There was a wind storm yesterday with wind speeds recorded at 29 MPH. In the past, Chad typically coordinates this issue with us directly and we pick up as quickly as possible. This is the first we are aware of his grievances. We have spoken with him and will address the issue.

Thanks,

Update. I just got off the phone with Chad, your neighbor to the north, he said if the trash is picked out of and off of his new fence, he'll not push this any further. Please let me know what your observations are whenever you can get over to see it.

Lillian et al,

Happy Friday to you all.

Just before lunch today, I received a voice message from Chad Lobberacht, neighbor of your Eddyville location, complaining about trash blowing onto his property. Wondering if anyone is around that can check it out, figure out where it's coming from and address it (if it's a legitimate complaint). I am planning to call him back this afternoon to see if I can get more details.

Wapello County, IA
