This is getting ridiculous we hauled one load yesterday to clean-up and finish up for this year. We have no plans of hauling sludge any more until after the first of the year.

Subject: road dust on Illinois Drive

Denny Buyert:

I received a call yesterday about dust from the gravel road being used by your sludge applicator. This is similar to previous complaints. I know calcium chloride was applied earlier this month, but with the lack of rainfall, it sounds like you need to apply some water to the road to re-activate the dust suppressant. Please stay on top of this situation. Let me know when this is done. [Hopefully, mother nature will do this for you over the weekend.]

Thanks for your effort.
