**Re: Winneshiek County Sanitary Landfill
Permit No. 96-SDP-01-74
2024 Update Winneshiek Hydrologic Monitoring System Plan (Document No. [110516](#))**

Dear Mr. Schissel:

The Iowa Department of Natural Resources (DNR) has reviewed the 2024 Update Winneshiek Hydrologic Monitoring System Plan (HMSP), dated March 31, 2024 (received July 22, 2024) and the DNR has the following comments.

1. Section 1.3 indicates that loess overlies the uplands yet nearly every cross section indicates a top layer of "fill".
2. Figure 22 Deep Well Water Elevation appears to be mislabeled as Figure 21.
3. The legend to Figure 23 is illegible.
4. Manholes MH-4-2 and MH-1AA are not shown on any figures.
5. The Table of Contents indicate Table 8 SWPPP Sampling Parameters, however, this table is not found in the HMSP. This data is not required by the DNR Solid Waste Section.

In a meeting, dated August 8, 2024, between Mike Smith and Russ Henning, Russ agreed to address these items. Please provide a schedule for addressing these items **by September 5, 2024.**

If you have any questions or comments please contact me at [\(515\) 229-8356](tel:5152298356) or mike.smith@dnr.iowa.gov.

Sincerely,

Michael W. Smith, P.E.
Environmental Engineer Senior
