Comments:
1) Beginning in 2011, groundwater control system discharge point GU-3A was determined to not require statistical evaluation. Historic volatile organic compound (VOC) detections required the discharge from GU-3A to be treated as leachate, and GU-3A will continue to be treated as leachate until VOCs cease to be detected and a detection monitoring statistical analysis indicates statistically significant increases (SSIs) are not present. At that time, future monitoring requirements will be determined.
2) In previous Annual Water Quality Reports (AWQRs) submitted to the Iowa Department of Natural Resources (IDNR), this table only presented constiuents at statistically significant levels (SSLs). The SSIs detected in 2021 were added to the table, and SSIs will be included going forward.

Notes:
* Constituent was initially detected above laboratory reporting limits during the monitoring event and is a potential SSI. A verification event will be conducted during the next annual monitoring event to confirm the SSI.

Table 11
Corrective Action Trend Analysis
2024 Annual Water Quality Report
Phase I MSWLF Unit
Permit No. 77-SDP-01-72P

Well	Constituent	Trend	Sample Size	Projected Year to Completion	Comments
MW-29	Cobalt	Increasing (Not Significant)[1]	8	6/4/2038	The concentrations of the recent eight sampling events are above the site-specific GWPS of 0.0137 mg/L. Concentrations from the eight most recent sampling events exhibit an increasing trend that is not statistically significant with a slope of 0.001654 mg/L/year.
	Vinyl Chloride	Increasing (Not Significant)[1]	8	6/4/2038	The concentrations of the eight most recent sampling events are above the GWPS (2 µg/L). The most recent eight concentrations exhibit an increasing trend that is not statistically significant with a slope of 0.008315 µg/L/year.
MW-30R	Arsenic	Decreasing (Not Significant)[1]	8	6/4/2038	Each of the most recent eight sampling events exceed the GWPS (0.01 mg/L), except for the March 2020 result (0.00973 mg/L). The decreasing trend, which is not statistically significant, has a slope of -0.0008753 mg/L/year.
	Vinyl Chloride	Increasing (Not Significant)[1]	8	6/4/2038	Each of the most recent eight sampling events exceed the GWPS (2 µg/L). The most recent eight samples exhibit an increasing trend that is not statistically significant and has a slope of 0.03517 µg/L/year.
MW-57R	Cobalt	Increasing (Not Significant)[1]	8	6/4/2038	The concentrations of the recent eight sampling events are above the site-specific GWPS of 0.0137 mg/L. Concentrations from the eight most recent sampling events exhibit an increasing trend that is not statistically significant with a slope of 0.004094 mg/L/year.
MW-58	Arsenic	Increasing (Not Significant)[1]	8	6/4/2038	Each of the eight most recent concentrations are above the GWPS (0.01 mg/L). Concentrations exhibit an increasing trend that is not statistically significant with a slope of 0.002695 mg/L/year.

[1]Trend is not statistically significant at the 98% confidence limit. The increasing or decreasing trend designation was based off the slope value, where, for example, a positive slope is designated as increasing although it is not statistically significant.

Comments:
This table summarizes the trends of constituents with SSLs identified during the 2024 statistical analysis.

YSI Pro DSS Calibration Certificate

Unit Number: 7224
Serial Number: 20K101623

Calibration Date 6/26/2024
Technician: Sonny Saldona-Diaz

Installed Probes
- ☑ Conductivity
- ☑ PH/ORP
- ☑ DO
- ☑ TURB

- ☑ Display is clear, and free of damage
- ☑ Cable and accessories are free of damage
- ☑ Firmware version is up to date.

Display Battery 96 % **Pass**
Cable Flex Test: **Pass**

Geotech Environmental Equipment, Inc. takes pride in ensuring this instrument is tested to function as specified by the manufacturer and was calibrated in accordance to manufacturer specifications. All calibration standards used are NIST traceable. With the provided lot numbers we can provide NIST documents on request. Call us at (800) 833-7958 and we will be glad to help.

Low Stress Groundwater Sampling Data Sheet

Facility Name: Metro Park East	Sampler Name(s): Brendan Bunker and Richard Wilson
MW Identification: MW-55	Date/Time: 10/8/24 0955
Sample Number: 9	PID Readings: N/A
Weather Conditions: 50°F sunny	
Wellhead Inspection: no comment	

Visual Inspection:

1. Survey Mark Present: (Yes/No)	Yes / (No)	5. Standing/Ponded Water (Yes/No)	Yes / (No)
2. Collision/Vandalism Damage: (Yes/No)	Yes / (No)	6. Frost Heaving (Yes/No)	Yes / (No)
3. Casing Degradation: (Yes/No)	Yes / (No)	7. Lock in Place (Yes/No)	(Yes) / No
4. Well Subsidence: (Yes/No)	Yes / (No)		

Ground Water Measurements/Purge data:

1. Static Water Level (±0.01 feet [ft.])	18.91	6. Purge Rate (mL/min)	300
2. Bottom of casing (±0.01 ft.)	—	7. Water Level Measuring Equip.	solinst
3. Casing Diameter (inches)	2"	8. Purge Equipment Used	geocontrol pro
4. Actual Volume of Water Purged (mL)	7200	9. Dedicated? (Yes/No)	(Yes) / No
5. Purge Water Characteristics:		10. Immiscible layer observed	Yes / (No)
Odor: none Turbidity: low		11. Thickness of immiscible layer	N/A
Color: clear		12. Drive Gas (Air/Nitrogen)	(AIR) / NITROGEN / N/A

Time	Volume Purged (mL)	Temp (°C)	Conductivity (µs/cm)	ORP (mV)	D.O. (mg/L)	Turbidity (NTU)	pH	Drawdown
0958	purge start							
1001	900	13.9	994	129.2	2.27	5.34	6.38	20.27
1004	1800	13.9	1000	133.6	1.69	2.83	6.38	20.56

YSI Pro DSS Calibration Certificate

Unit Number: 8435
Serial Number: 24D101464

Calibration Date 9/25/2024
Technician: Colt Riefenberg

Installed Probes
- ☑ Conductivity
- ☑ PH/ORP
- ☑ DO
- ☑ TURB

- ☑ Display is clear, and free of damage
- ☑ Cable and accessories are free of damage
- ☑ Firmware version is up to date.

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Table of Contents

Job Narrative
310-285608-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 7/11/2024 3:45 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.4°C.

GC/MS VOA
Method 8260D: The continuing calibration verification (CCV) associated with batch 310-427105 recovered above the upper control limit for Carbon tetrachloride (22.6%D) and Chlorodibromomethane (25.3%D). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is impacted: (CCV 310-427105/3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Receipt Information

Date/Time Received: DATE 7/11/24 TIME 1545 Received By: MRH

Delivery Type: ☐ UPS ☐ FedEx ☐ FedEx Ground ☐ US Mail ☐ Spee-Dee
☒ Lab Courier ☐ Lab Field Services ☐ Client Drop-off ☐ Other:_____

Condition of Cooler/Containers

Sample(s) received in Cooler? ☒ Yes ☐ No *If yes:* Cooler ID:

Multiple Coolers? ☐ Yes ☒ No *If yes:* Cooler # _____ of _____

Cooler Custody Seals Present? ☐ Yes ☒ No *If yes:* Cooler custody seals intact? ☐ Yes ☐ No

Sample Custody Seals Present? ☐ Yes ☒ No *If yes:* Sample custody seals intact? ☐ Yes ☐ No

Trip Blank Present? ☒ Yes ☐ No *If yes:* Which VOA samples are in cooler? ↓

TB & Ph II All vials rec'd

Temperature Record

Coolant: ☒ Wet ice ☐ Blue ice ☐ Dry ice ☐ Other:_____ ☐ NONE

Thermometer ID: Y Correction Factor (°C): 0.0

• **Temp Blank Temperature** – If no temp blank, or temp blank temperature above criteria, proceed to Sample Container Temperature

Uncorrected Temp (°C): 1.4 Corrected Temp (°C): 1.4

• **Sample Container Temperature**

	CONTAINER 1	CONTAINER 2
Container(s) used:		
Uncorrected Temp (°C):		
Corrected Temp (°C):		

Exceptions Noted

1) If temperature exceeds criteria, was sample(s) received same day of sampling? ☐ Yes ☐ No
   a) *If yes:* Is there evidence that the chilling process began? ☐ Yes ☐ No

2) If temperature is <0°C, are there obvious signs that the integrity of sample containers is compromised? (e g., bulging septa, broken/cracked bottles, frozen solid?) ☐ Yes ☐ No

NOTE If yes, contact PM before proceeding If no, proceed with login

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

ANALYTICAL REPORT

PREPARED FOR

Attn: Richard Wilson
HDR Inc
1917 S 67th Street
Omaha, Nebraska 68106

Generated 10/22/2024 10:55:10 PM

JOB DESCRIPTION

Metro Park EAST-Landfill Phase I

JOB NUMBER

310-292415-1

Eurofins Cedar Falls
3019 Venture Way
Cedar Falls IA 50613

See page two for job notes and contact information.

myEOL

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Authorization

Table of Contents

Job Narrative
310-292415-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 10/9/2024 4:35 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 4 coolers at receipt time were 1.3°C, 2.7°C, 2.8°C and 3.8°C.

GC/MS VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA
Method 8270E: Surrogate recovery for the following sample was outside the upper control limit: MW-30R (310-292415-5). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Method 8270E: The continuing calibration verification (CCV) associated with batch 310-436520 recovered above the upper control limit for Pronamide (24.8%D). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8270E: The continuing calibration verification (CCV) associated with batch 310-436520 recovered above the upper control limit for Kepone(58.2%D). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is impacted: (CCV 310-436520/2).

Method 8270E: The continuing calibration verification (CCV) associated with batch 310-437077 recovered above the upper control limit for 4-Aminobiphenyl (21.3%D), Pronamide (23.5%D), Safrole (21.7%D) and o,o',o''-Triethylphosphorothioate (27.4%D). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC Semi VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Herbicides
Method 8151A: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 680-859316 and analytical batch 680-859624 recovered outside control limits for the following analytes: 2,4,5-T and 2,4-D.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

PCBs
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Pesticides
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry

Job ID: 310-292415-1 (Continued) Eurofins Cedar Falls

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Definitions/Glossary

Client: HDR Inc
Job ID: 310-292415-1
Project/Site: Metro Park EAST-Landfill Phase I

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

GC Semi VOA

Qualifier	Qualifier Description
*1	LCS/LCSD RPD exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: HDR Inc
Job ID: 310-292415-1
Project/Site: Metro Park EAST-Landfill Phase I

Laboratory: Eurofins Cedar Falls

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Iowa	State	007	12-01-25

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
8082A	3511	Water	PCB-1268
8260D		Water	1,2,4-Trichlorobenzene
8260D		Water	Allyl chloride
8260D		Water	Ethyl methacrylate

Laboratory: Eurofins Chicago

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
Iowa	State	082	05-01-26

Laboratory: Eurofins Savannah

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Cooler/Sample Receipt and Temperature Log Form

Client Information

Client: HDR Inc.

City/State: CITY | STATE | Project:

Receipt Information

Date/Time Received: DATE 10-9-24 | TIME 1635 | Received By: CGC

Delivery Type: ☐ UPS ☐ FedEx ☐ FedEx Ground ☐ US Mail ☐ Spee-Dee
☑ Lab Courier ☐ Lab Field Services ☐ Client Drop-off ☐ Other:

Condition of Cooler/Containers

Sample(s) received in Cooler? ☑ Yes ☐ No *If yes:* Cooler ID:

Multiple Coolers? ☑ Yes ☐ No *If yes:* Cooler # 1 of 4

Cooler Custody Seals Present? ☑ Yes ☐ No *If yes:* Cooler custody seals intact? ☑ Yes ☐ No

Sample Custody Seals Present? ☐ Yes ☑ No *If yes:* Sample custody seals intact? ☐ Yes ☐ No

Trip Blank Present? ☐ Yes ☑ No *If yes:* Which VOA samples are in cooler? ↓

Temperature Record

Coolant: ☑ Wet ice ☐ Blue ice ☐ Dry ice ☐ Other: ☐ NONE

Thermometer ID: R | Correction Factor (°C): 0

• Temp Blank Temperature – If no temp blank, or temp blank temperature above criteria, proceed to Sample Container Temperature

Uncorrected Temp (°C): 2.7 | Corrected Temp (°C): 2.7

• Sample Container Temperature

	CONTAINER 1	CONTAINER 2
Container(s) used		
Uncorrected Temp (°C):		
Corrected Temp (°C):		

Exceptions Noted

1) If temperature exceeds criteria, was sample(s) received same day of sampling? ☐ Yes ☐ No
   a) *If yes:* Is there evidence that the chilling process began? ☐ Yes ☐ No

2) If temperature is <0°C, are there obvious signs that the integrity of sample containers is compromised? (e.g., bulging septa, broken/cracked bottles, frozen solid?) ☐ Yes ☐ No

NOTE If yes, contact PM before proceeding If no, proceed with login

Sample(s) received in Cooler? ☑ Yes ☐ No *If yes:* Cooler ID:

Multiple Coolers? ☑ Yes ☐ No *If yes:* Cooler # 4 of 4

Cooler Custody Seals Present? ☑ Yes ☐ No *If yes:* Cooler custody seals intact? ☑ Yes ☐ No

Sample Custody Seals Present? ☐ Yes ☑ No *If yes:* Sample custody seals intact? ☐ Yes ☐ No

Trip Blank Present? ☐ Yes ☑ No *If yes:* Which VOA samples are in cooler? ↓

Temperature Record

Coolant: ☑ Wet ice ☐ Blue ice ☐ Dry ice ☐ Other: ☐ NONE

Thermometer ID: B | Correction Factor (°C): 0

• **Temp Blank Temperature** – If no temp blank, or temp blank temperature above criteria, proceed to Sample Container Temperature

Uncorrected Temp (°C): 2.8 | Corrected Temp (°C): 2.8

• **Sample Container Temperature**

	CONTAINER 1	CONTAINER 2
Container(s) used:		
Uncorrected Temp (°C):		
Corrected Temp (°C):		

Exceptions Noted

1) If temperature exceeds criteria, was sample(s) received same day of sampling? ☐ Yes ☐ No
   a) *If yes:* Is there evidence that the chilling process began? ☐ Yes ☐ No

2) If temperature is <0°C, are there obvious signs that the integrity of sample containers is compromised? (e.g., bulging septa, broken/cracked bottles, frozen solid?) ☐ Yes ☐ No

NOTE: If yes, contact PM before proceeding. If no, proceed with login

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	2.2
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	True

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Authorization

Table of Contents

Job Narrative
310-292700-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 10/11/2024 5:10 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 1.0°C, 3.2°C and 4.9°C.

GC/MS VOA
Method 8260D: The continuing calibration verification (CCV) associated with batch 310-436269 recovered above the upper control limit for 1,1-Dichloroethene (21.7%D) and 1,1-Dichloropropene (20.6%D) . The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is impacted: (CCV 310-436269/4).

Method 8260D: The laboratory control sample (LCS) for 310-436269 recovered outside control limits for the following analytes: Carbon disulfide and 1,1-Dichloroethene. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The continuing calibration verification (CCV) associated with batch 310-436434 recovered above outside of the control limits for 2-Hexanone (-20.5%D). The LCS associated with this CCV passed CCV criteria for the affected analyte; therefore, the data have been reported. The associated sample is impacted: (CCV 310-436434/3).

Method 8260D: The initial calibration verification (ICV) result for batch 310-436269 was above the upper control limit. The affected analyte is: Iodomethane. Sample results were non-detects, and have been reported as qualified data.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
Method 9056A_ORGFM_48H: The following sample(s) was received with less than 2 days remaining on the holding time or less than one shift (8 hours) remaining on a test with a holding time of 48 hours or less. As such, the laboratory had insufficient time remaining to perform the analysis within holding time: SW-107 (310-292700-22).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
Method 6020B: The reference method requires samples to be preserved to a pH of <2. The following sample was received with insufficient preservation at a pH of >2: PZ-13 (310-292700-7). The sample(s) was preserved to the appropriate pH in the laboratory.

Method 6020B: The following sample was diluted due to the nature of the sample matrix: MW-57R (310-292700-1). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Job ID: 310-292700-1
Project/Site: Metro Park EAST-Landfill Phase 1

Client Sample ID: Trip Blank 1
Lab Sample ID: 310-292700-24
Date Collected: 10/10/24 00:00
Matrix: Water
Date Received: 10/11/24 17:10

Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

Surrogate	%Recovery	Qualifier	Limits	Prepared	Analyzed	Dil Fac
Dibromofluoromethane (Surr)	101		73 - 130		10/18/24 16:30	1
Toluene-d8 (Surr)	98		80 - 120		10/18/24 16:30	1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

HPLC/IC

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: HDR Inc
Job ID: 310-292700-1
Project/Site: Metro Park EAST-Landfill Phase 1

Laboratory: Eurofins Cedar Falls

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Iowa	State	007	12-01-25

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
9056A		Water	Nitrate Nitrite as N

Method Summary

Client: HDR Inc
Job ID: 310-292700-1
Project/Site: Metro Park EAST-Landfill Phase 1

Method	Method Description	Protocol	Laboratory
8260D	Volatile Organic Compounds by GC/MS	SW846	EET CF
300.0	Anions, Ion Chromatography	EPA	EET CF
9056A	Anions, Ion Chromatography	SW846	EET CF
200.8	Metals (ICP/MS)	EPA	EET CF
6020B	Metals (ICP/MS)	SW846	EET CF
350.1	Nitrogen, Ammonia	EPA	EET CF
9060A	Organic Carbon, Total (TOC)	SW846	EET CF
I-3765-85	Residue, Non-filterable (TSS)	USGS	EET CF
SM 5220D	COD	SM	EET CF
200.8	Preparation, Total Metals	EPA	EET CF
3005A	Preparation, Total Metals	SW846	EET CF
350.1	Distillation, Ammonia	EPA	EET CF
5030B	Purge and Trap	SW846	EET CF

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

ANALYTICAL REPORT

PREPARED FOR

Attn: Richard Wilson
HDR Inc
1917 S 67th Street
Omaha, Nebraska 68106

Generated 11/1/2024 11:55:13 AM

JOB DESCRIPTION

Metro Park EAST-Landfill Phase 1

JOB NUMBER

310-292709-1

Eurofins Cedar Falls
3019 Venture Way
Cedar Falls IA 50613

See page two for job notes and contact information.

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Table of Contents

Job Narrative
310-292709-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 10/11/2024 5:10 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 1.2°C and 1.4°C.

GC/MS VOA
Method 8260D: The continuing calibration verification (CCV) associated with batch 310-436749 recovered above the upper control limit for 2-Chloro-1,3-butadiene(21.3%D). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is impacted: (CCV 310-436749/3).

Method 8260D: The initial calibration verification (ICV) result for batch 310-436749 was above the upper control limit. The affected analyte is: Iodomethane. Sample results were non-detects, and have been reported as qualified data.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA
Method 8270E: The continuing calibration verification (CCV) associated with batch 310-436892 recovered above the upper control limit for Di-n-octyl phthalate (247%D). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8270E: The laboratory control sample/laboratory control sample (LCS/LCSD) for preparation batch 310-436500 and analytical batch 310-436892 recovered outside acceptance limits for 3-Nitroaniline, 4-Chloroaniline, Pyridine and 4-Nitroaniline. There was insufficient holding time to perform a re-extraction or re-analysis; therefore, the data have been reported.

Method 8270E: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 310-436500 and analytical batch 310-436892 recovered outside control limits for the following analytes: Pyridine and 4-Nitroaniline,

Method 8270E: The continuing calibration verification (CCV) associated with batch 310-437077 recovered above the upper control limit for 4-Aminobiphenyl (21.3%D), Pronamide (23.5%D), Safrole (21.7%D) and o,o',o''-Triethylphosphorothioate (27.4%D). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC Semi VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Herbicides
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

PCBs
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Pesticides
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
F2	MS/MSD RPD exceeds control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
*1	LCS/LCSD RPD exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: HDR Inc
Job ID: 310-292709-1
Project/Site: Metro Park EAST-Landfill Phase 1

Laboratory: Eurofins Cedar Falls

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Iowa	State	007	12-01-25

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
8082A	3511	Water	PCB-1268
8260D		Water	1,2,4-Trichlorobenzene
8260D		Water	Allyl chloride
8260D		Water	Ethyl methacrylate

Laboratory: Eurofins Chicago

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
Iowa	State	082	05-01-26

Laboratory: Eurofins Savannah

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Receipt Information

Date/Time Received: DATE 10/11/24 TIME 1710 Received By: PG

Delivery Type: ☐ UPS ☐ FedEx ☐ FedEx Ground ☐ US Mail ☐ Spee-Dee
☑ Lab Courier ☐ Lab Field Services ☐ Client Drop-off ☐ Other:_____

Condition of Cooler/Containers

Sample(s) received in Cooler? ☑ Yes ☐ No *If yes:* Cooler ID:

Multiple Coolers? ☒ Yes ☐ No *If yes:* Cooler # 1 of 2

Cooler Custody Seals Present? ☐ Yes ☑ No *If yes:* Cooler custody seals intact? ☐ Yes ☐ No

Sample Custody Seals Present? ☐ Yes ☑ No *If yes:* Sample custody seals intact? ☐ Yes ☐ No

Trip Blank Present? ☐ Yes ☐ No *If yes:* Which VOA samples are in cooler? ↓

Temperature Record

Coolant: ☑ Wet ice ☐ Blue ice ☐ Dry ice ☐ Other:_____ ☐ NONE

Thermometer ID: 2 Correction Factor (°C):

• **Temp Blank Temperature** – If no temp blank, or temp blank temperature above criteria, proceed to Sample Container Temperature

Uncorrected Temp (°C): 1.2 Corrected Temp (°C): 1.2

• **Sample Container Temperature**

	CONTAINER 1	CONTAINER 2
Container(s) used:		
Uncorrected Temp (°C):		
Corrected Temp (°C):		

Exceptions Noted

1) If temperature exceeds criteria, was sample(s) received same day of sampling? ☐ Yes ☐ No
   a) *If yes:* Is there evidence that the chilling process began? ☐ Yes ☐ No

2) If temperature is <0°C, are there obvious signs that the integrity of sample containers is compromised? (e.g., bulging septa, broken/cracked bottles, frozen solid?) ☐ Yes ☐ No

NOTE If yes, contact PM before proceeding If no, proceed with login

Note: Since laboratory accreditations are subject to change, Eurofins Environment Testing North Central LLC places the ownership of method analyte & accreditation compliance upon our subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/tests/matrix being analyzed the samples must be shipped back to the Eurofins Environment Testing North Central LLC laboratory or other instructions will be provided. Any changes to accreditation status should be brought to Eurofins Environment Testing North Central LLC attention immediately. If all requested accreditations are current to date return the signed Chain of Custody attesting to said compliance to Eurofins Environment Testing North Central LLC.

