2013. At that time I observed a gypsum crusher emitting an excessive quantity of fugitive dust, and I was told that Quarry Services, Inc. was operating the crusher.

Chapter 567 IAC 22 (excerpt enclosed) requires that crushers of this type obtain a construction permit from DNR's Air Quality Bureau, unless they are exempt under Subrule 567 IAC 22.1(2). I was not able to find such an air discharge permit under the name of Quarry Services, Inc.

Please provide DNR a written response to the following questions by August 23, 2013.

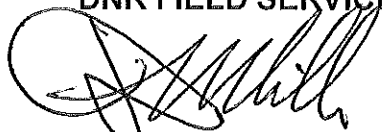

1. Does Quarry Services, Inc. own or operate any crushers, including the one at the NCIRSWA Landfill?
2. If yes, has an air construction permit(s) been obtained? If so, please provide the permit number and explain the business relationship Quarry Services, Inc. has with the permittee.
3. If an air construction permit has not been obtained, please state if it was an oversight or if this equipment is exempt from permitting under Chapter 567 IAC 22. If the equipment is exempt, please provide the specific rationale citing Subrule 567 IAC 22.1(2).

If this equipment is not exempt and no air construction permit has been obtained, you are directed to contact DNR's Air Quality Bureau at 877-247-4692 (877AIR IOWA) to begin the application process. If this is required, you must contact DNR within 7 days of receipt of this letter.

Mr. Wayne Krug
