Good morning Mike-

We are in the process of preparing the evaluation of the possibility of ceasing leachate collection at the Rodeo Park Dump and City of Fort Madison Landfill (Permit No. 56-SDP-05-88C). At this time we anticipate using the Domenico analytical model for the modeling component of the evaluation. Additionally, it is anticipated that sufficient and applicable leachate analytical data to characterize source concentrations for use in the model is available as the manhole samples that have been collected for many years are from the interceptor trenches installed to collect leachate directly from the waste mass. The evaluation is currently due May 24, 2024. We request an extension to July 24, 2024 for submittal of the evaluation report.

Thanks.
