SUBJECT: Letter of Inquiry, 567 Iowa Administrative Code (IAC) 101
Solid Waste Complaint #28824, Staff Action #147126
Shenandoah Sanitation Transfer Station Permit # 73-SDP-04-18P-XFR
Page/Fremont Counties

Dear Mr. Love:

The Iowa Department of Natural Resources (DNR) Field Office 4 in Atlantic, Iowa, received a complaint regarding litter when trash is not dumped inside the permitted transfer station building, and regarding disposal of Page/Fremont County solid waste in violation of comprehensive planning area rules.

Solid waste collected in a certain area must be delivered to the transfer station/landfill that is "assigned" to that certain area. These areas are called comprehensive planning areas.

County landfill/transfer station personnel are to refuse waste from outside their planning area.

The purpose of my letter is to inquire about the allegations made with respect to delivery of Page/Fremont County solid waste to the incorrect facility. Please respond **in writing** with explanation of your plan to ensure drivers deliver waste to the correct landfill/transfer station. Send the letter to my attention at DNR Field Office 4, 1401 Sunnyside Lane, Atlantic, Iowa 50022, and submit an electronic copy to holly.vandemark@dnr.iowa.gov by **February 4, 2021**.

Finally, ensure trash is dumped inside the building at your transfer station to prevent litter. If you have questions, contact me at 712/250-8645 (cell).

Sincerely,

Holly Vandemark
