Mr. Jones,

I spoke with you on the phone this morning concerning the Fairfield Wastewater Treatment Facility inspection conducted by Josh Sobaski in November 2015. We discussed the violations with the self- monitoring reports that were noted in the inspection report. I asked if we could submit the missing data to add to our file at the field office, and we both agreed that I would send you a packet containing hard copies of the missing data.

Included in this packet is the 2014 and 2015 non-toxic acute toxicity test results. Also I included copies of the missing TSS values for March 2014 and February 2015 influent. The TSS values for February 2015 effluent is also included. Finally I included digester volatile acid alkalinity results for August 2014. I stapled the corresponding sheet of our monthly operating report with missing values entered in blue.

Thanks

Loran Franklin
Lab Supervisor
