

## Grass Pink *Calopogon tuberosus*

**Habitat:** Moist prairies, fens

**Blooms:** Pink flowers bloom from late June through early August.

**Threats:**

- Draining habitat through ditches or tile
- Tree encroachment due to lack of disturbance. Shade is detrimental to the success of this species.
- Over collecting

**Habitat Improvement Guidelines:**

- Restore nature hydrology by removing tile whenever possible.
- Remove encroaching trees with fire or mechanical means being careful to avoid individual plants.
- Cease all collection of grass pink.