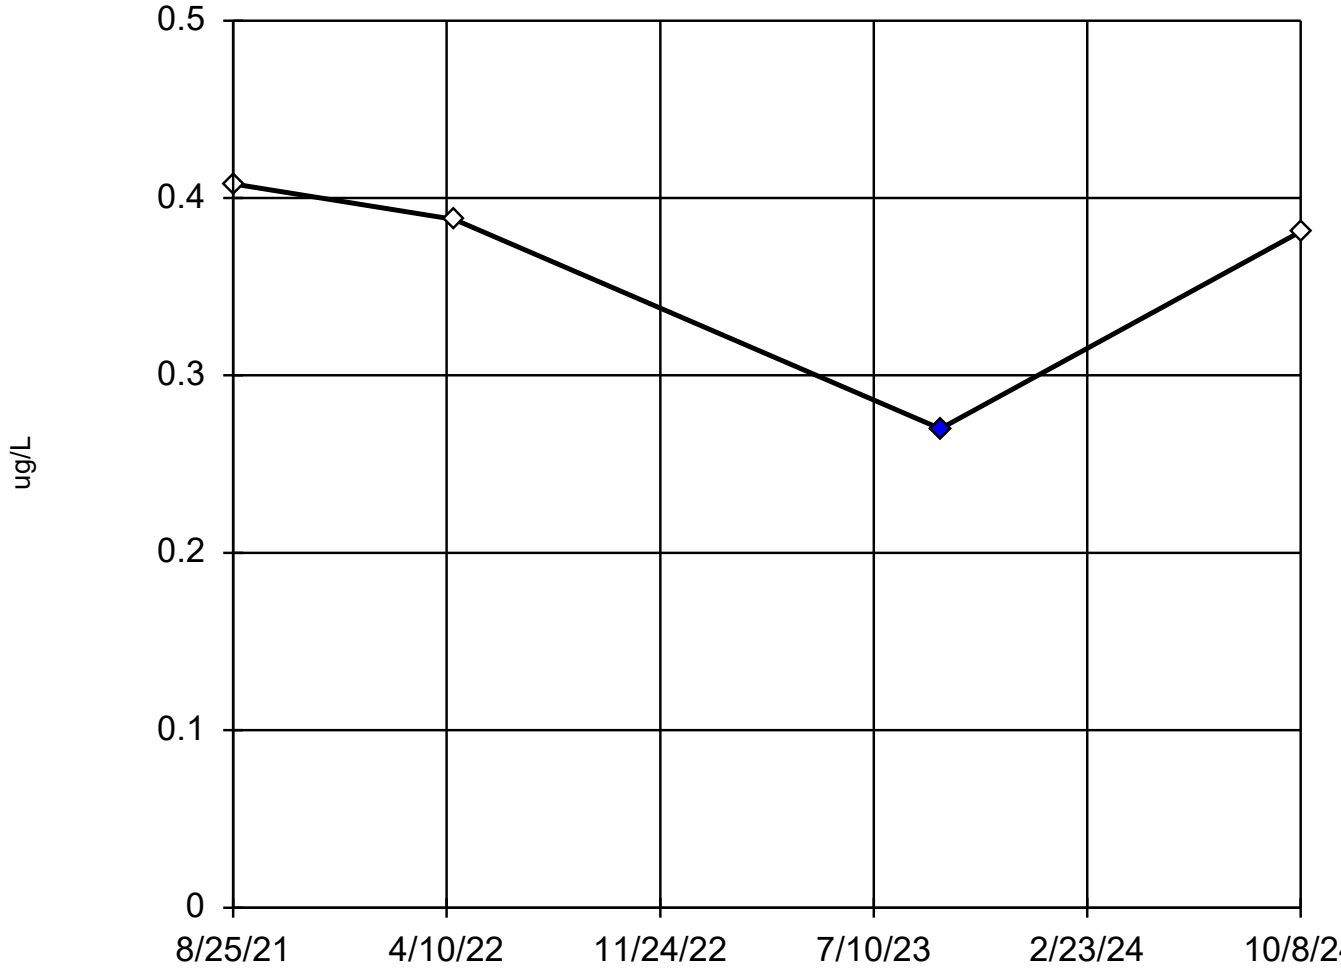
Appendix C

Statistical Analysis

This page intentionally left blank.

Dixon's Outlier Test

MW-69



n = 4

Statistical outlier is drawn as solid.
Testing for 1 low outlier.
Mean = 0.3618.
Std. Dev. = 0.06223.
<0.27: c = 0.8043
tabl = 0.765.
Alpha = 0.05.

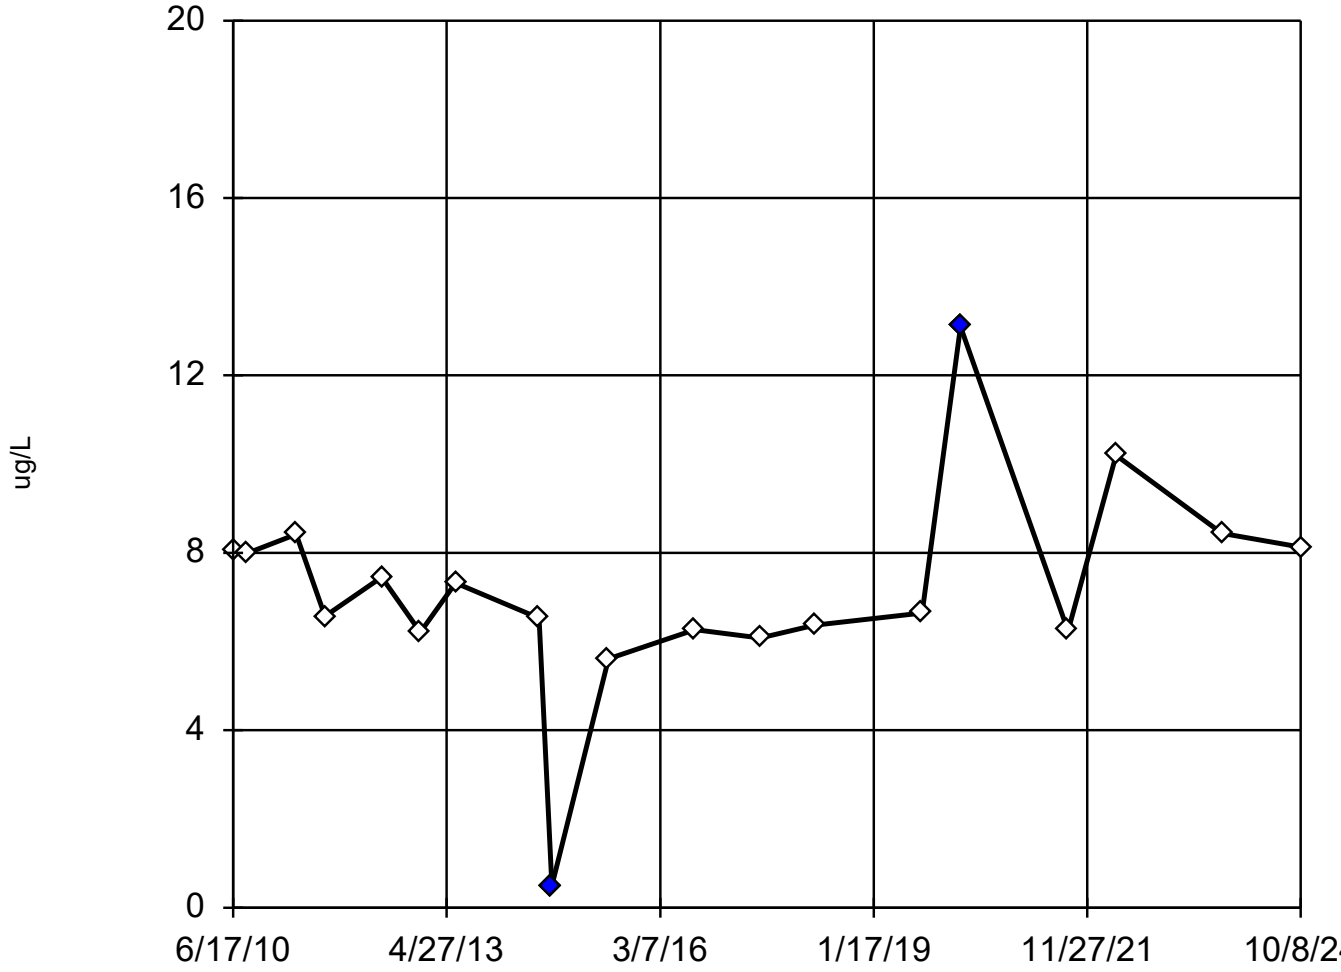
Normality test used:
Shapiro Wilk@alpha = 0.1
Calculated = 0.9283
Critical = 0.789
The distribution, after removal of suspect value, was found to be normally distributed.

Constituent: 1,2-Dichloropropane Analysis Run 12/9/2024 8:59 AM View: 1_Descriptive Statistics - Outlier

Metro Park East LF Data: MPE Phase I Database

Dixon's Outlier Test

MW-29



n = 19

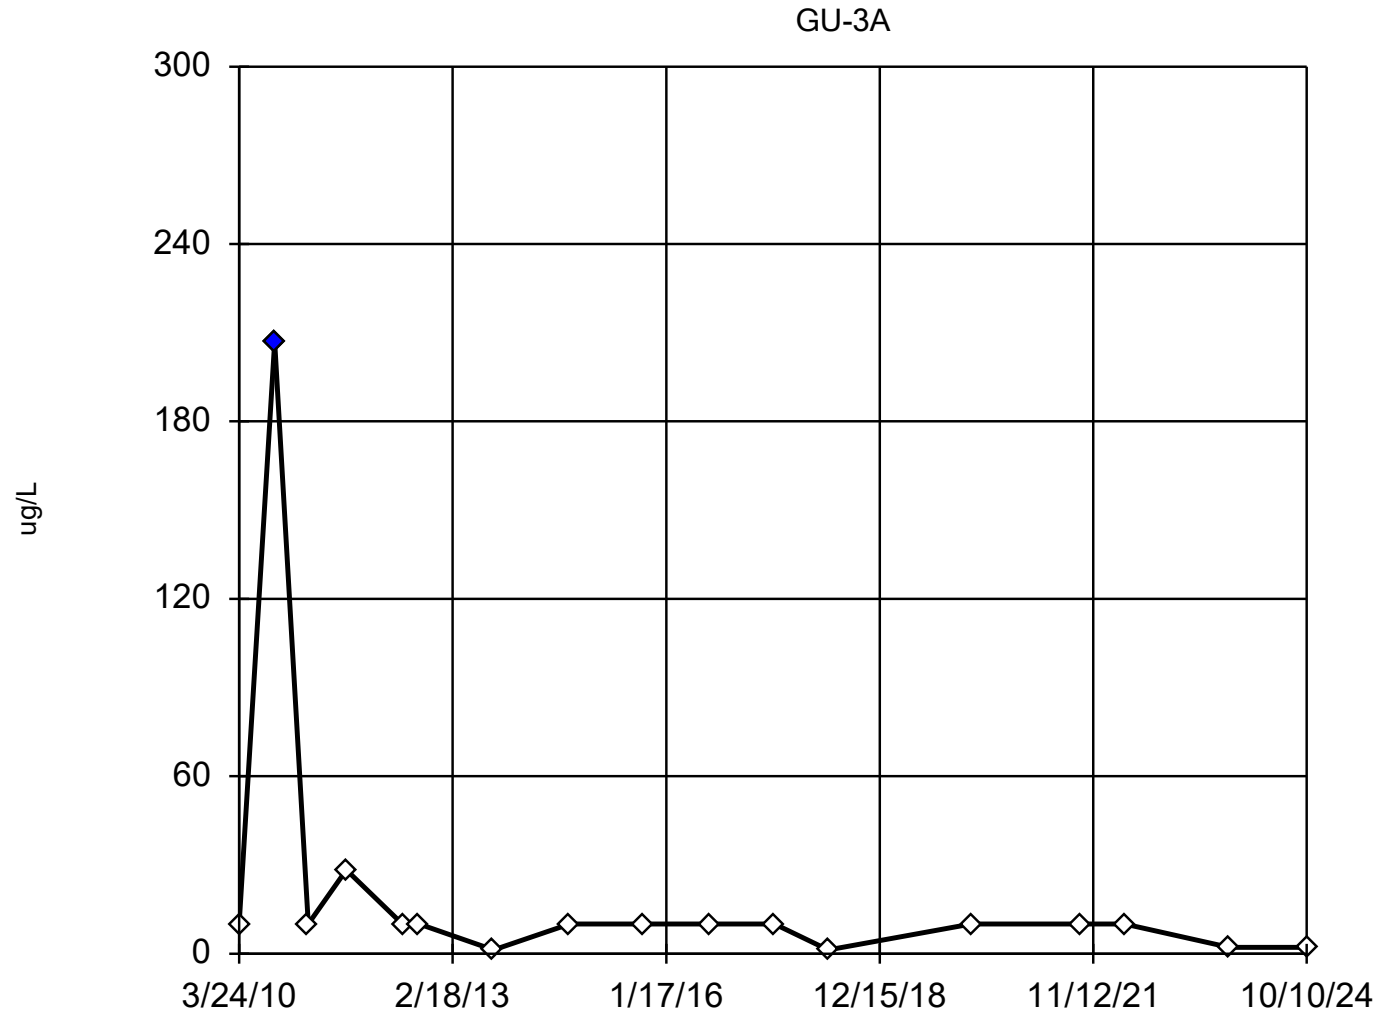
Statistical outliers are drawn as solid.
1 value manually flagged as an outlier.
Testing for 1 high and 1 low outliers.
Mean = 7.165.
Std. Dev. = 2.385.
13.1: c = 0.5727
tabl = 0.462.
-0.6931 (o): c = 0.8839
tabl = 0.462.
Alpha = 0.05.

Normality test used:
Shapiro Wilk@alpha = 0.1
Calculated = 0.9324
Critical = 0.91 (after natural log transformation)
The distribution, after removal of suspect values, was found to be log-normal.

Constituent: 1,4-Dichlorobenzene Analysis Run 12/9/2024 9:00 AM View: 1_Descriptive Statistics - Outlier

Metro Park East LF Data: MPE Phase I Database

Tukey's Outlier Screening



n = 17

Outlier is drawn as solid.
Tukey's method used in lieu of parametric test because the Shapiro Wilk normality test failed at the 0.1 alpha level.

Data were natural log transformed to achieve best W statistic (graph shown in original units).

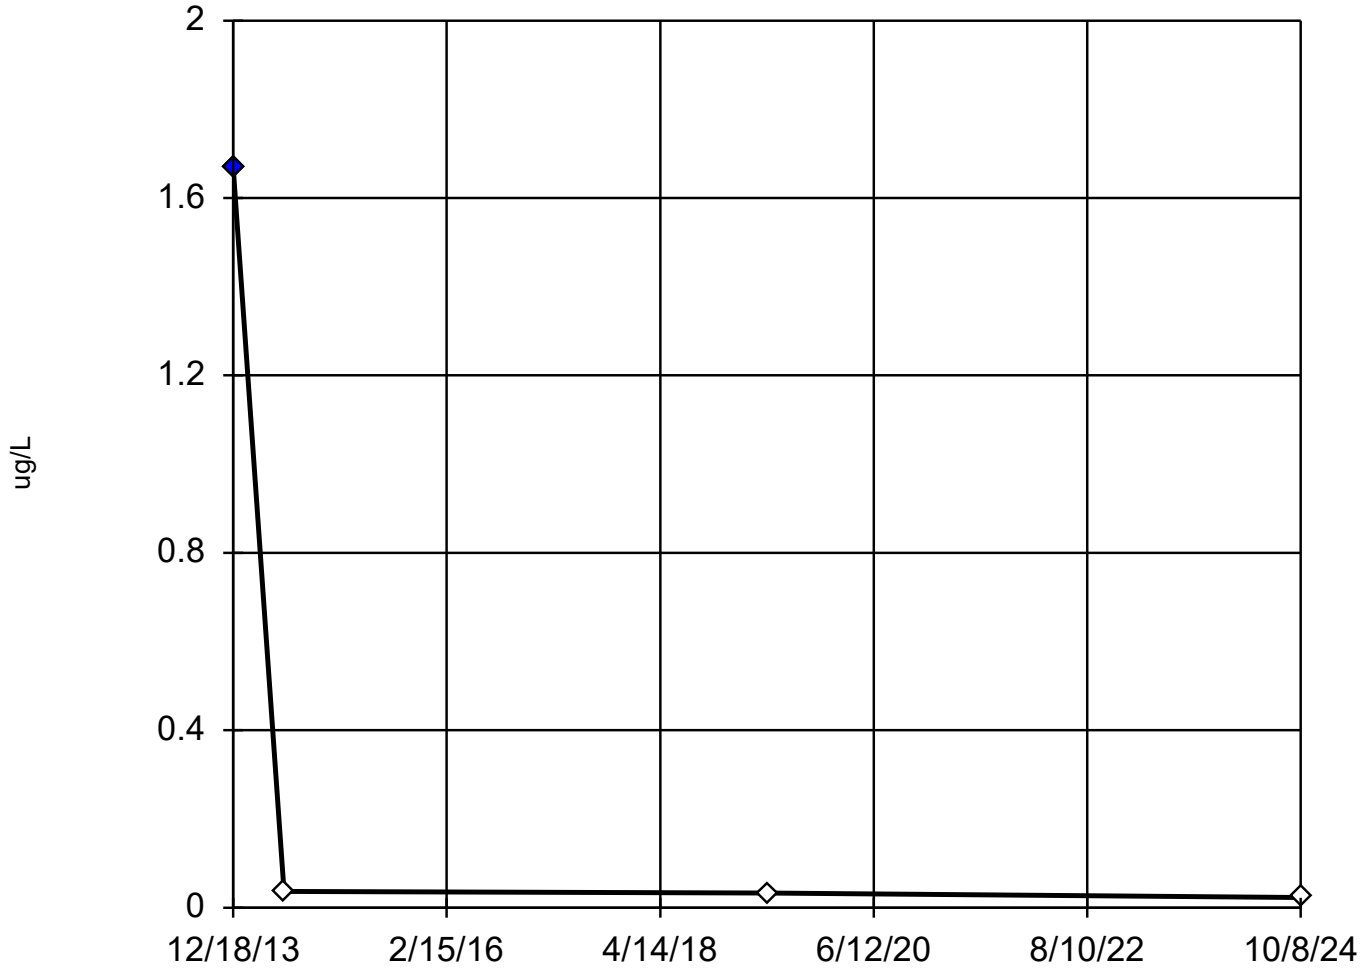
High cutoff = 103.9, low cutoff = 0.441, based on IQR multiplier of 3.

Constituent: 2-Butanone [MEK] Analysis Run 12/9/2024 9:00 AM View: 1_Descriptive Statistics - Outliers_

Metro Park East LF Data: MPE Phase I Database

Dixon's Outlier Test

MW-18



n = 4

Statistical outlier is drawn as solid.
1 value manually flagged as an outlier.
Testing for 1 high outlier.
Mean = 0.4406.
Std. Dev. = 0.8196.
<1.67 (o): c = 0.9916
tabl = 0.765.
Alpha = 0.05.

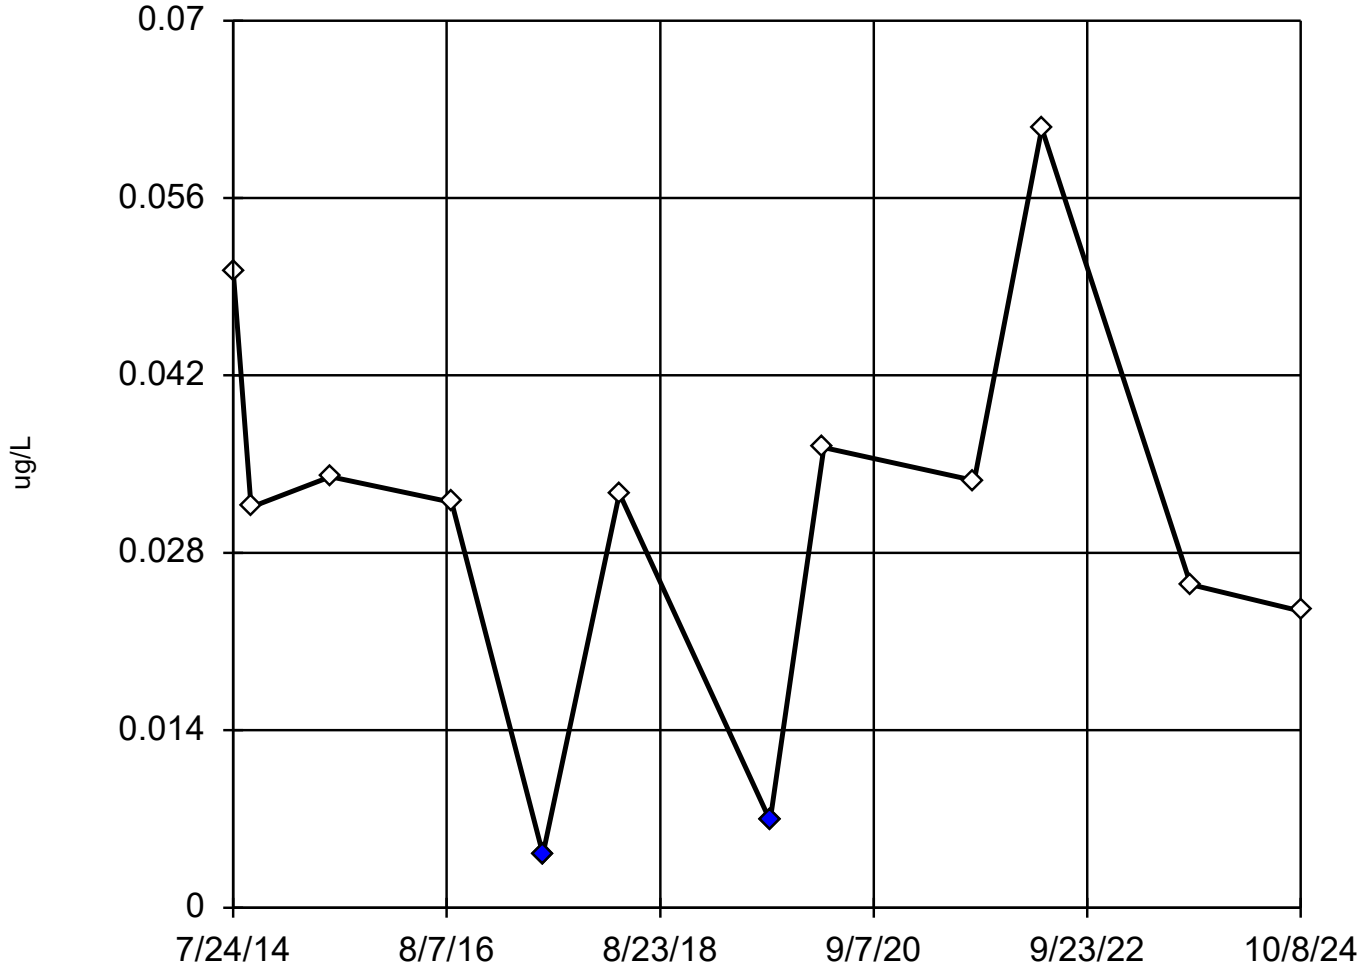
Normality test used:
Shapiro Wilk@alpha = 0.1
Calculated = 0.9479
Critical = 0.789
The distribution, after removal of suspect value, was found to be normally distributed.

