Good afternoon Mike-

Discussions are continuing between the Waste Commission of Scott County and Linwood Mining and Minerals. The establishment of an easement on the property to the south is being considered. The planned gas monitoring probes on the south side of the Scott County Landfill will be installed after negotiations are finalized.

SCS Engineers will continue to update the DNR on a quarterly basis regarding the negotiations and/or probe installations and will notify the DNR if any significant updates occur between the regular updates. If you have any comments regarding this notice, please contact me at the number below.
