PATON, IA 50217

**RE: Notice of Expiration
Pickett Salvage L.L.C.
08-ADP-01-06P ADP**

Dear Mick Pickett,

The sanitary disposal project permit for the facility referenced above expires on 10/31/2024. An application for renewal must be received by the Land Quality Bureau at least 60 days before the expiration date of the existing permit in accordance with Iowa Administrative Code (IAC) 567 Chapter 118.2(1).

One (1) copy of a completed application for renewal is due by 9/1/2024. Enclosed is a DNR Permit Application Form for Appliance Demanufacturing. The application form may also be accessed on the Department's website at <http://www.iowadnr.gov/Environmental-Protection/Land-Quality/Solid-Waste/Solid-Waste-Permitting>. Please review your facility's current permit and planning documents (e.g. design, operations, financial assurance, emergency response, closure). If these documents remain current and require no revision, please provide a cover letter stating such, and complete Sections 1 and 4 of the enclosed permit application form. The permit will then be renewed for an additional five-year permit cycle.

If updates are needed to account for changes in facility operations, Section 3 of the permit application form identifies those renewal documents that must be submitted. One (1) copy of each document is required. If an application is found by the Department to be incomplete, it may be denied and returned to the applicant.

If you have questions or need additional information, please contact Sue Johnson at 515/217-0872 or susan.johnson@dnr.iowa.gov.

Sincerely,

Becky Jolly
Land Quality Bureau