Constituent: 4,4`-DDD Analysis Run 12/9/2024 9:00 AM View: 1_Descriptive Statistics - Outliers_v.2

Metro Park East LF Data: MPE Phase I Database

Dixon's Outlier Test

MW-29



n = 12

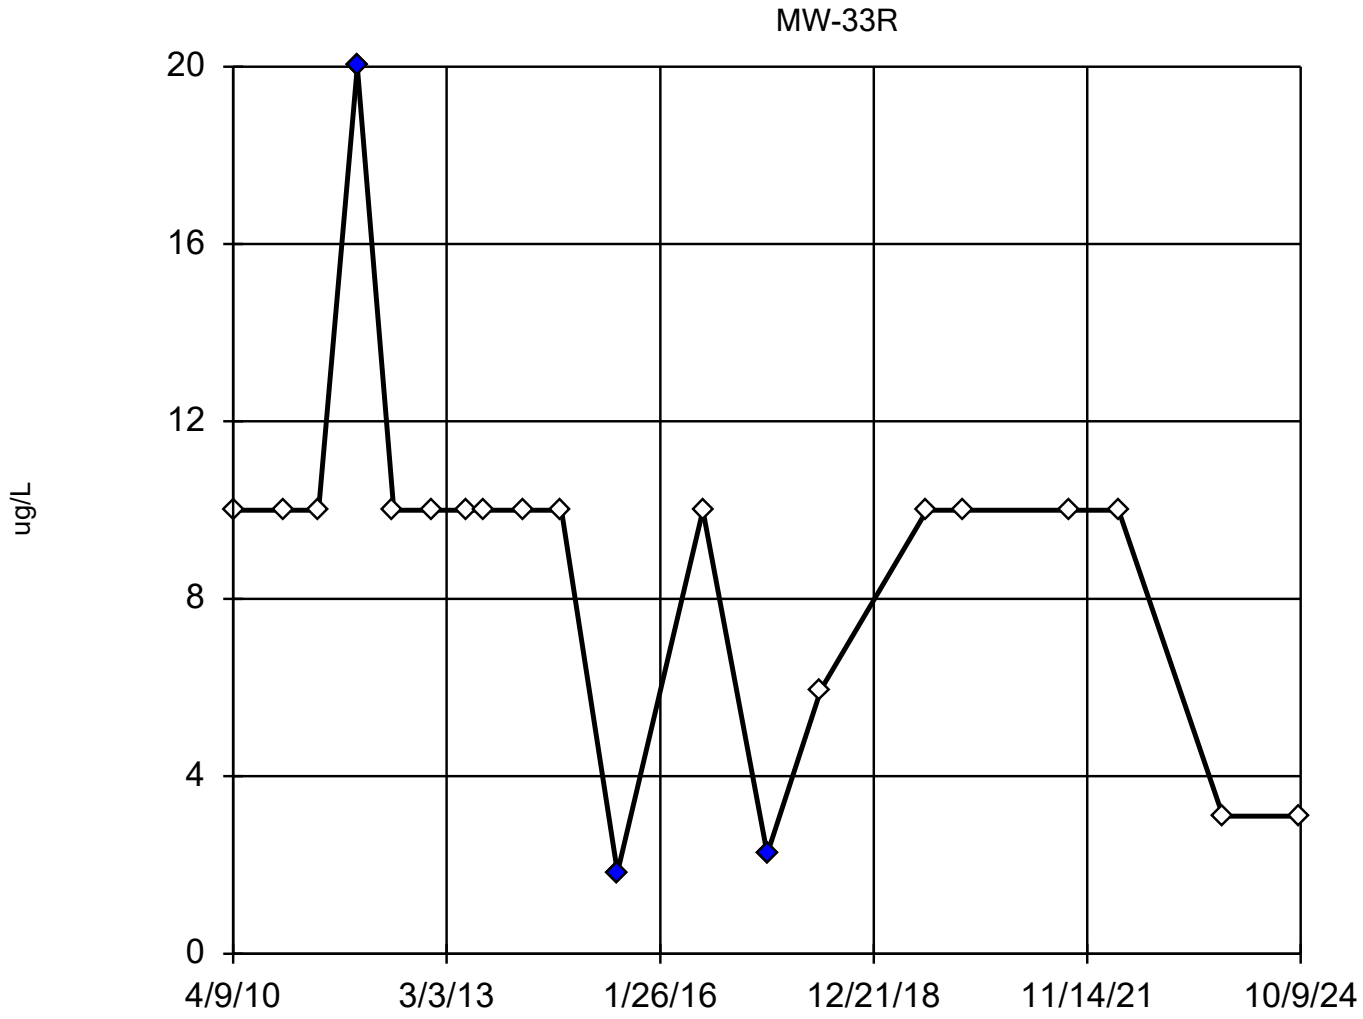
Statistical outliers are drawn as solid.
Testing for 2 low outliers.
Mean = 0.03101.
Std. Dev. = 0.01578.
-4.981 (JP): c = 0.6588
tabl = 0.546.
Alpha = 0.05.

Normality test used:
Shapiro Wilk@alpha = 0.1
Calculated = 0.9036
Critical = 0.869 (after natural log transformation)
The distribution, after removal of suspect values, was found to be log-normal.

Constituent: 4,4`-DDD Analysis Run 12/9/2024 9:00 AM View: 1_Descriptive Statistics - Outliers_v.2

Metro Park East LF Data: MPE Phase I Database

Tukey's Outlier Screening



n = 20

Outliers are drawn as solid.
Tukey's method used in lieu of parametric test because the Shapiro Wilk normality test failed at the 0.1 alpha level.

Data were square root transformed to achieve best W statistic (graph shown in original units).

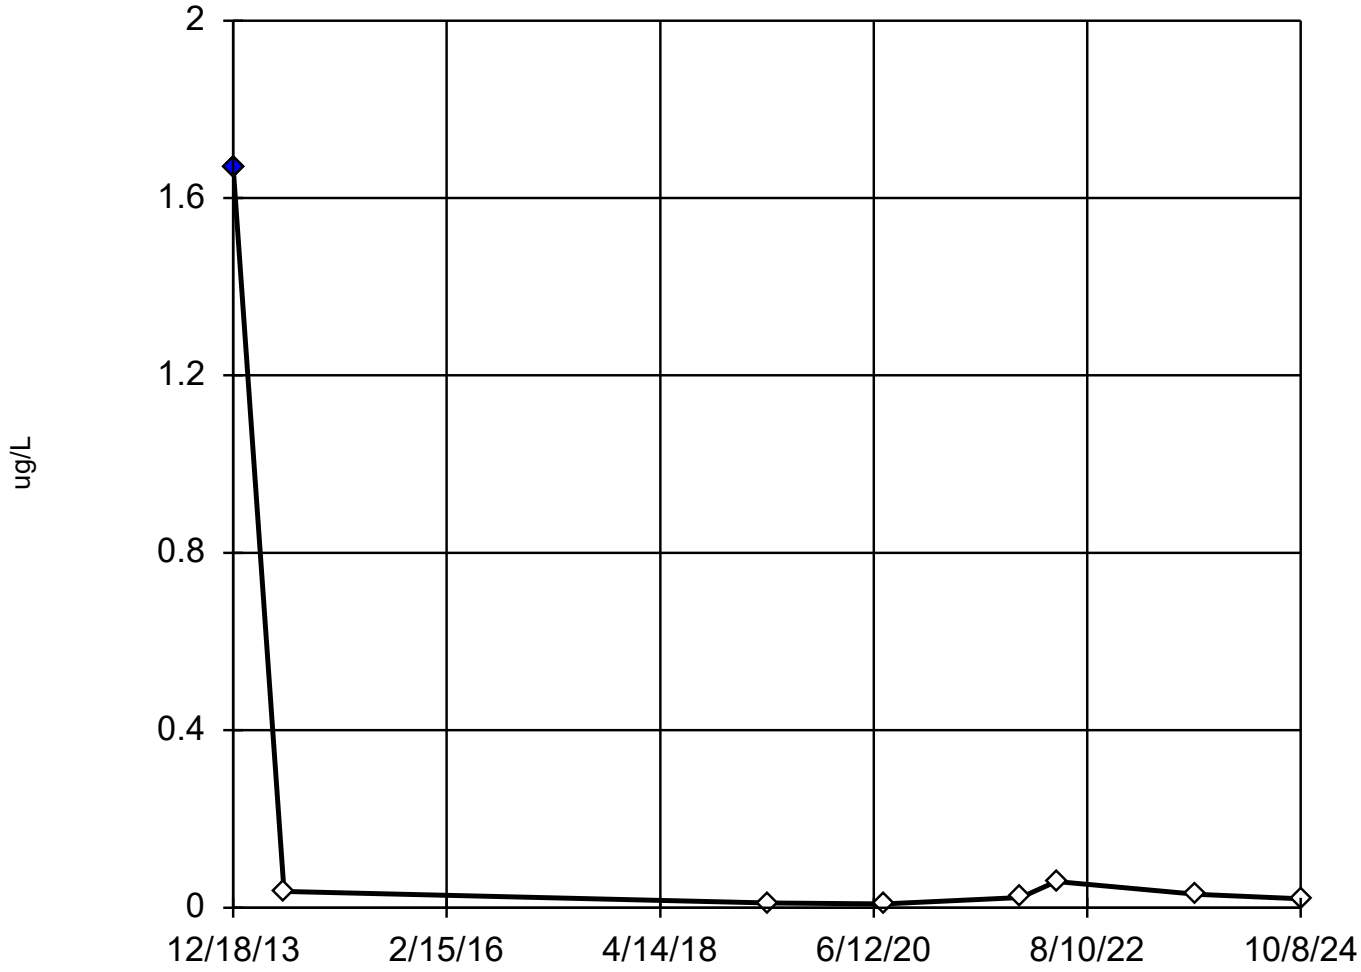
High cutoff = 18.01, low cutoff = 2.96, based on IQR multiplier of 3.

Constituent: Acetone Analysis Run 12/9/2024 9:01 AM View: 1_Descriptive Statistics - Outliers_v.2

Metro Park East LF Data: MPE Phase I Database

Dixon's Outlier Test

MW-18



n = 8

Statistical outlier is drawn as solid.
1 value manually flagged as an outlier.
Testing for 1 high outlier.
Mean = 0.2323.
Std. Dev. = 0.5811.
<1.67 (o): c = 0.9706
tabl = 0.554.
Alpha = 0.05.

Normality test used:
Shapiro Wilk@alpha = 0.1
Calculated = 0.9252
Critical = 0.838
The distribution, after removal of suspect value, was found to be normally distributed.

Constituent: Aldrin Analysis Run 12/9/2024 9:01 AM View: 1_Descriptive Statistics - Outliers_v.2

n = 17

Outliers are drawn as solid.
Tukey's method used in lieu of parametric test because the Shapiro Wilk normality test failed at the 0.1 alpha level.

Data were natural log transformed to achieve best W statistic (graph shown in original units).

High cutoff = 15.32, low cutoff = 0.341, based on IQR multiplier of 3.

This page intentionally left blank.

Hollow symbols indicate censored values.

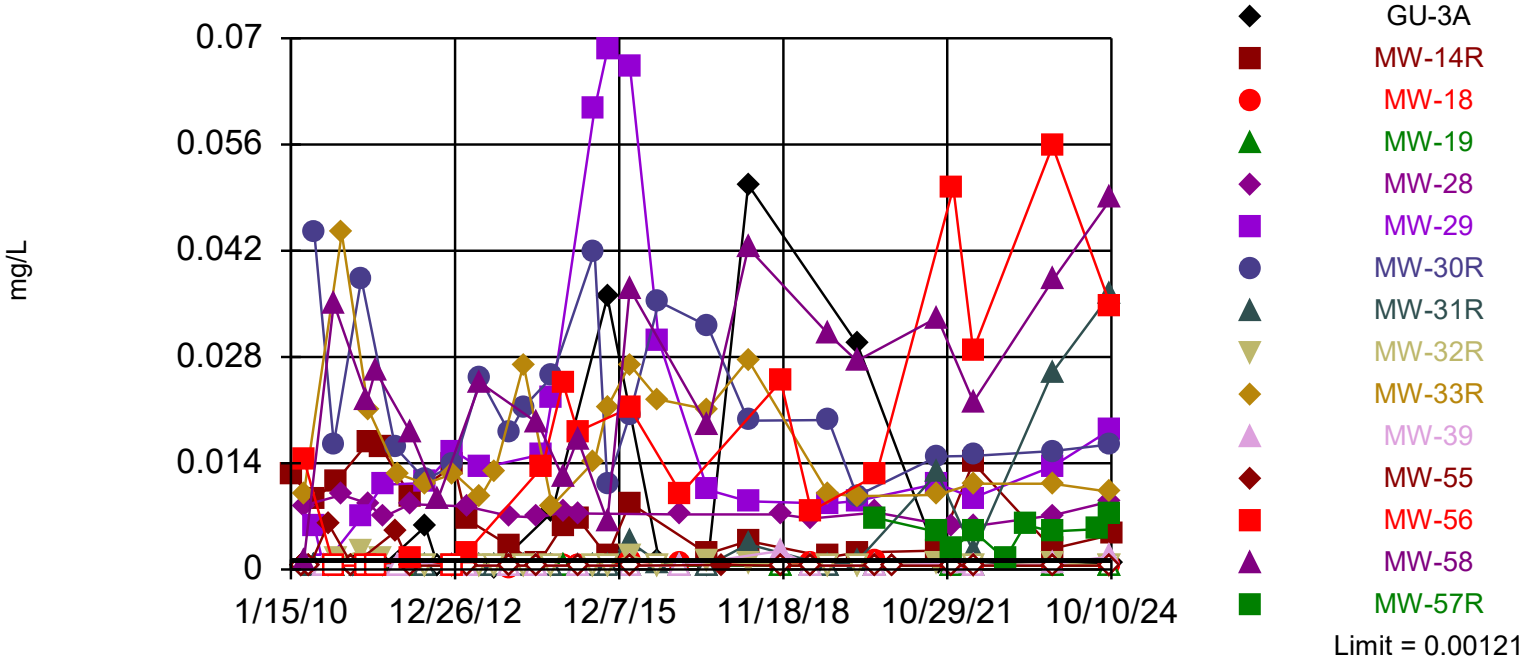
Exceeds Limit: MW-14R, MW-28, MW-29, MW-30R, MW-31R, MW-33R, MW-56, MW-58, MW-57R

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because censored data exceeded 50%. Limit is highest of 32 background values. 93.75% NDs. Annual per-constituent alpha = 0.04499. Individual comparison alpha = 0.001643 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Seasonality was not detected with 95% confidence.

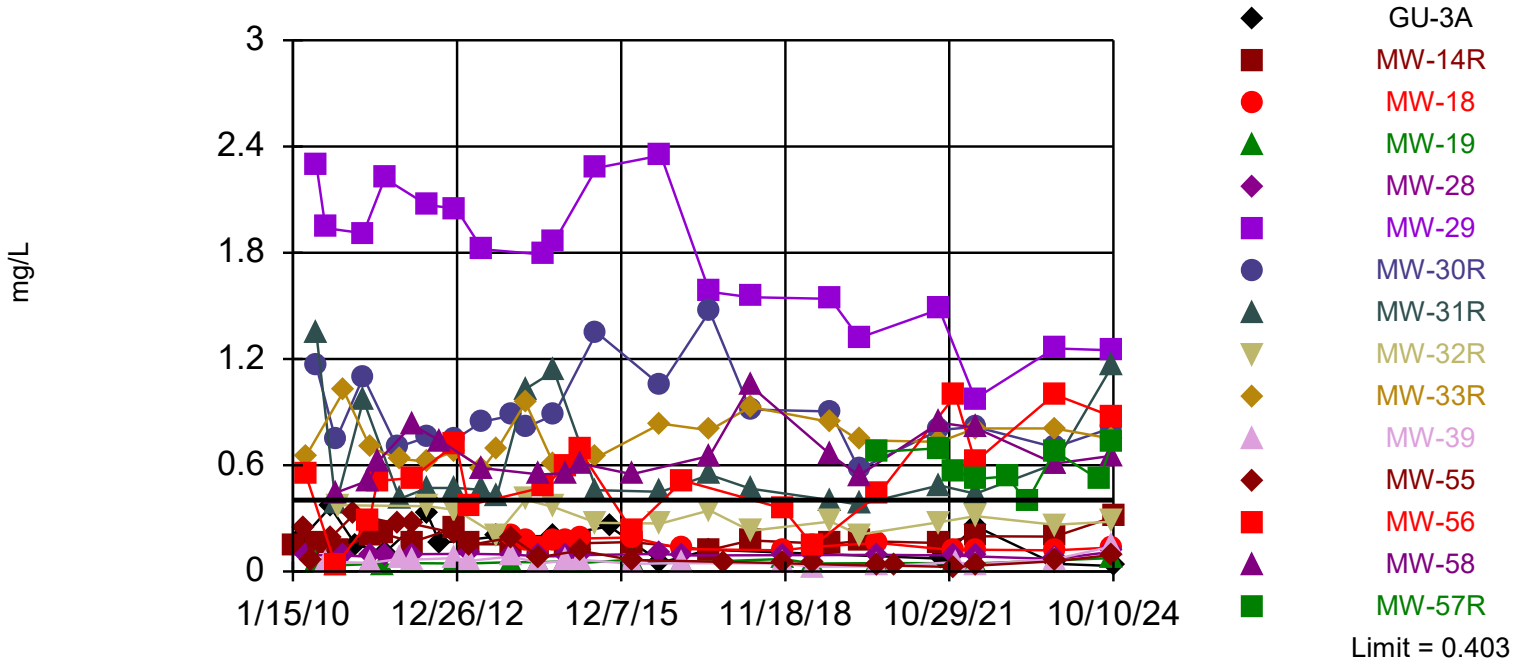
Constituent: Arsenic Analysis Run 1/8/2025 10:47 AM View: 3_PLs

Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Exceeds Limit: MW-29, MW-30R, MW-31R, MW-33R, MW-56, MW-58, MW-57R

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because the Shapiro Wilk normality test showed the data to be non-normal at the 0.01 alpha level. Limit is highest of 33 background values. Annual per-constituent alpha = 0.04267. Individual comparison alpha = 0.001556 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Seasonality was not detected with 95% confidence.

Constituent: Barium Analysis Run 1/8/2025 10:47 AM View: 3_PLs

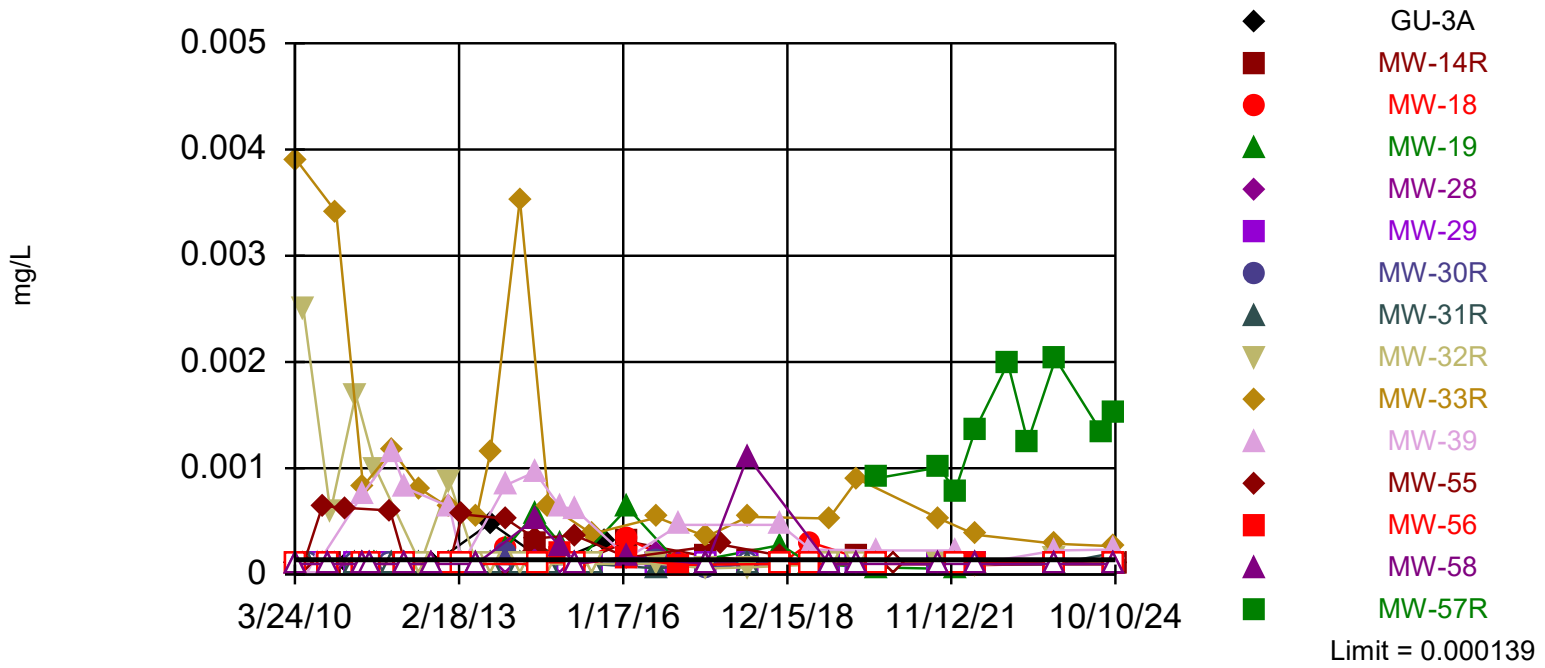
Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Hollow symbols indicate censored values.

Exceeds Limit: MW-31R, MW-33R, MW-39, MW-57R

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because censored data exceeded 50%. Limit is highest of 26 background values. 88.46% NDs. Annual per-constituent alpha = 0.06365. Individual comparison alpha = 0.002346 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Seasonality was not detected with 95% confidence.

