Iowa Department of Natural Resources
2300 15th St SW
Mason City, IA 50401

RE: **Notice of Violation- Lack of Daily Cover
Investigation of Complaint ID: 30631**

Dear Ms. Nelson:

In response to the Department's Notice of Violation -- Lack of Daily Cover letter dated April 26, 2022, detailing Paragraph 567 IAC Ch. 113.8(3)f and paragraph 567 IAC Ch. 113.8(2)f(1) daily litter collection and daily cover, respectively.

Central Disposal Systems, Inc. has implemented the following measures to address the issues stated in complaint ID:30631:

1. Operational adjustments including: decreasing the active area size and increasing the man and equipment hours dedicated to hauling cover have been made to ensure a minimum of six inches of cover material or an alternative daily cover (ADC) material is placed and maintained over waste in the active portion of the landfill at the end of each operating day.
2. Additional personnel through third party labor provider(s) have been retained to increase the amount of litter picking activity. Photographs of progress made to date are attached.

Central Disposal Systems, Inc. has also taken the following actions to improve continued compliance:

1. Ordered new tarps for additional ADC which will replace the existing worn tarps.
2. Ordered new 24' x 15' x 8' portable fences to place near the downwind side of the active area(s).
3. Purchased new litter netting for the west side of the landfill and have hired a contractor to install the netting. This aid in preventing windblown litter from escaping the facility. See attached proposed litter fence location plan.

Central Disposal Systems, Inc. will continue to log litter picking activities and be diligent in documenting periods when litter picking does not occur due to unsafe conditions.

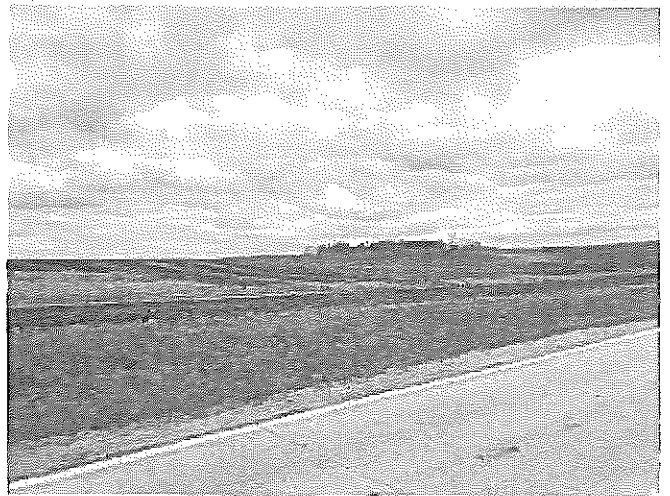

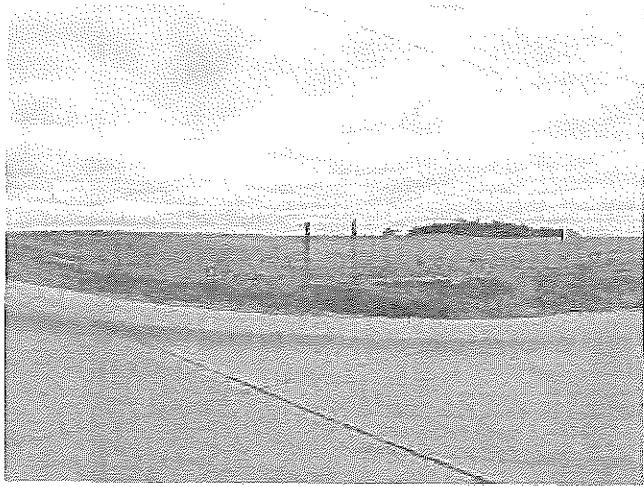

Sincerely,

Brad Mary-
Site Manager - Central Disposal Landfill, Inc.
