Re: Cedar Falls Utilities Leverage Road Ash Landfill
2024 Annual Water Quality Report ([doc #111491](#))
Permit #07-SDP-11-89P

Dear Mr. Ames:

The Department of Natural Resources (DNR) has reviewed the 2024 AWQR, submitted on December 16, 2024 by Stanley Consultants.

Please continue monitoring in accordance with the closure permit.

The landfill's closure permit expires on April 11, 2026. Concentrations of several contaminants continue to be measured at or near to the applicable health-based standards in each monitored well. Additionally, historically high concentrations of several monitored parameters occurred in 2024 in multiple wells, which indicates that the contaminant plumes have not stabilized. Therefore, DNR may extend the closure permit in order to provide for continued groundwater monitoring and contaminant plume tracking based upon the results of the 2025 sampling event.

If you have any questions, please contact me at [\(515\) 689-6548](tel:515-689-6548) or mick.lead@dnr.iowa.gov.

Sincerely,

Michael B. "Mick" Lead
Land Quality Bureau