Constituent: Cadmium Analysis Run 1/8/2025 10:47 AM View: 3_PLs

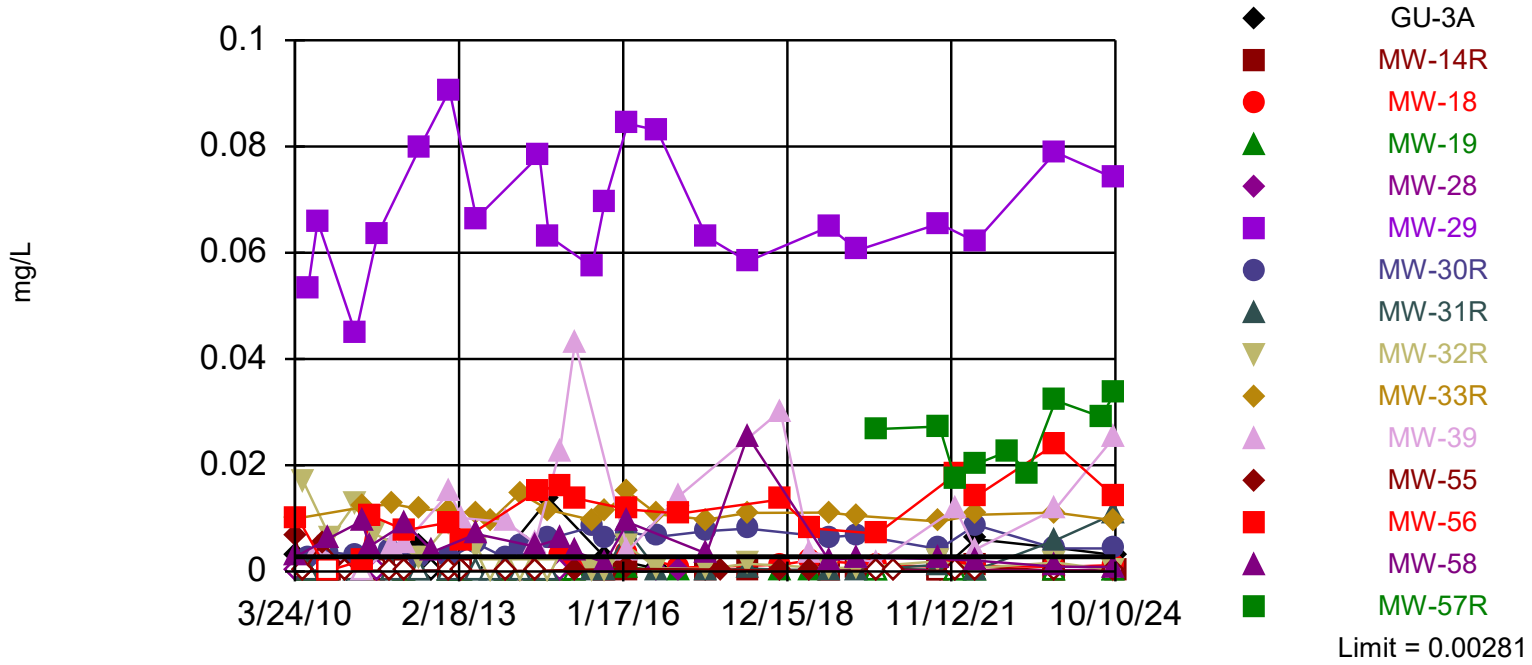
Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Hollow symbols indicate censored values.

Exceeds Limit: GU-3A, MW-29, MW-30R, MW-31R, MW-33R, MW-39, MW-56, MW-57R

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because censored data exceeded 50%. Limit is highest of 36 background values. 61.11% NDs. Annual per-constituent alpha = 0.03643. Individual comparison alpha = 0.001325 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Seasonality was not detected with 95% confidence.

Constituent: Cobalt Analysis Run 1/8/2025 10:47 AM View: 3_PLs

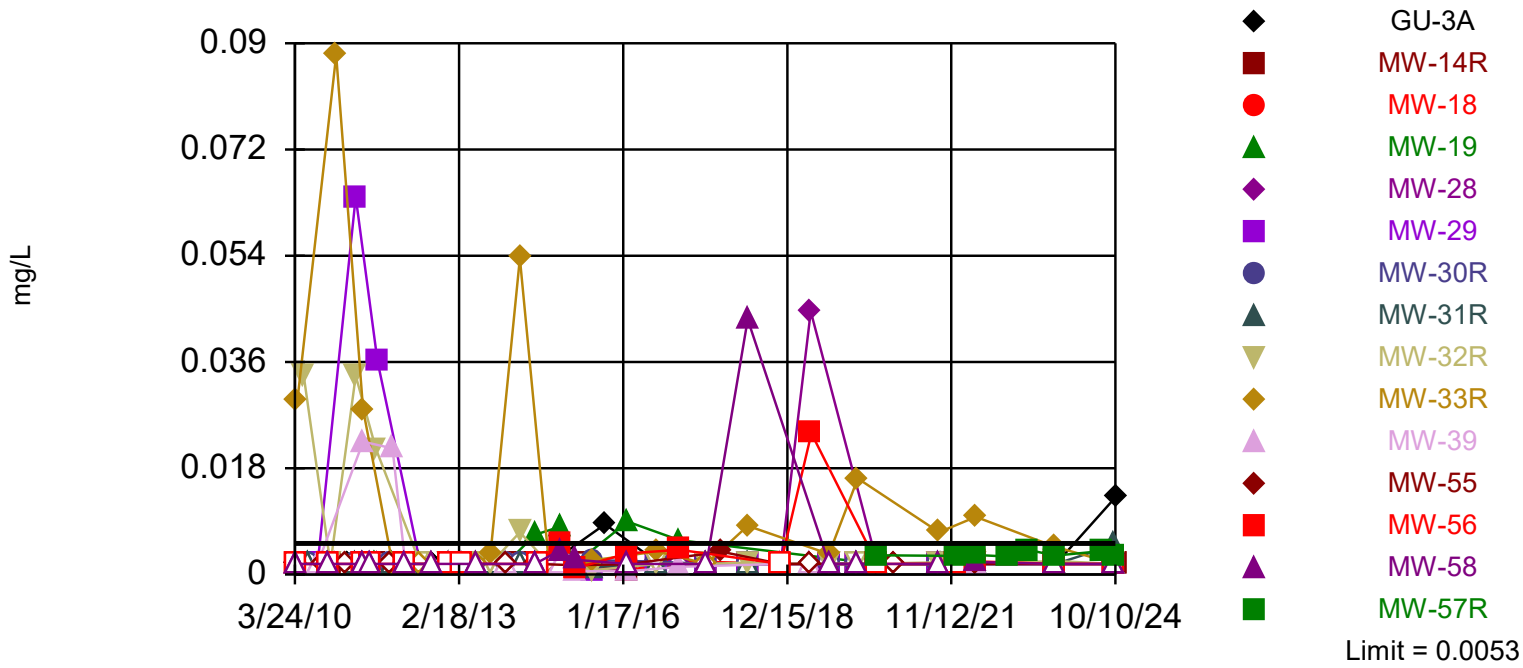
Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Sanitas™ v.10.0.15 Software licensed to HDR. UG
Hollow symbols indicate censored values.

Exceeds Limit: GU-3A

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because censored data exceeded 50%. Limit is highest of 30 background values. 86.67% NDs. Annual per-constituent alpha = 0.04962. Individual comparison alpha = 0.001816 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Insufficient data to test for seasonality; data will not be deseasonalized.

Constituent: Copper Analysis Run 1/8/2025 10:47 AM View: 3_PLs

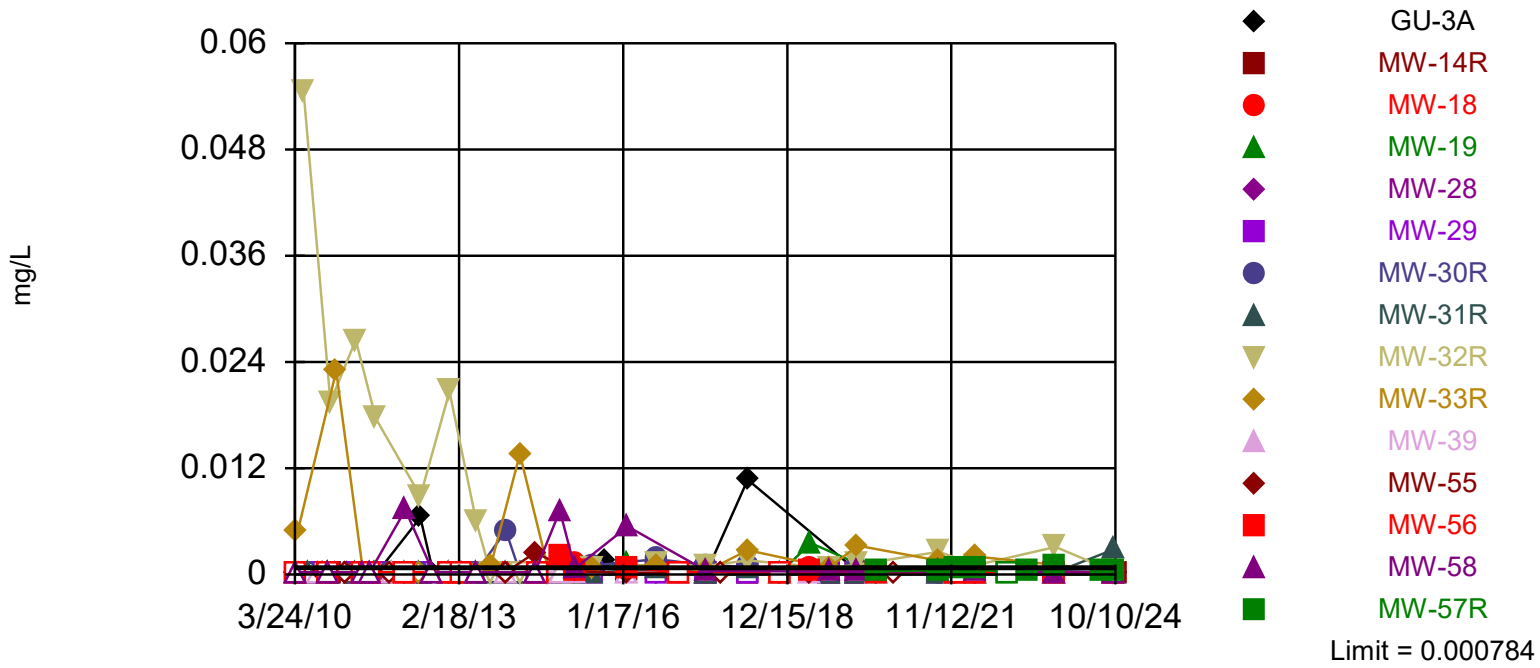
Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Hollow symbols indicate censored values.

Exceeds Limit: MW-31R

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because censored data exceeded 50%. Limit is highest of 32 background values. 84.38% NDs. Annual per-constituent alpha = 0.04499. Individual comparison alpha = 0.001643 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Seasonality was not detected with 95% confidence.

Constituent: Lead Analysis Run 1/8/2025 10:47 AM View: 3_PLs

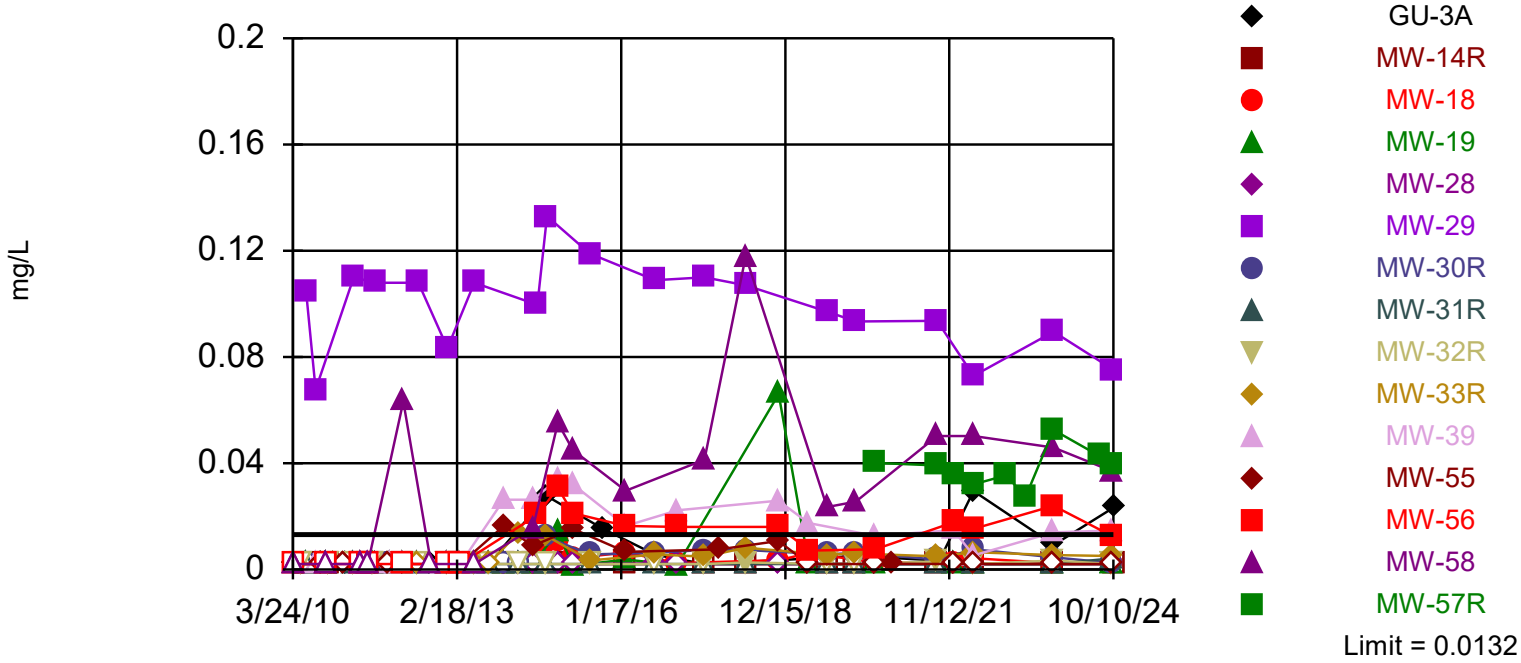
Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Hollow symbols indicate censored values.

Exceeds Limit: GU-3A, MW-29, MW-39, MW-58, MW-57R

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because the Shapiro Wilk normality test showed the data to be non-normal at the 0.01 alpha level. Limit is highest of 22 background values. 50% NDs. Annual per-constituent alpha = 0.08406. Individual comparison alpha = 0.003131 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Seasonality was not detected with 95% confidence.

Constituent: Nickel Analysis Run 1/8/2025 10:47 AM View: 3_PLs

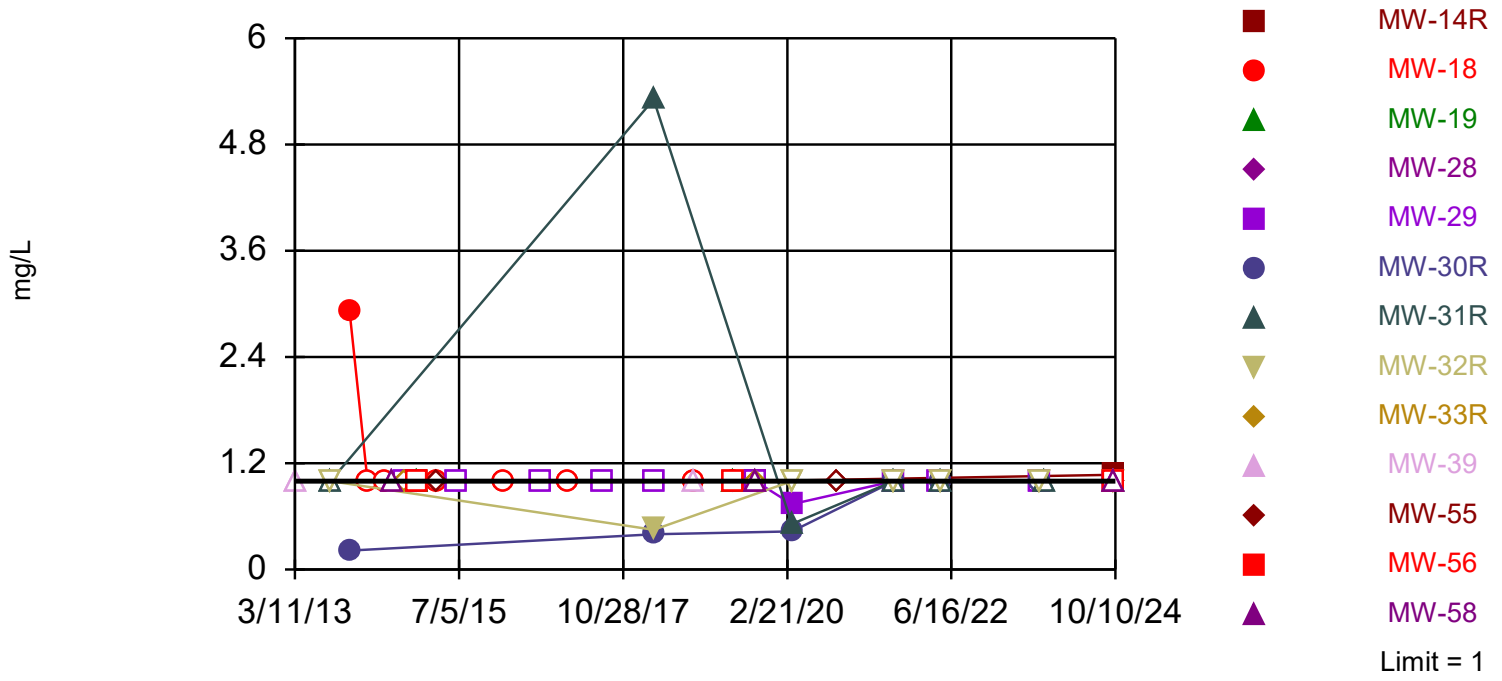
Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Hollow symbols indicate censored values.

Exceeds Limit: MW-14R

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because censored data exceeded 50%. Limit is highest of 8 background values. 87.5% NDs. Annual per-constituent alpha = 0.3002. Individual comparison alpha = 0.01267 (1 of 2). Comparing 13 points to limit. Assumes 15 future values. Insufficient data to test for seasonality; data will not be deseasonalized.

Constituent: Sulfide Analysis Run 1/8/2025 10:47 AM View: 3_PLs

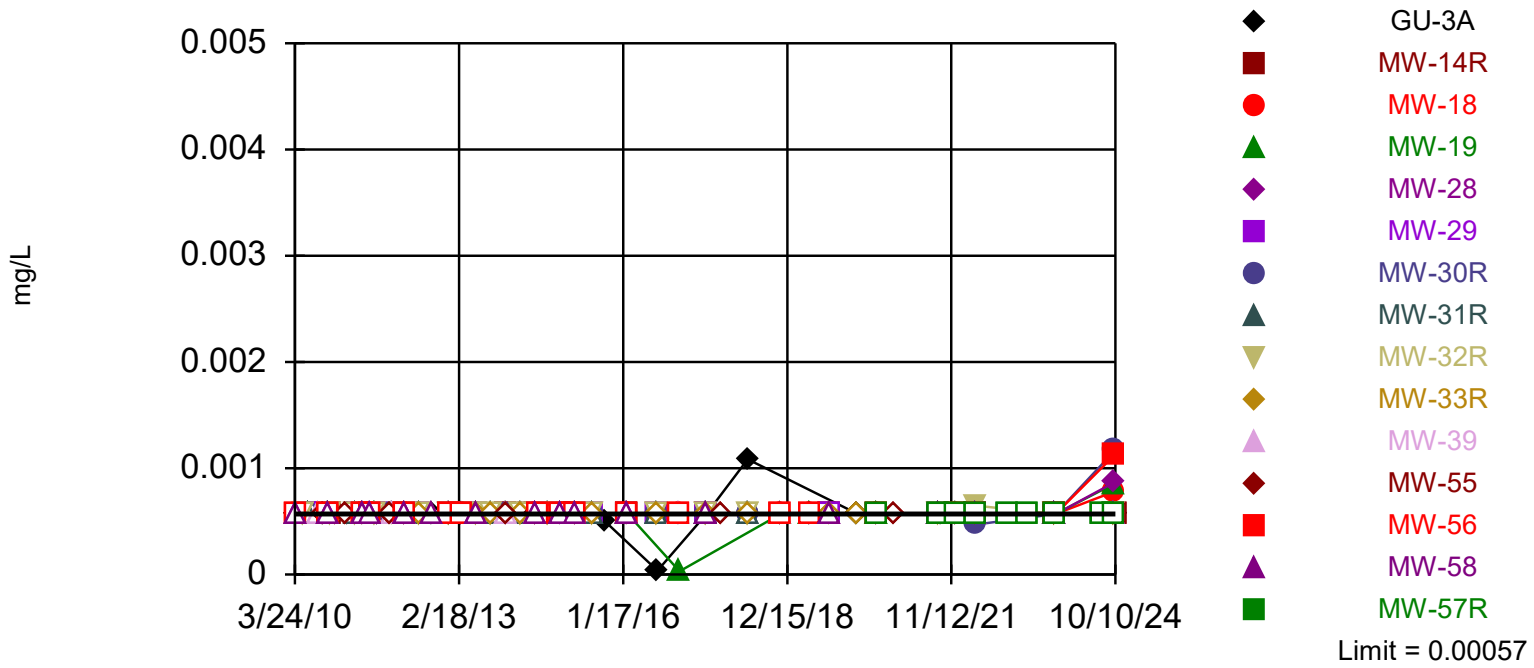
Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Sanitas™ v.10.0.15 Software licensed to HDR. UG
Hollow symbols indicate censored values.

Exceeds Limit: MW-30R, MW-56

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because censored data exceeded 50%. All background values (n = 28) were censored; limit is most recent reporting limit. Annual per-constituent alpha = 0.05664. Individual comparison alpha = 0.00208 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Insufficient data to test for seasonality; data will not be deseasonalized.

Constituent: Thallium Analysis Run 1/8/2025 10:47 AM View: 3_PLs

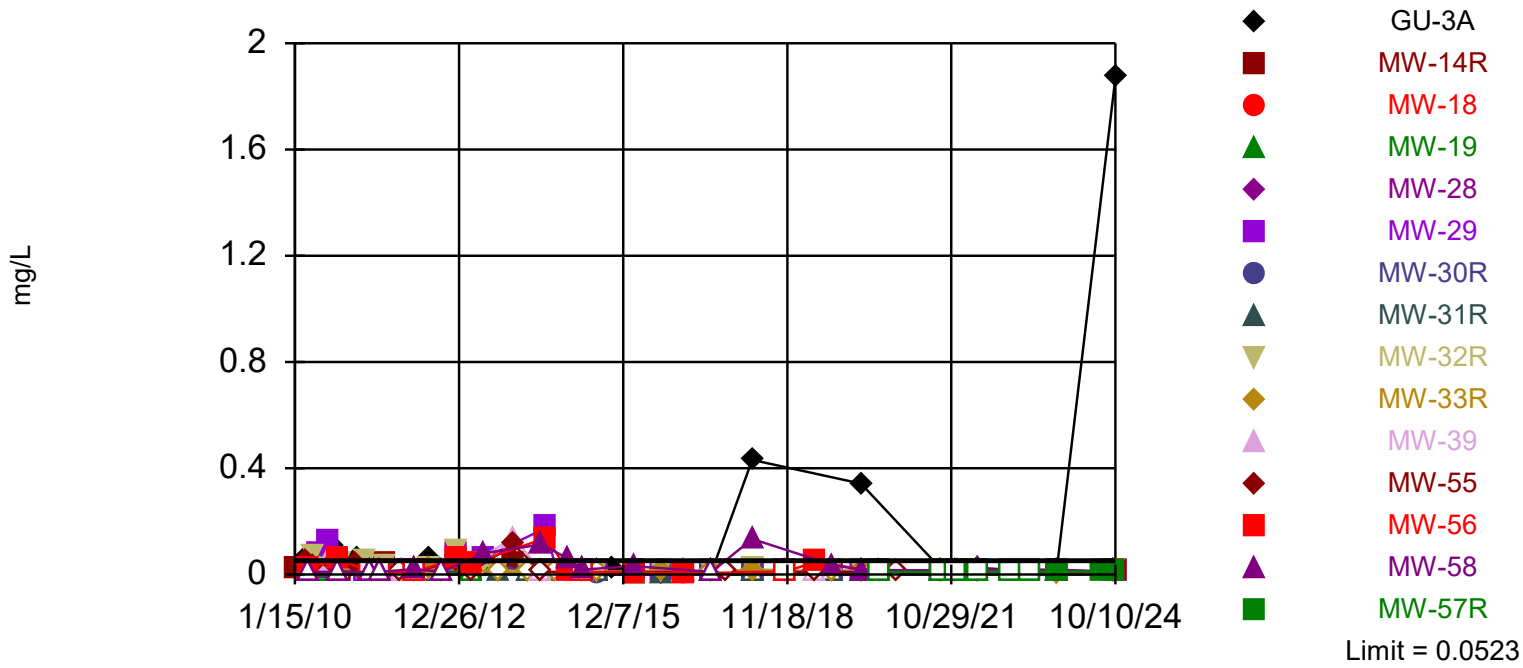
Metro Park East LF Client: Iowa Metro Waste Authority Data: MPE Phase I Database

Hollow symbols indicate censored values.

Exceeds Limit: GU-3A

Prediction Limit

Interwell Non-parametric



Non-parametric test used in lieu of parametric prediction limit because censored data exceeded 50%. Limit is highest of 33 background values. 75.76% NDs. Annual per-constituent alpha = 0.04267. Individual comparison alpha = 0.001556 (1 of 2). Comparing 15 points to limit. Assumes 13 future values. Seasonality was not detected with 95% confidence.

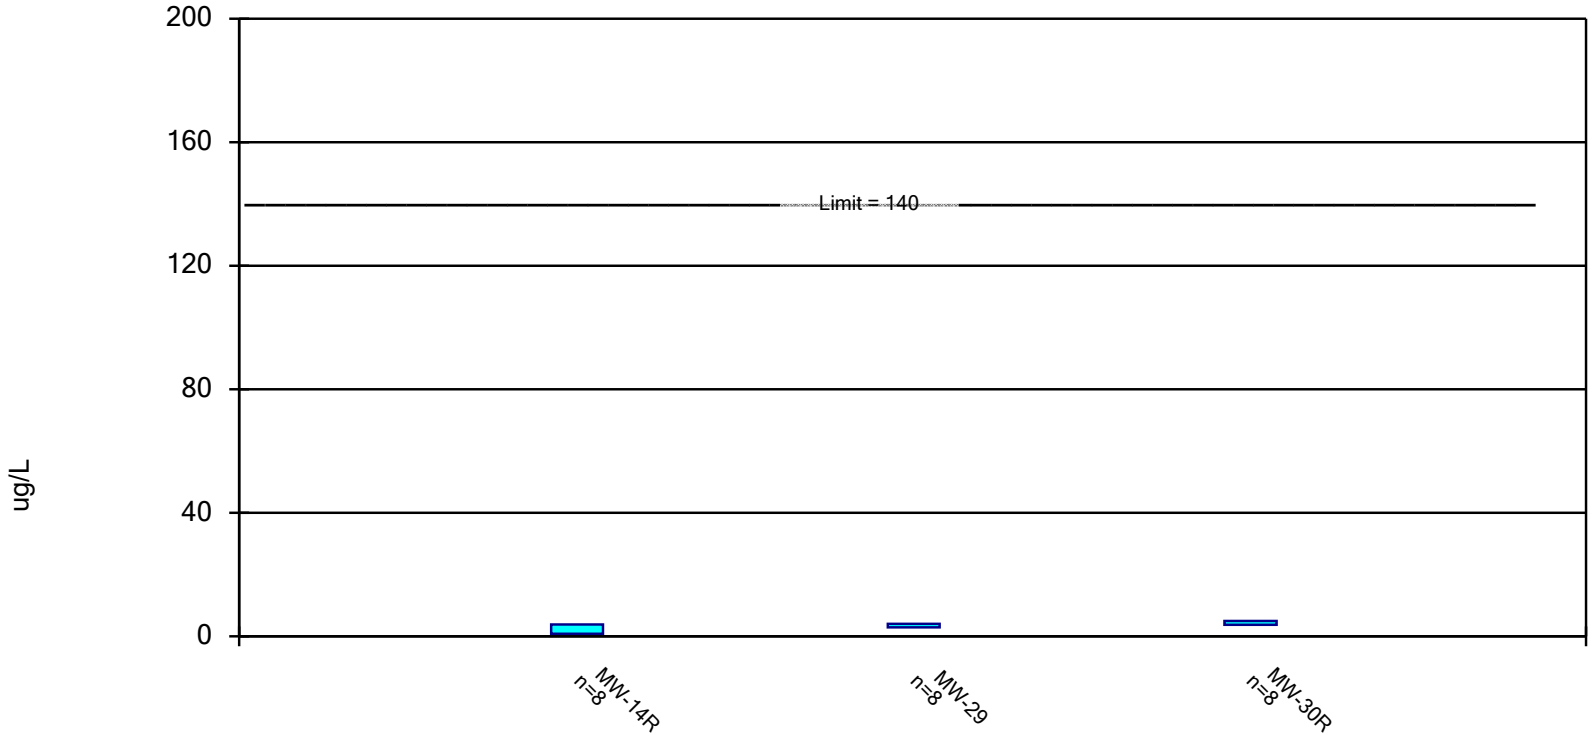
Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

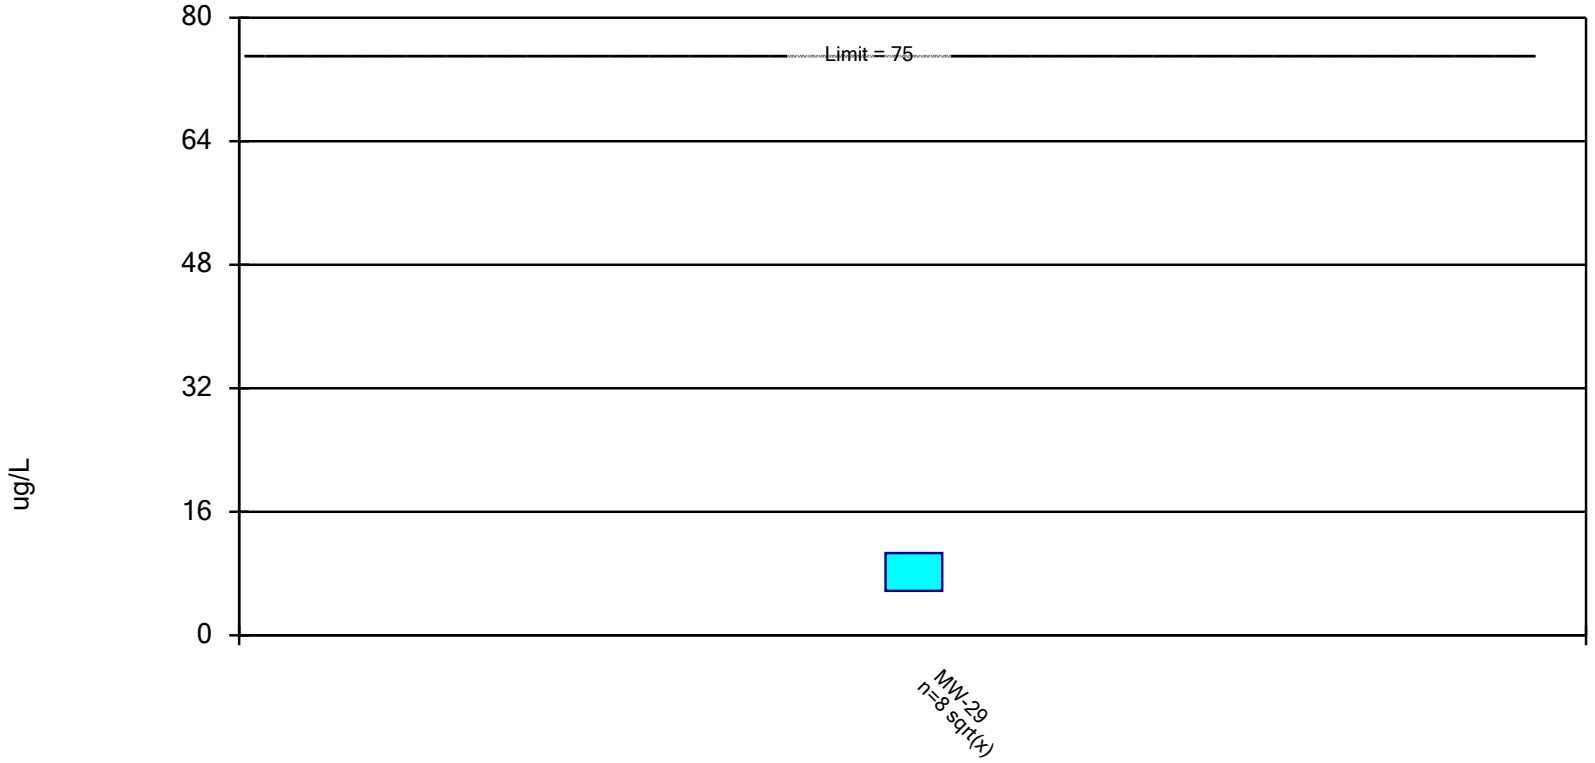


Constituent: 1,1-Dichloroethane Analysis Run 12/9/2024 4:25 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

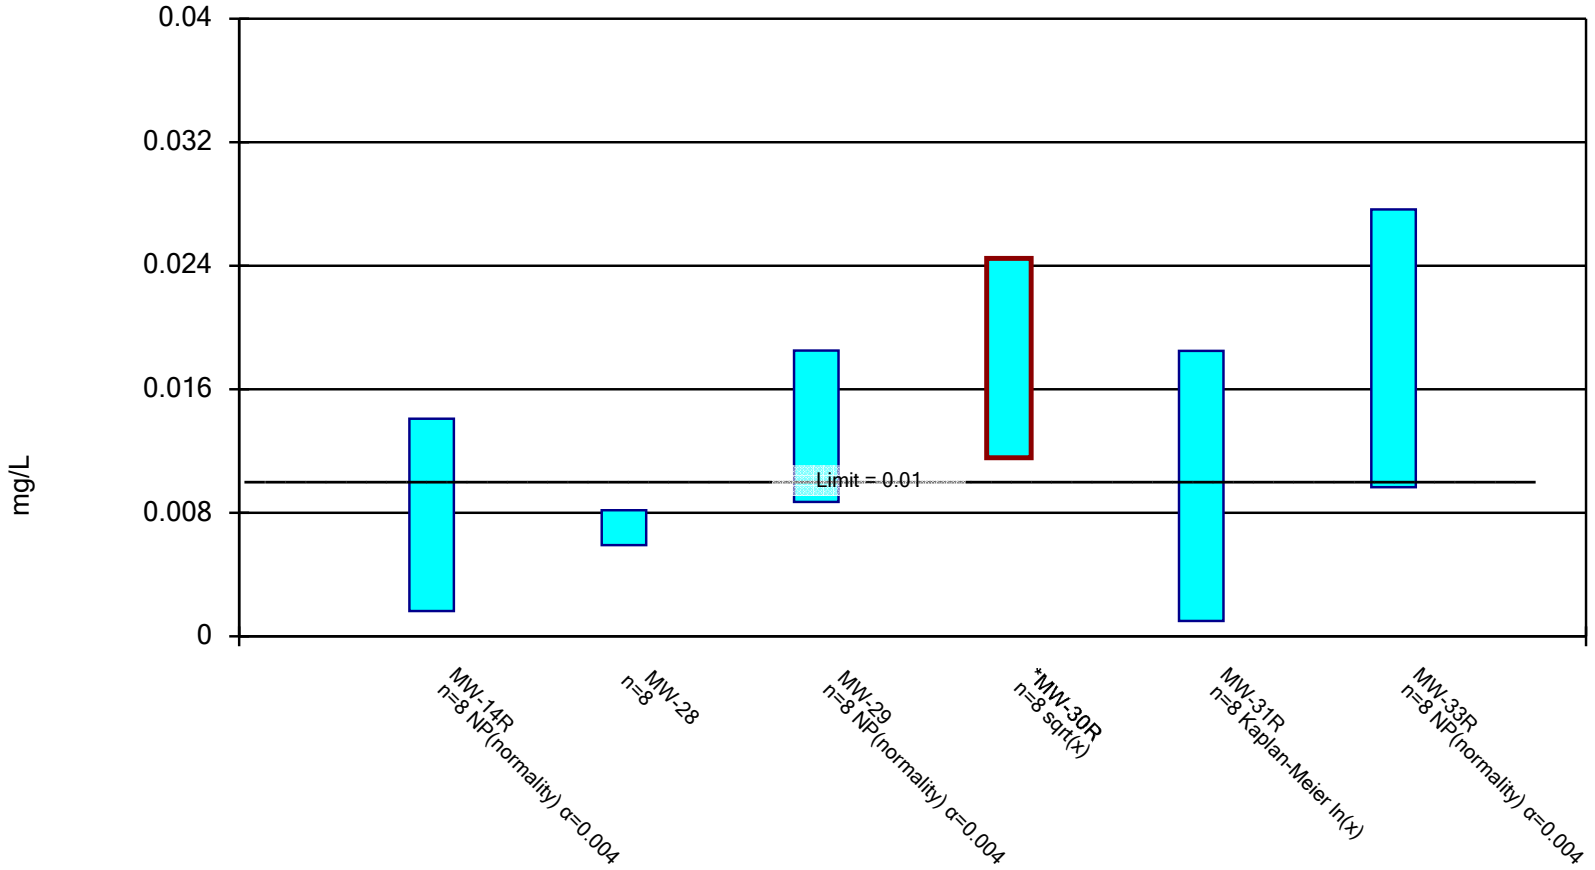


Constituent: 1,4-Dichlorobenzene Analysis Run 12/9/2024 4:25 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric and Non-Parametric (NP) Confidence Interval

Compliance limit is exceeded.* Per-well alpha = 0.01 except as noted. Normality Test: Shapiro Wilk, alpha based on n.

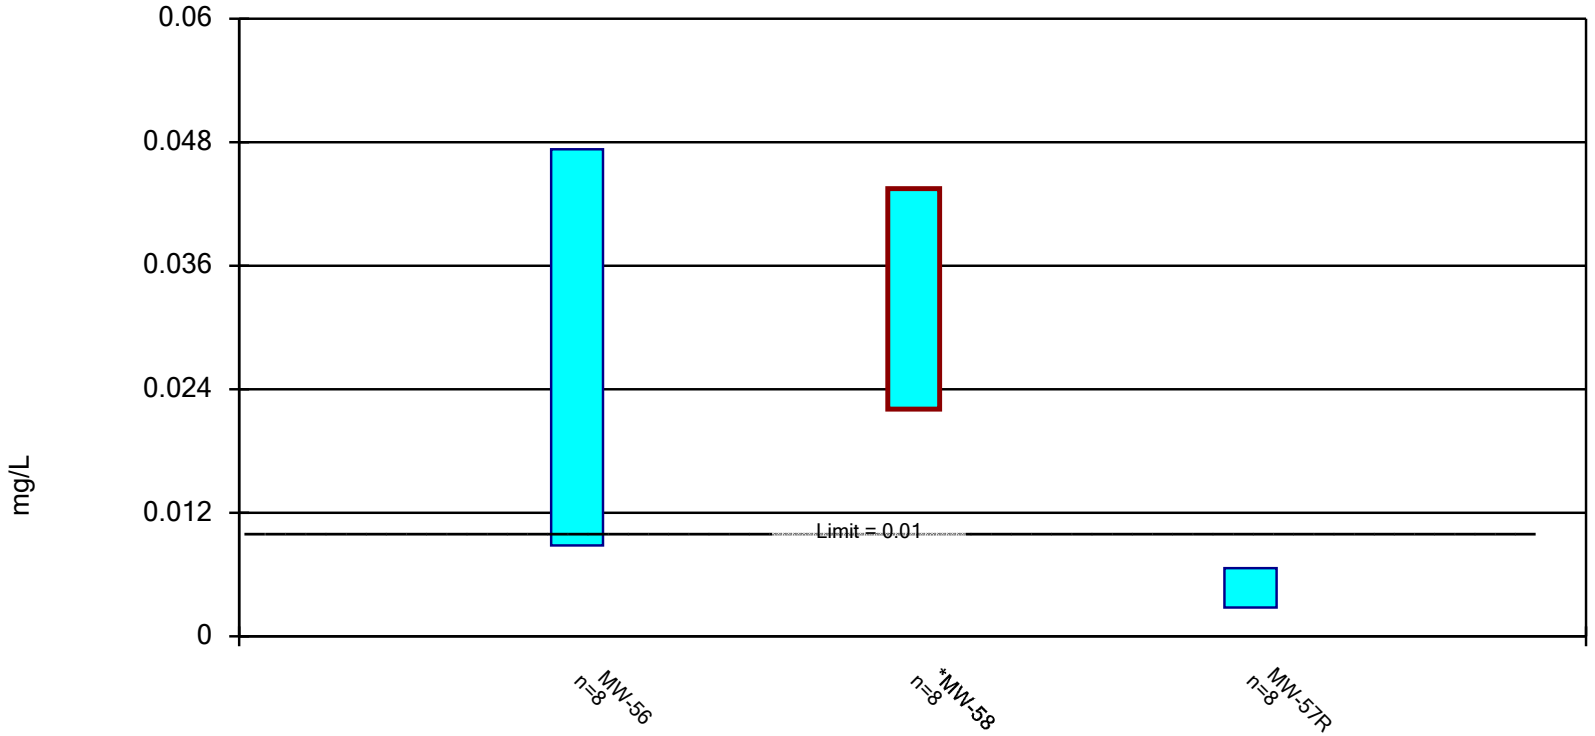


Constituent: Arsenic Analysis Run 12/9/2024 4:25 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance limit is exceeded.* Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

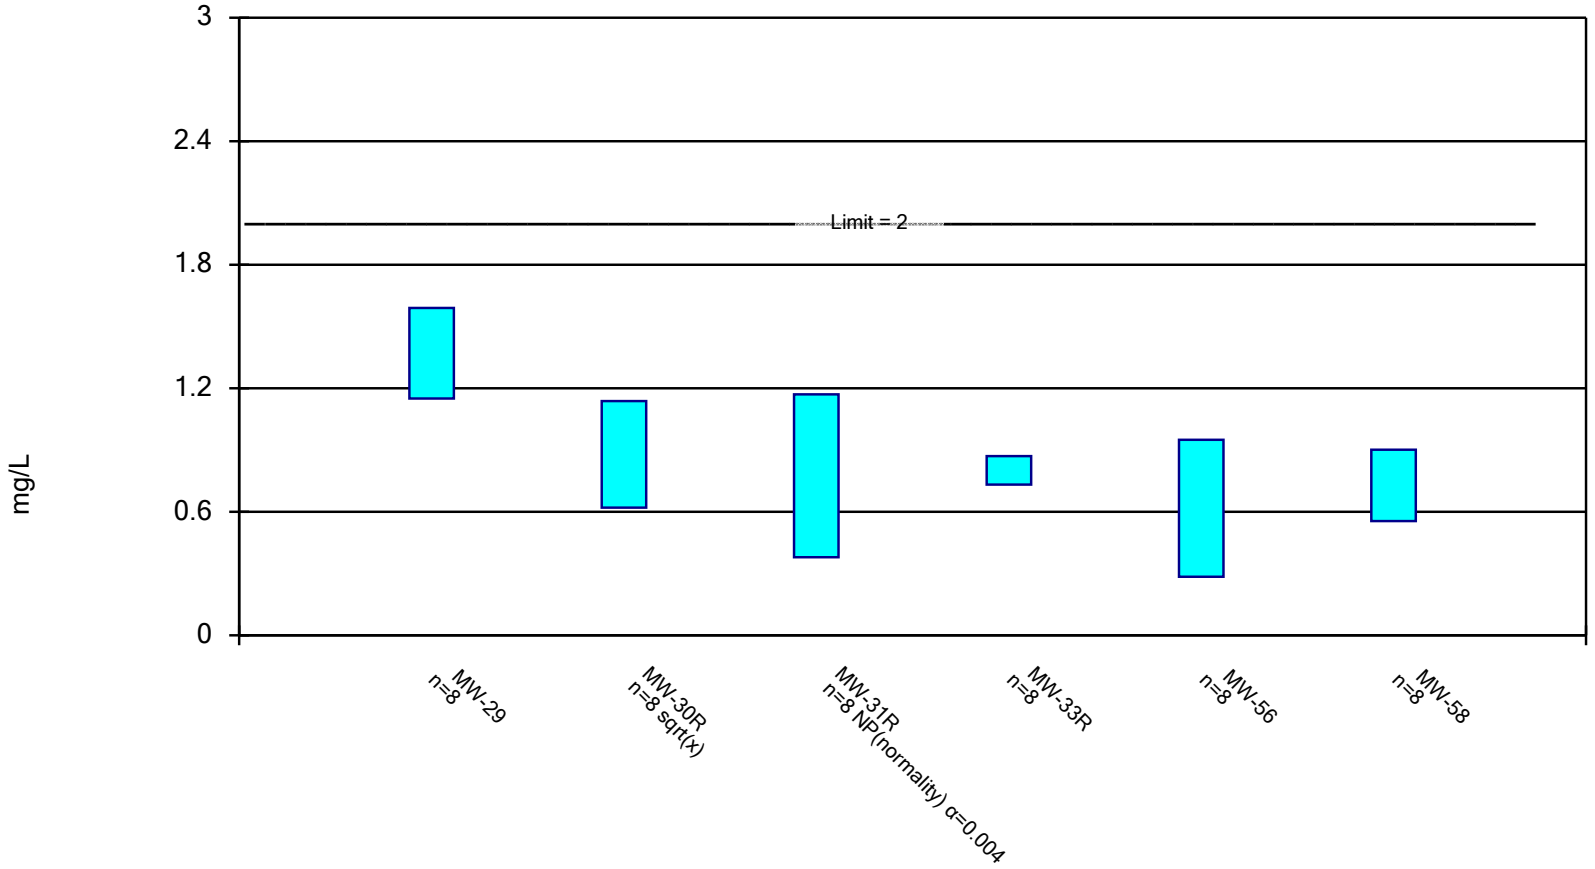


Constituent: Arsenic Analysis Run 12/9/2024 4:25 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric and Non-Parametric (NP) Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01 except as noted. Normality Test: Shapiro Wilk, alpha based on n.

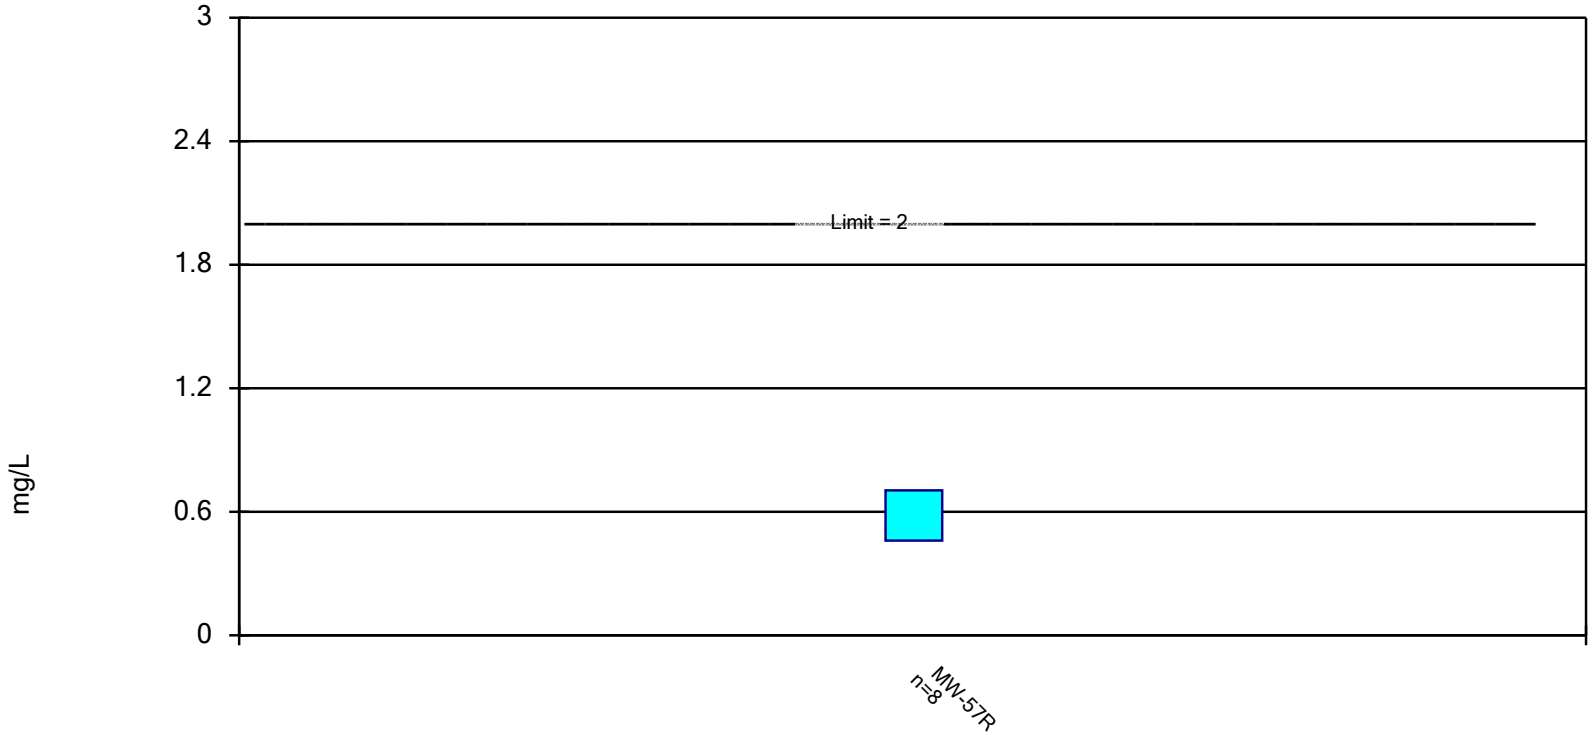


Constituent: Barium Analysis Run 12/9/2024 4:25 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

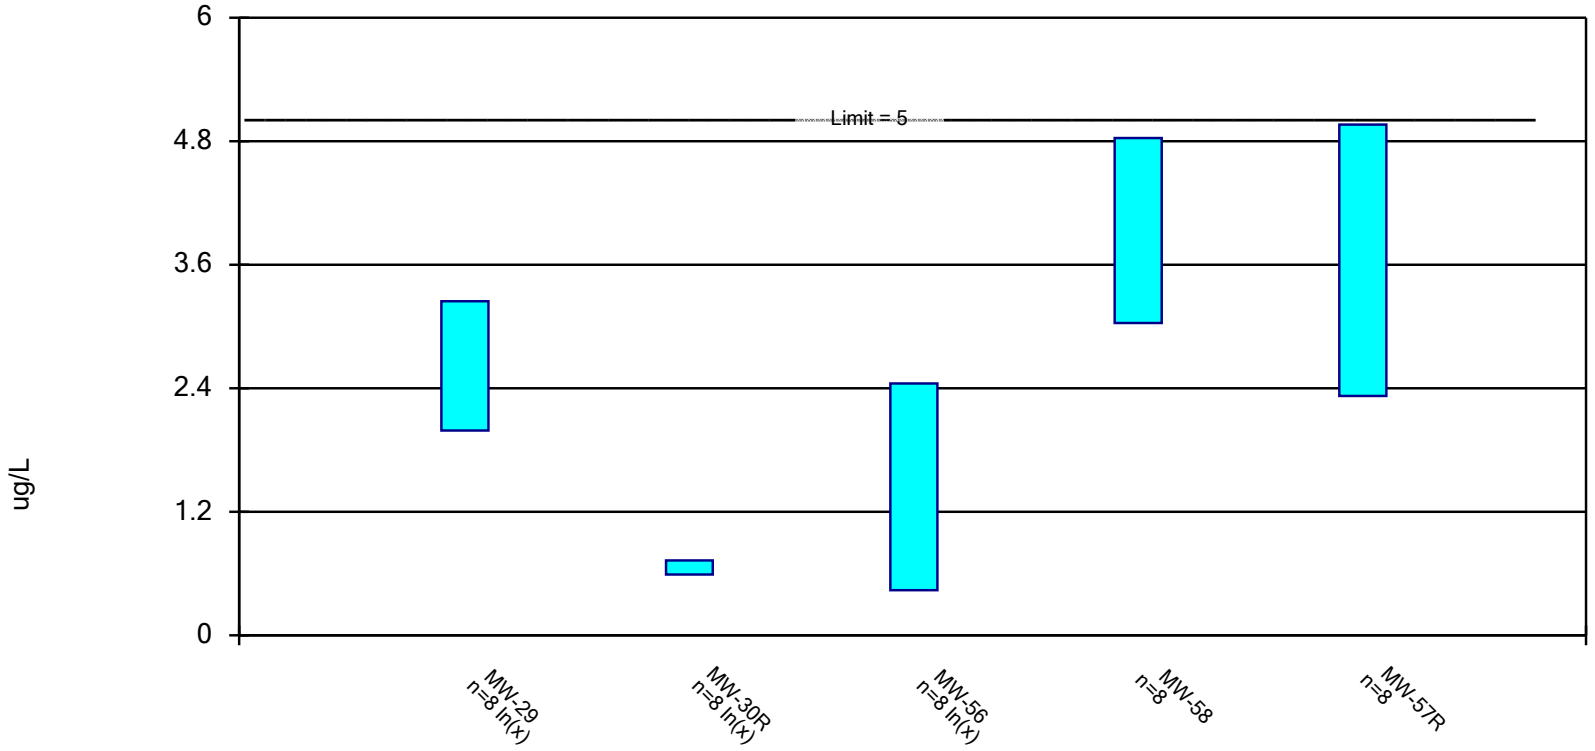


Constituent: Barium Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

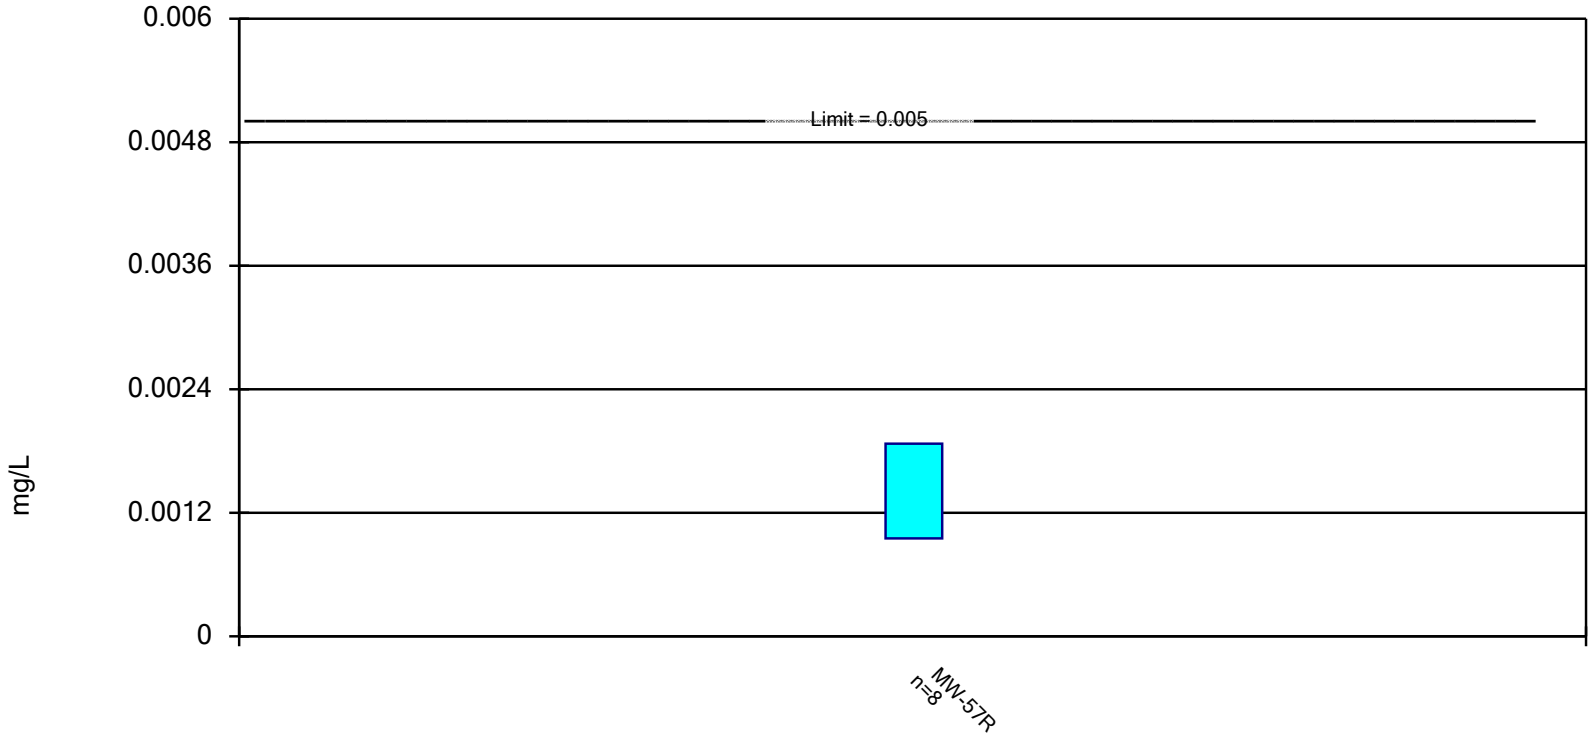


Constituent: Benzene Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

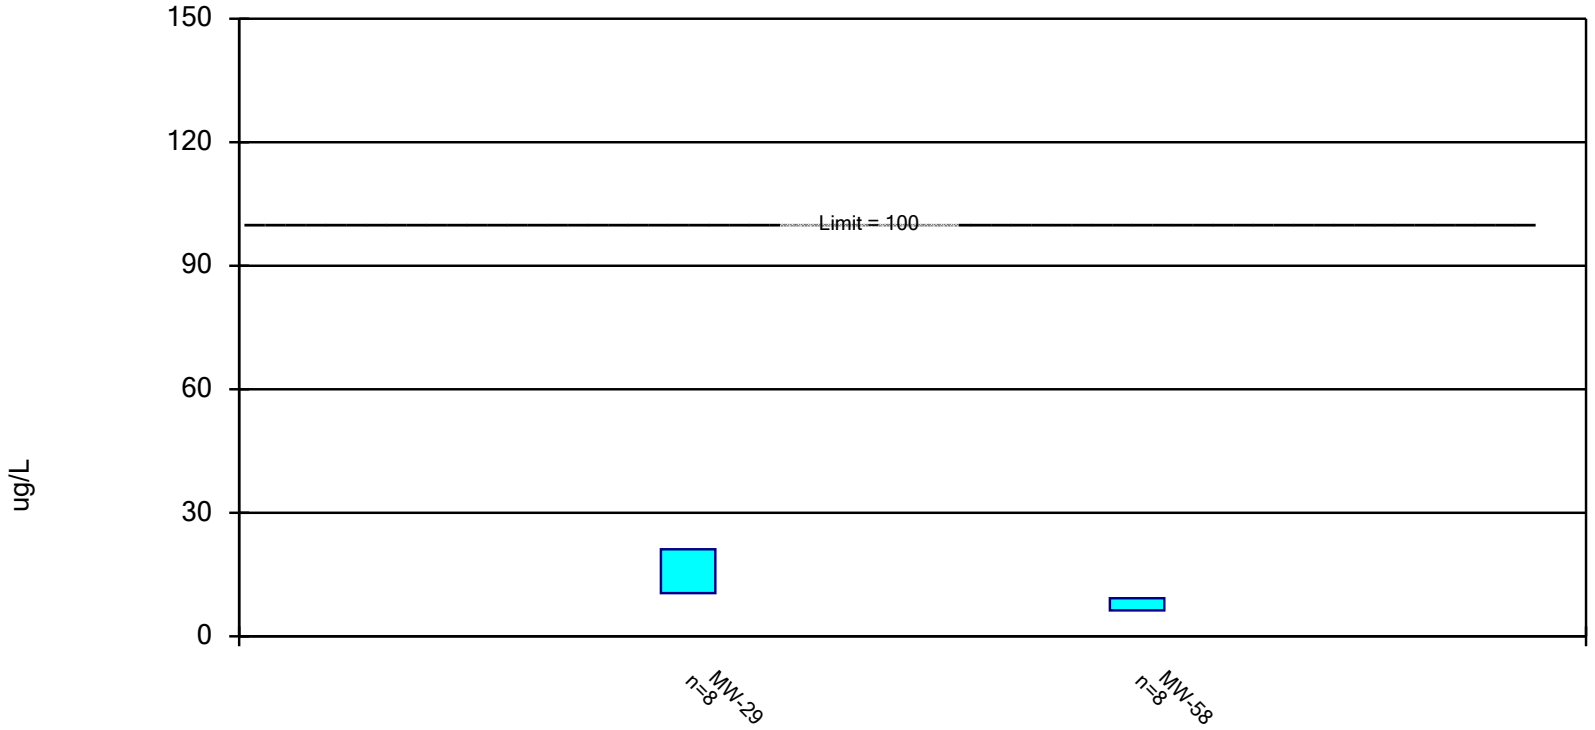


Constituent: Cadmium Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

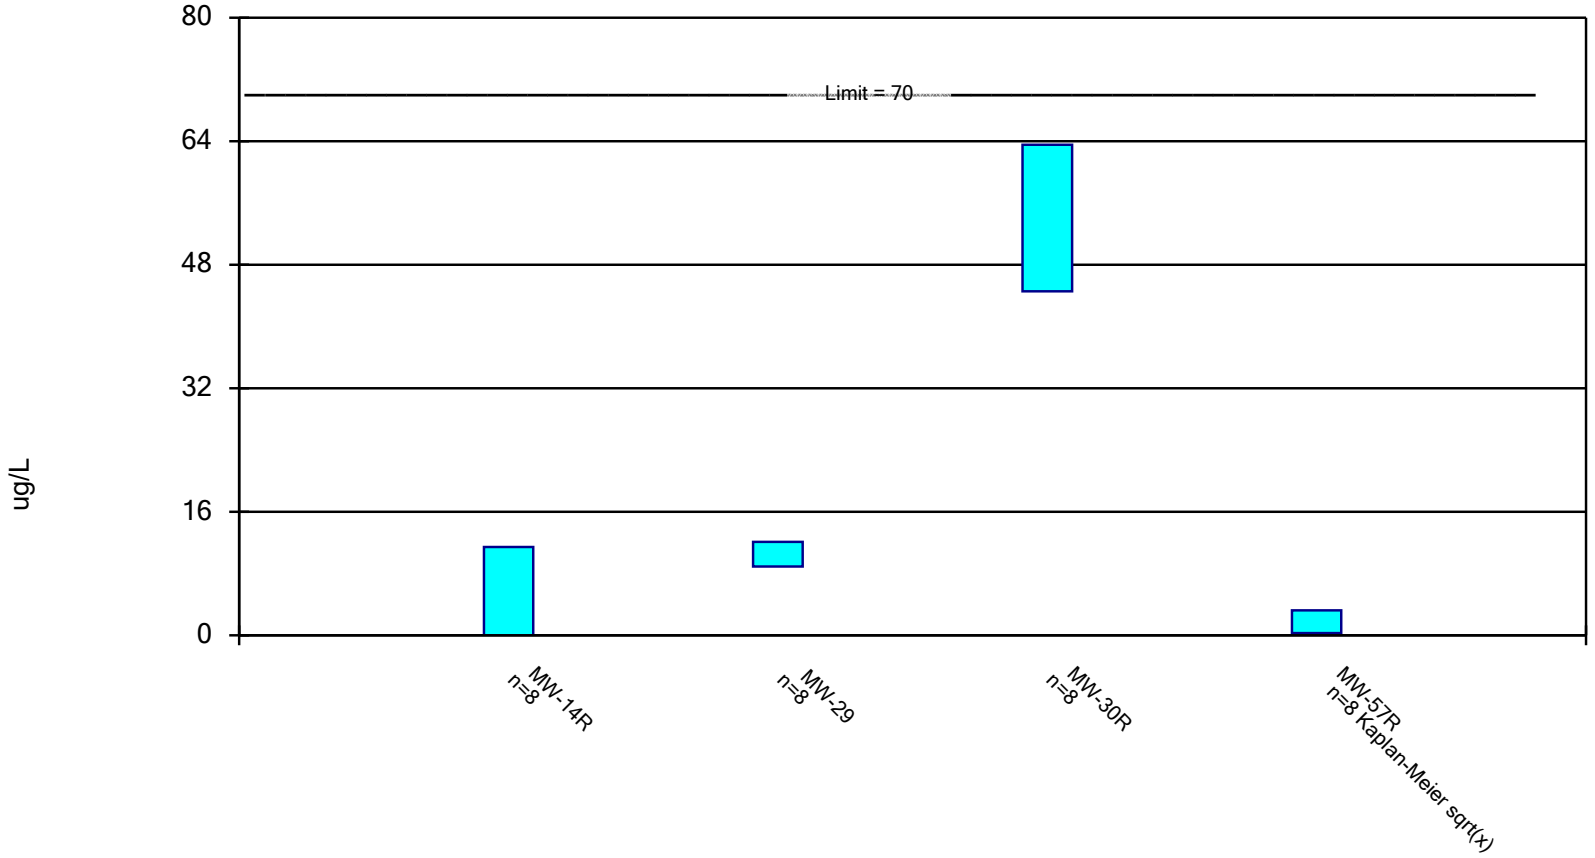


Constituent: Chlorobenzene Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

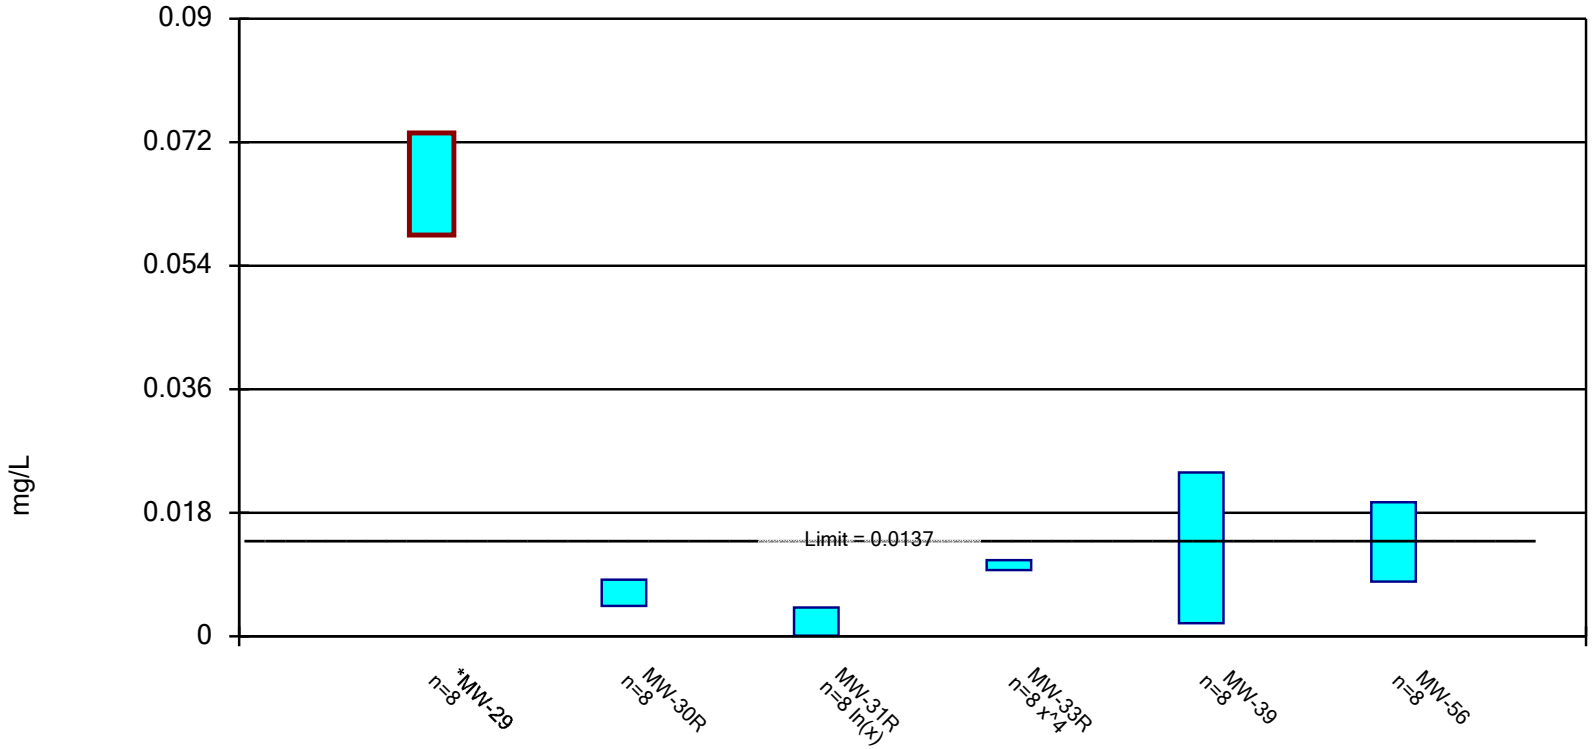


Constituent: cis-1,2-Dichloroethene Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance limit is exceeded.* Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

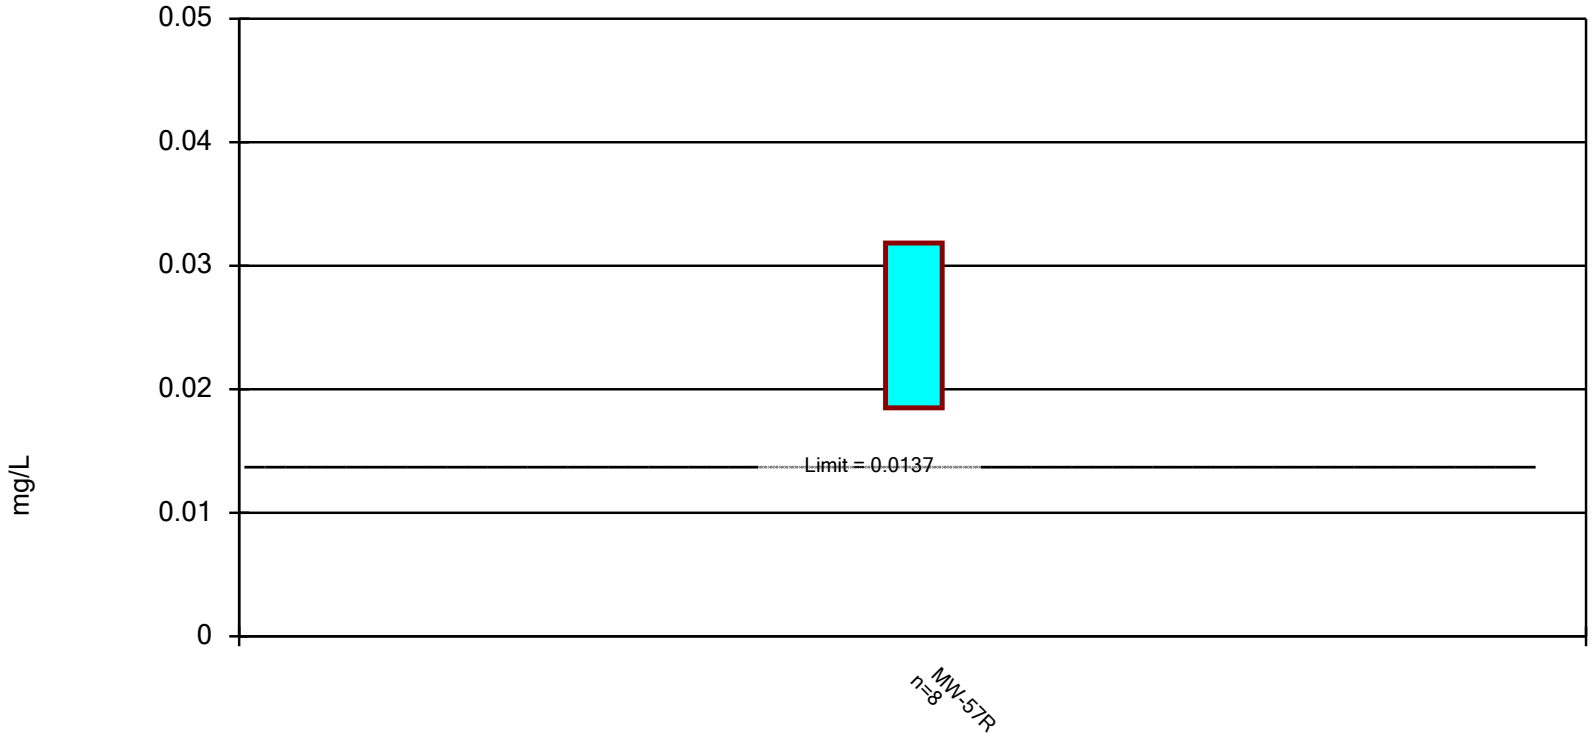


Constituent: Cobalt Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance limit is exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

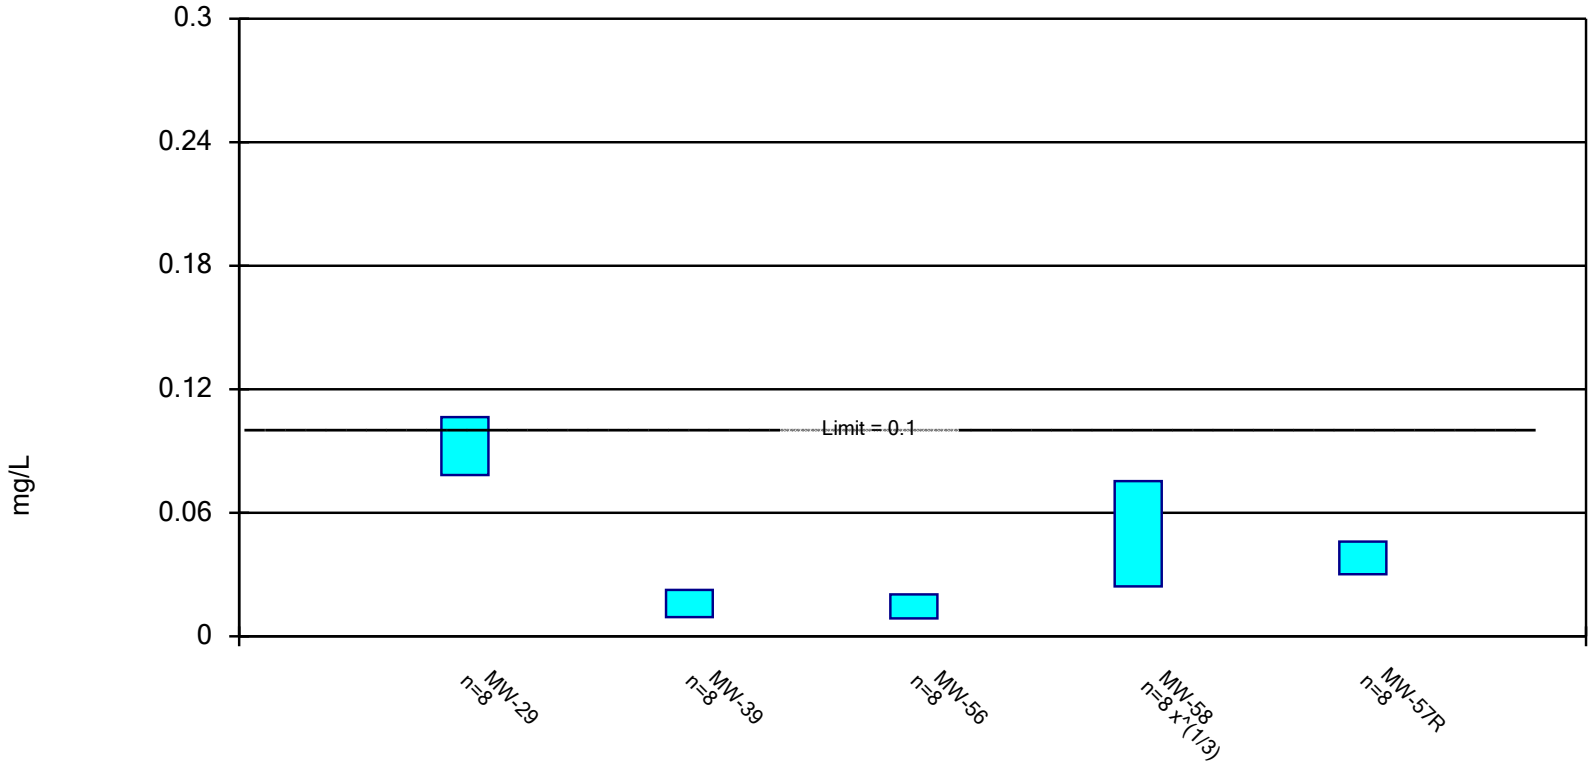


Constituent: Cobalt Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

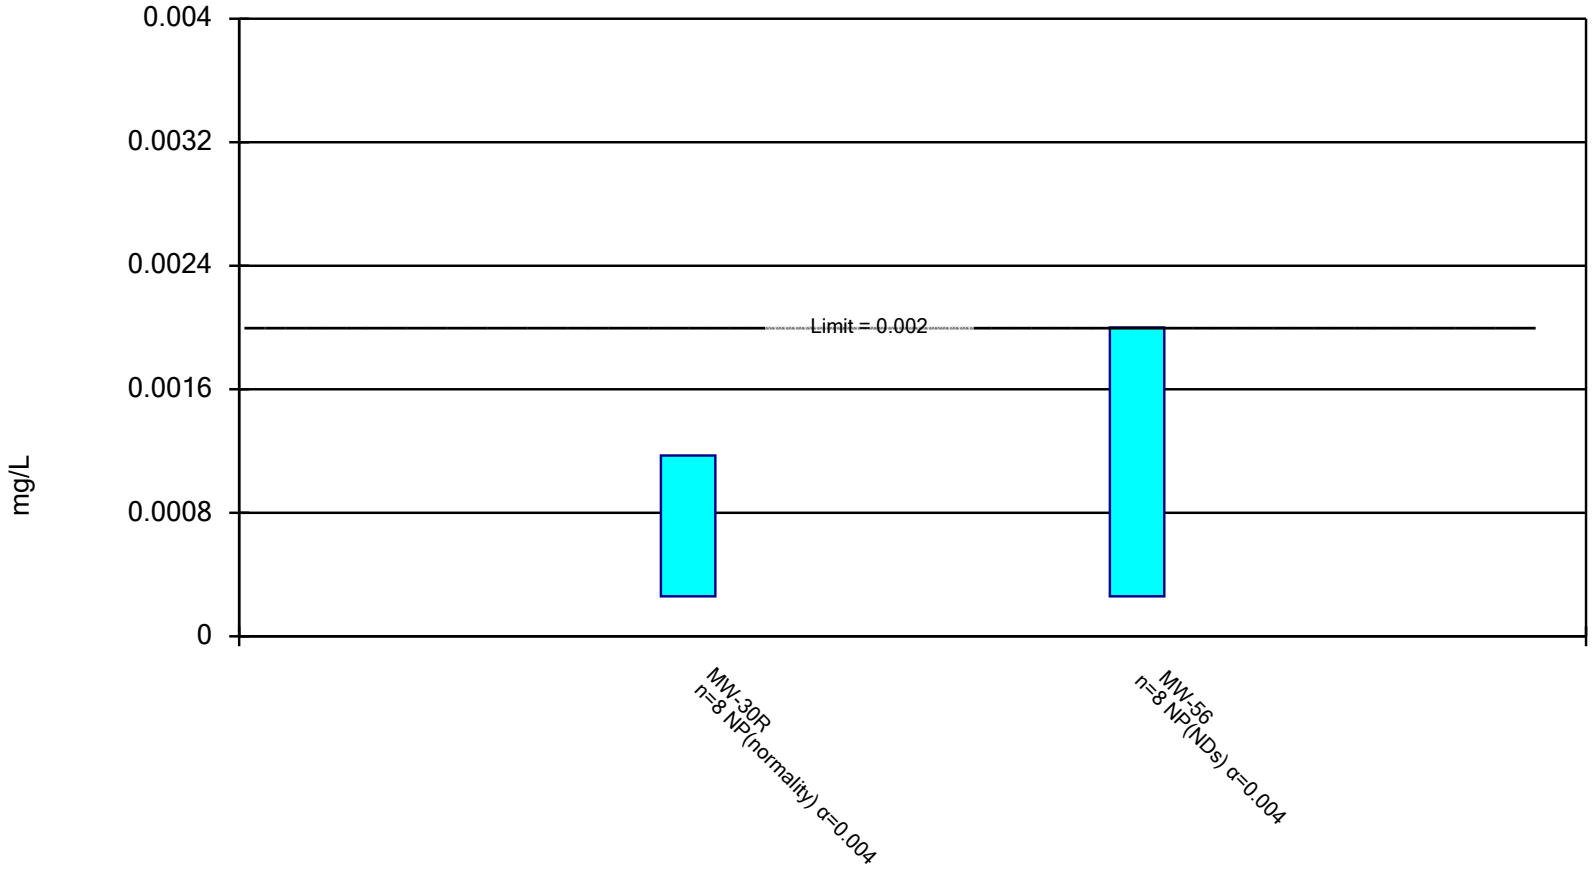


Constituent: Nickel Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Non-Parametric Confidence Interval

Compliance Limit is not exceeded.

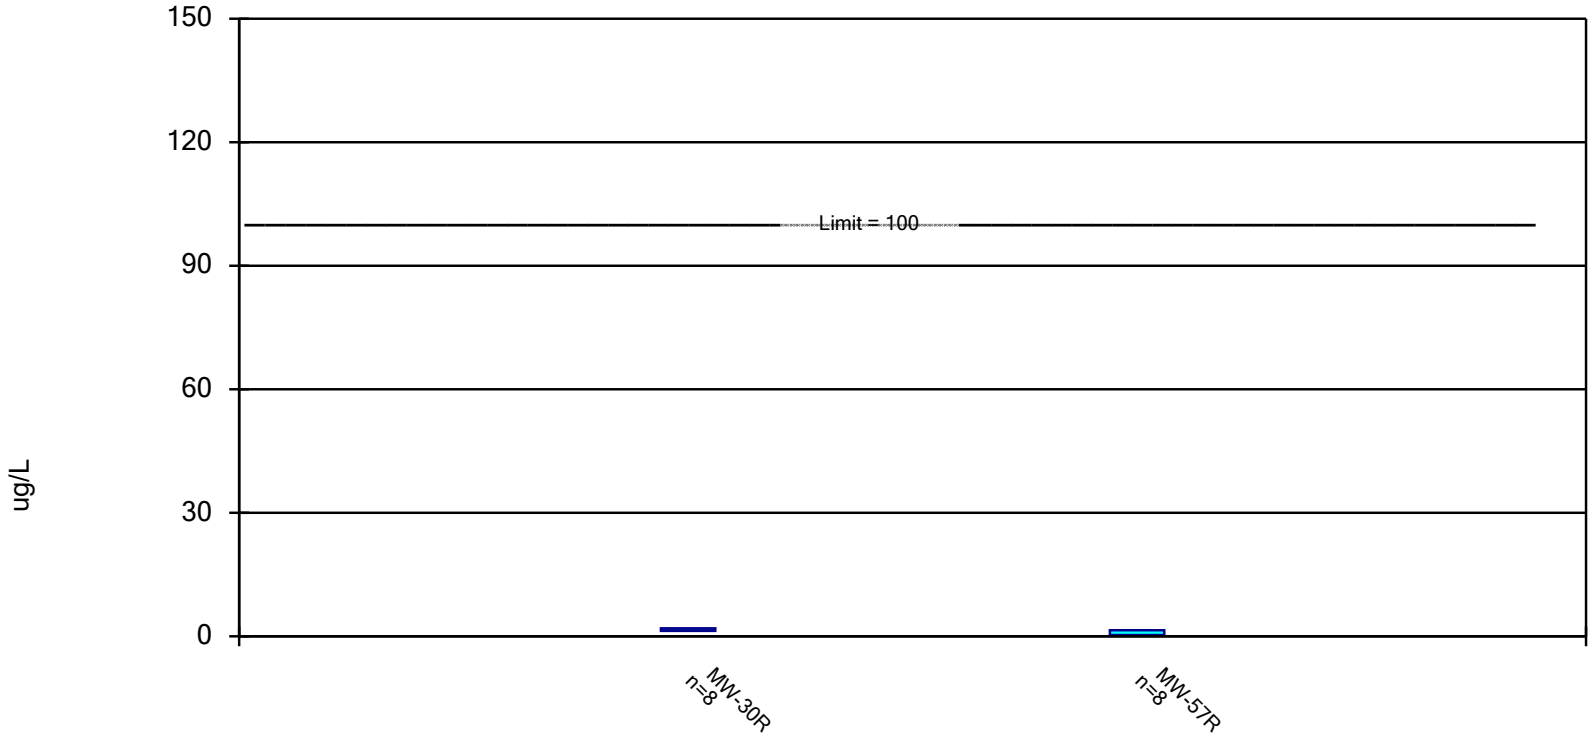


Constituent: Thallium Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

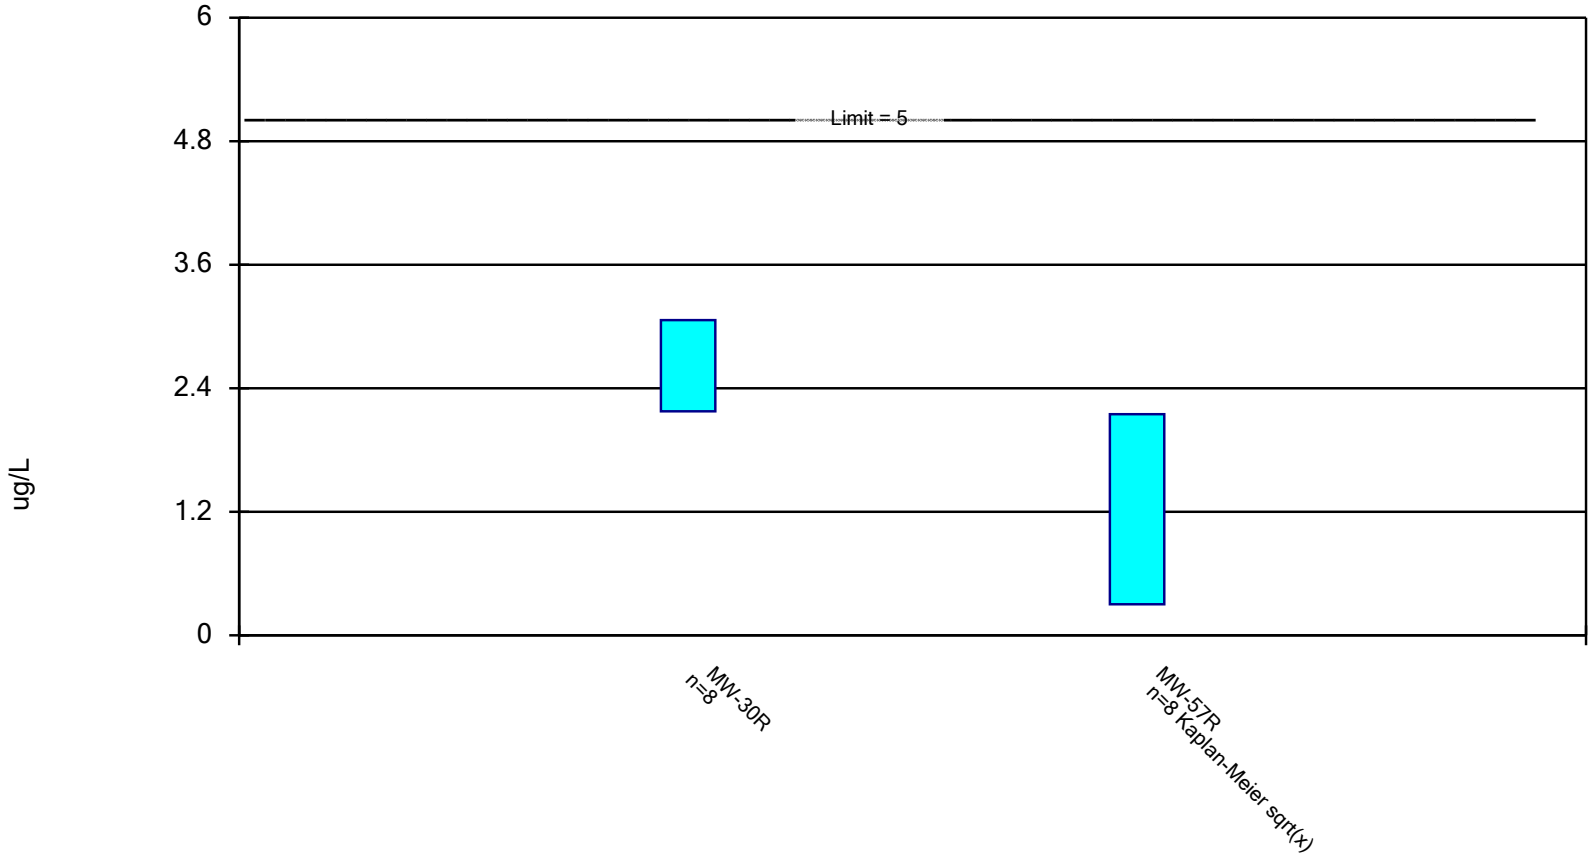


Constituent: trans-1,2-Dichloroethene Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance Limit is not exceeded. Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.

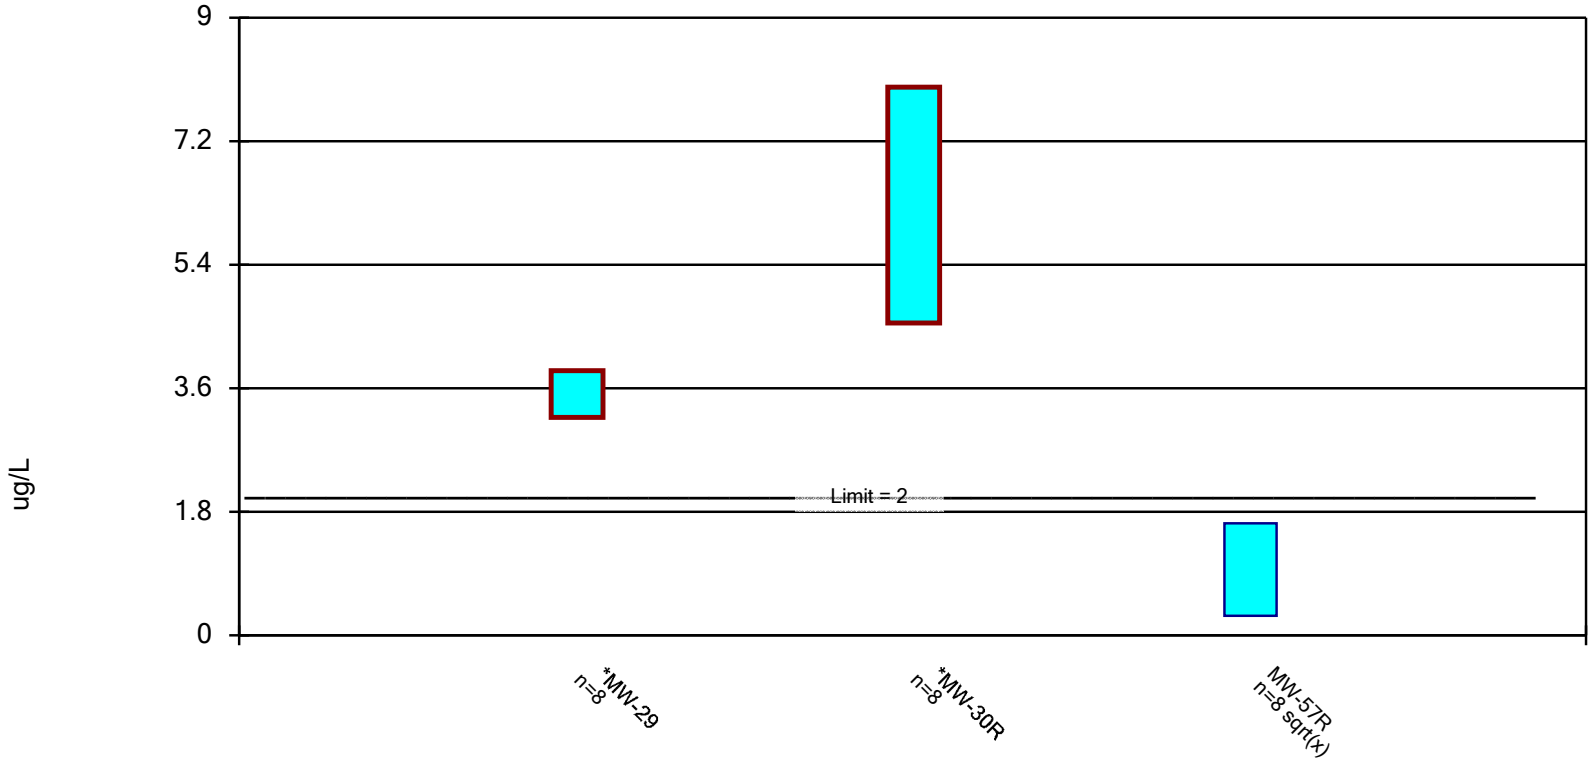


Constituent: Trichloroethene Analysis Run 12/9/2024 4:26 PM View: 5_CIs

Metro Park East LF Data: MPE Phase I Database

Parametric Confidence Interval

Compliance limit is exceeded.* Per-well alpha = 0.01. Normality Test: Shapiro Wilk, alpha based on n.



Constituent: Vinyl Chloride Analysis Run 12/9/2024 4:26 PM View: 5_CIs

1 Introduction

The purpose of this Corrective Action Groundwater Monitoring Program (CAMP) report is to evaluate the effectiveness and performance of the selected corrective action remedy at the Metro Waste Authority (MWA) Metro Park East (MPE) Landfill as required by IAC 567-113.10(9)"a"(I). An Assessment of Corrective Measures (ACM) report was approved as Permit Amendment #12, issued by Iowa Department of Natural Resources (IDNR) on January 15, 2013 (Doc #75705). MWA submitted the Selection of Remedy on May 20, 2013 (Doc #77010). The CAMP, dated July 2014 (Doc #80628), was approved in Permit Amendment #26 dated January 26, 2015 (Doc #82285) and implemented in June 2015. CAMP sampling for this reporting period occurred in October 2024 and is summarized in the **2024 Annual Water Quality Report (AWQR)**. The parameters that are monitored in accordance with the CAMP are listed in **Table 1**.

Table 1: CAMP Sampling Parameters

Monitoring Point	Monitoring Program	Annual Parameters
MW-14R	Assessment/CAMP	Total Organic Carbon; TSS
MW-29	Corrective Action/CAMP	Total Organic Carbon; TSS
MW-30R	Corrective Action/CAMP	Total Organic Carbon; TSS
MW-31R	Assessment/CAMP	Total Organic Carbon; TSS
MW-32R	Assessment/CAMP	Total Organic Carbon; TSS
MW-33R	Assessment/CAMP	Total Organic Carbon; TSS
MW-52(1)	WLO	-
MW-53(1)	WLO	-
MW-54(1)	WLO	-
MW-57R	Corrective Action/CAMP	Total Organic Carbon; TSS
MW-58	Assessment/CAMP	Total Organic Carbon; TSS
MW-62	CAMP	Arsenic; TSS
MW-68	CAMP	TSS; PCE; TCE; 1,1-DCE; cis-1,2-DCE; trans-1,2-DCE; 1,2-DCA; VC
MW-69	CAMP	TSS; PCE; TCE; 1,1-DCE; cis-1,2-DCE; trans-1,2-DCE; 1,2-DCA; VC
MW-70	CAMP	Total Organic Carbon; TSS; Arsenic; PCE; TCE; 1,1-DCE; cis-1,2-DCE; trans-1,2-DCE; 1,2-DCA; VC; Benzene
MW-73	CAMP	Total Organic Carbon; TSS
PZ-13	CAMP	Total Organic Carbon; PCE; TCE; 1,1-DCE; cis-1,2-DCE; trans-1,2-DCE; 1,2-DCA; VC; Arsenic, Cobalt
SW-101	Voluntary/CAMP	Arsenic; Cobalt; TSS
SW-102	Voluntary/CAMP	Arsenic; Cobalt; TSS
SW-103	Voluntary/CAMP	Arsenic; Cobalt; TSS
SW-106	Voluntary/CAMP	Arsenic; Cobalt; TSS
SW-107	Voluntary/CAMP	Arsenic; Cobalt; TSS

Notes:

TSS = Total Suspended Solids *TCE = Trichloroethene* *DCA = Dichloroethane*
PCE: Tetrachloroethene *DCE = Dichloroethene* *VC = Vinyl Chloride*

(1) Per Iowa Department of Natural Resources' comment letter dated May 31, 2024, monitoring wells MW-50, MW-51, MW-52, MW-53, and MW-54 were converted to water level only (WLO) gauging monitoring points and are no longer sampled.

The wells included in the CAMP report are sampled annually. MW-57R and MW-73 were installed in May 2020 and were sampled semiannually until eight samples were collected. Beginning with the October 2024 sampling event, MW-57R and MW-73 are sampled on an annual basis.

The data evaluations listed in the CAMP are used to measure and track the Site's progress toward achieving the remedy completion criteria and evaluate whether adjustments to the selected remedy or monitoring program should be implemented. The general focus of the CAMP evaluations is to determine the stability of the organic plume to ascertain whether the corrective action process is on track.

2 CAMP Evaluation

The CAMP evaluation includes the following assessments to monitor the direction and magnitude of concentration changes of various organic and inorganic constituents:

- Analysis of recent and longer-term trends to determine whether a data set from a given well-constituent pair exhibits an increasing trend, a decreasing trend, or no trend (i.e., stable) (see **Attachments 1 and 2**).
- Calculating the coefficient of variation for non-trending (i.e., stable) data sets to confirm stability of a given well-constituent pair (see **Attachment 3**).
- Sen's Slope statistical analysis to review statistically significant level (SSL) exceedances, which were identified in the 2024 annual statistical analysis reported in the 2024 AWQR.
- Cross-sectional time series graphs to assess concentrations along a sequence of monitoring wells for organic constituents in the south and northwest areas (see **Attachment 4**). Historically, a cross-sectional time series graph was constructed for monitoring wells along the east side of the Phase I unit. However, based on an IDNR comment letter dated May 31, 2024, monitoring wells MW-50, MW-51, MW-52, MW-53, and MW-54 were converted to water level only gauging monitoring points and are no longer sampled.
- Preparation of concentration maps for SSL constituents to visualize the spatial distribution of concentrations.
- Evaluation of source control measures by comparing landfill gas and leachate collection activities to the groundwater quality.
- Determination of surface water conditions by comparing data collected at sampling points located upstream and downstream of the Site.

The organic contaminants of concern (COCs), as listed in the July 2014 MPE Landfill Phase I MSWLF Unit CAMP, include 1,2-Dibromo-3-Chloropropane (dibromochloropropane), tetrachloroethene (PCE), trichloroethene (TCE), 1,1-Dichloroethene (1,1-DCE), cis-1,2-Dichloroethene (cis-1,2-DCE), trans-1,2-Dichlorethene (trans-1,2-DCE), 1,2-Dichloroethane (1,2-DCA), and vinyl chloride (VC).

2.1 Recent and Long-Term Trend Evaluations

Mann-Kendall statistical trend tests were used to evaluate recent and long-term trends for organic constituents. The statistical tests were completed using Sanitas® v10.0.15 (Sanitas Technologies) software. Mann-Kendall trend evaluations assess whether a data set from a well-constituent pair exhibits an increasing trend, decreasing trend, or no trend (i.e., stable) at a given statistical confidence interval. The Mann-Kendall test can be used for non-parametric data sets where data is not normally distributed.

The Mann-Kendall trend tests were constructed using the eight most recent sampling events for the recent trend evaluations. Longer-term trends were evaluated using the sixteen most recent sampling events. Trend testing was performed using both 95% confidence ($\alpha = 0.05$) and 98% confidence ($\alpha = 0.02$). The results of the 98% confidence trend tests were used to evaluate whether the increasing or decreasing trends were significant. The results of the 95% confidence trend tests were used to identify data sets that may exhibit significant trends at the 98% confidence level in the future.

The 98% confidence trend tests are summarized in **Table 2** by percentage. Monitoring points were designated as south or northwest areas, as listed in the CAMP. Mann-Kendall trend analysis summary tables for the recent and longer-term timeframes are included in **Attachments 1 and 2.**

Table 2: Summary of Mann-Kendall Trend Testing at 98% Confidence

Well	Recent Trends			Trends Analyzed	Longer-Term Trends			Trends Analyzed
	Increasing	Stable	Decreasing		Increasing	Stable	Decreasing	
South Area								
MW-14R	25%	75%	0%	8	25%	75%	0%	8
MW-29	0%	79%	21%	19	5%	74%	21%	19
MW-30R	0%	100%	0%	11	0%	64%	36%	11
MW-31R	0%	100%	0%	4	25%	75%	0%	4
MW-32R	0%	100%	0%	1	0%	100%	0%	1
MW-33R	0%	100%	0%	5	0%	80%	20%	5
MW-39	0%	100%	0%	2	0%	50%	50%	2
MW-55	0%	100%	0%	4	0%	75%	25%	4
MW-68	0%	100%	0%	3	0%	100%	0%	3
MW-69	0%	80%	20%	5	0%	80%	20%	5
Northwest Area								
MW-28	0%	100%	0%	1	0%	100%	0%	1
MW-56	0%	100%	0%	9	11%	78%	11%	9
MW-57R	9%	91%	0%	11	9%	91%	0%	11
MW-58	0%	100%	0%	7	29%	57%	14%	7
MW-73	0%	100%	0%	1	0%	100%	0%	1

Most well-constituent pairs evaluated were stable in the 98% recent trend analysis (most recent 8 sampling events), except for the following:

- Increasing trend:
  - 1,1-DCA at MW-14R
  - cis-1,2-DCE at MW-14R
  - VC at MW-57R
- Decreasing trend:
  - Barium at MW-29
  - cis-1,2-DCE at MW-69
  - Nickel at MW-29
  - trans-1,2-DCE at MW-29
  - TCE at MW-29

For longer-term trends, most of the well-constituent pairs were either stable or decreasing. This indicates generally improving water quality. The well-constituent pairs that indicated an increasing longer-term trend include the following:

- 1,1-DCA at MW-14R
- Arsenic at MW-31R, MW-56, and MW-58
- Benzene at MW-58
- Chlorobenzene at MW-29
- cis-1,2-DCE at MW-14R
- VC at MW-57R

2.2 Coefficient of Variation Evaluation

One limitation of the Mann-Kendall trend analysis is that a lack of statistically significant trend does not necessarily indicate concentrations at the monitoring point are stable. For example, data sets with high variation can limit the use of the Mann-Kendall trend analysis. Furthermore, changes in laboratory reporting limits over time could also artificially introduce variation into the data set. Coefficients of variation (COV), which is the standard deviation divided by the mean, can be used to further evaluate the stability of constituent concentrations at a given well. If the COV is less than or equal to one following a stable Mann-Kendall trend result, the well-constituent pair is considered stable. The eight to ten most recent sampling events were used to calculate COV. The eight to ten most recent sampling events occurred during the period from 2017 through 2024.

Of the 92 data sets identified in the recent 98% confidence trend test, 84 were stable. Four well-constituent pairs that had stable trends had COVs greater than one (see **Attachment 3**). The following well-constituent pairs had a COV greater than one and a stable trend:

- Acetone at MW-56
- Arsenic at MW-31R
- Cobalt at MW-31R

- VC at MW-14R

Acetone at MW-56 has been less than laboratory reporting limits with the exceptions of samples collected during the 2019 and 2020 annual monitoring events. Acetone can be a common laboratory contaminant and may not be indicative of impact from the site.

Arsenic and cobalt at MW-31R had either non-detect or J-flags for several of the most recent sampling events with variable laboratory reporting limits. The primary purpose of the CAMP is to evaluate the organic plume, and arsenic and cobalt are inorganic constituents. Arsenic and cobalt concentrations distributed across the Site are shown in **Figure 1** and **Figure 3**.

VC at MW-14R had either non-detect or J-flags for several of the most recent sampling events. Overall, it appears the organic impact associated with the Phase I MSWLF unit is stable or declining.

2.3 Sen's Slope Evaluation for SSLs

Several SSLs were identified in the HMSP monitoring network during the 2024 reporting period, as noted in the Site's 2024 AWQR. An SSL is identified when the lower limit of a calculated confidence interval is greater than the Groundwater Protection Standard (GWPS). The following organic SSLs were identified during the 2024 statistical analysis:

- MW-29: VC
- MW-30R: VC

SSLs for inorganic constituents were also identified:

- MW-29: Cobalt
- MW-30R: Arsenic
- MW-57R: Cobalt
- MW-58: Arsenic

Sen's Slope tests were used to evaluate SSLs for organic constituents to assess whether there are significant trends over the eight most recent sampling points. **Table 3** shows the average concentration of the four most recent samples and the Sen's slope value of the eight most recent samples.

Table 3: Sen's Slope Summary

Well	Constituent	Average Concentration of Four Most Recent Samples (µg/L)	Sen's Slope Value of Eight Most Recent Sampling Events (µg/L/year)
MW-29	Vinyl Chloride	3.57	0.008315
MW-30R	Vinyl Chloride	6.91	0.03517

Notes:
µg/L – micrograms per liter

None of the trends identified were significant at the 98% confidence level for the short-term trends (eight most recent events) and the long-term trends (16 most recent events).

2.4 Cross-Sectional Time Series Graphs

Cross-sectional time series graphs were prepared to assess concentrations of organic constituents in the south and northwest area wells. The graphs are intended to illustrate the organic plume and changes in concentrations over time. The graphs show concentrations of organic constituents since 2016 and are included in **Attachment 4**.

2.4.1 South Area

The south area monitoring wells include MW-14R, MW-29, MW-30R, MW-31R, MW-32R, MW-33R, MW-39, MW-55, MW-68, MW-69, and PZ-13. The constituents of interest (COIs) for the south area include 1,1-DCA, 1,4-dichlorobenzene, benzene, chlorobenzene, cis-1,2-DCE, trans-1,2-DCE, TCE, and VC.

In general, the detections from the 2024 sampling event appear to be consistent with historical data with the exception of benzene at monitoring well MW-68 and TCE at monitoring well MW-14R. Benzene at monitoring well MW-68 has increased in concentration and is approaching the GWPS (5 micrograms per liter [µg/L]). For TCE at monitoring well MW-14R, the constituent appeared to have an increasing trend prior to the October 2024 annual monitoring event. For the October 2024 annual sampling event, TCE was below laboratory reporting limits in the groundwater sample collected from MW-14R. With the exception of 1,1-DCA and cis-1,2-DCE, volatile organic compound concentrations are generally lower in monitoring well MW-14R when compared with the other south area wells. Monitoring well MW-14R is the furthest downgradient well and serves as the end of the evaluated flow path. Historically, lower VOC concentrations have been measured in monitoring well MW-14R relative to monitoring wells MW-29, MW-30R, MW-68, and MW-69. This likely demonstrates reductive dechlorination of chlorinated VOCs is occurring on the south side of the Phase I MSWLF unit. However, increasing trends are observed at monitoring well MW-14R for 1,1-DCA and cis-1,2-DCE concentrations. This may indicate the efficiency of reductive dechlorination is being reduced. Further monitoring of 1,1-DCA, cis-1,2-DCE, and respective biodegradation products should be conducted to determine the efficiency of reductive dechlorination in the south area of the site.

2.4.2 East Area

Since monitoring wells MW-50, MW-51, MW-52, MW-53, and MW-54 were converted to water level only gauging monitoring points, the east monitoring area is no longer assessed. Since the east side is not on the downgradient side of the Phase I unit and is situated between the Phase I and Phase II units, further sampling of these monitoring wells was not recommended. IDNR concurred with the recommendation to cease groundwater sampling at these wells in a letter dated May 31, 2024. Since groundwater sampling has ceased in the east area of Phase I, assessment of implemented corrective measures will cease as well. A cross-sectional time series of select organic compounds was not included in this report.

2.4.3 Northwest Area

The northwest area monitoring wells include MW-28, MW-56, MW-57R, MW-58 and MW-73. Monitoring wells MW-20, MW-21, and MW-57 were used to monitor the northwest area in the past but were abandoned during construction of the Northwest Constructed Wetlands.

Six organic constituents, benzene, chlorobenzene, cis-1,2-DCE, trans-1,2-DCE, TCE, and VC were evaluated. The benzene (MW-56, MW-57R, and MW-58) and chlorobenzene (MW-58) concentrations demonstrate short-term fluctuations but are generally consistent with historical data. For cis-1,2-DCE, trans-1,2-DCE, TCE, and VC at MW-57R, concentrations on the time-series graphs depict a relatively rapid increase. A statistically significant increasing trend was identified in the short-term (eight most recent events) for VC at monitoring well MW-57R. Monitoring well MW-73 is downgradient relative to MW-57R. Recent concentrations of cis-1,2-DCE, trans-1,2-DCE, TCE, and VC at monitoring well MW-73 have been below laboratory reporting limits. Though there were observed increases at monitoring well MW-57R, elevated concentrations of these constituents have not been observed in samples collected from monitoring well MW-73. This would indicate monitored organic constituents are not moving downgradient and offsite.

2.5 Concentration Maps

Concentration maps were developed for arsenic, benzene, cobalt, and VC to show changes in concentration over the Site (**Figures 1 through 4**).

2.5.1 Arsenic (Figure 1)

SSLs for arsenic were identified at monitoring wells MW-30R and MW-58 during the 2024 statistical analysis. This is consistent with historical SSLs. No new SSLs for arsenic were identified during the 2024 sampling event. The arsenic concentrations to the northwest and west of the Phase I MSWLF unit are bracketed onsite based on concentrations at MW-18, MW-19, MW-28, MW-57R, MW-60, and MW-73. In the south area, the elevated arsenic concentrations are bracketed onsite based on MW-31R, MW-32R, MW-39, MW-55, MW-62, and PZ-13. The seven monitoring wells with recent arsenic concentrations consistently measured above the GWPS (0.01 milligrams per liter [mg/L]) include MW-29, MW-30R, MW-33R, MW-56, and MW-58. These wells are surrounded by monitoring wells with low or non-detect arsenic concentrations, which is indicative of bracketing onsite. MWA will continue to monitor to see if elevated arsenic concentrations are detected in the bracketing wells over time.

2.5.2 Benzene (Figure 2)

An SSL for benzene was not identified during the 2024 statistical analysis. Historically, benzene was identified at a SSL in monitoring well MW-53. However, with the conversion of monitoring well MW-53 to a water level gauging only well, there are no current SSLs identified for benzene in compliance monitoring wells on the downgradient edge of the Phase I unit. For the 2024 annual monitoring event, each measured benzene concentration in groundwater was below the GWPS of 5 µg/L. MWA will continue to monitor to see if benzene concentrations are detected in the bracketing wells at the site.

2.5.3 Cobalt (Figure 3)

SSLs for cobalt were identified at monitoring wells MW-29 and MW-57R during the 2024 statistical analysis. A SSL for cobalt at monitoring well MW-29 has historically been observed. The 2024 annual monitoring event was the first compliance event after the background dataset was established for monitoring well MW-57R, which was installed in May 2020. Cobalt was historically detected at a SSL in decommissioned monitoring well MW-57. The cobalt statistical background standard calculated from upgradient monitoring well data is 0.00281 mg/L. However, due to high cobalt concentrations sitewide, a site-specific standard of 0.0137 mg/L has been established. Historical concentrations at PZ-13, which is downgradient of MW-29, have been either non-detect or estimated concentrations below the reporting limit (J-flagged). Concentrations measured at monitoring well MW-73, which is downgradient of MW-57R, are generally an order of magnitude lower than the values measured at MW-57R. This data suggests that elevated cobalt concentrations are bracketed in the downgradient area of the Site.

2.5.4 Vinyl Chloride (Figure 4)

SSLs for VC were identified at monitoring wells MW-29 and MW-30R during the 2024 statistical analysis. This is consistent with historical SSLs, and no new SSLs for VC were identified during the 2024 sampling event. VC concentrations in surrounding monitoring wells MW-14R, MW-31R, MW-32R, MW-33R, MW-39, MW-68, MW-69, MW-70, and PZ-13 have been either non-detect or estimated concentrations below the reporting limit (J-flagged) in recent years (since 2009), except for MW-69 (2021, 2023, and 2024) and MW-14R (2022 and 2023). This indicates VC concentrations appear to be bracketed onsite. The VC concentration measured in the groundwater sample at monitoring well MW-69 during the 2024 annual monitoring event was above the GWPS. VC will continue to be monitored at MW-14R and MW-69 to see whether the plume is changing over time.

2.6 Source Control Evaluation

Source control evaluation includes comparing the landfill gas and leachate collection activities to groundwater quality. Previous measurements suggested that leachate and subsurface gas migration have impacted groundwater at the Site. MWA maintains leachate and landfill gas collection systems in the Phase I MSWLF unit. A Leachate Control System Performance and Evaluation Report (LCSPER) and landfill gas summary will be submitted to IDNR with the Phase II AWQR. In addition to the landfill gas and leachate collection activities, source control actions have included the following:

- 1996: Previously unknown tile line was removed.
- 2003: Two leachate lines located under the Phase IA area were plugged.
- 2003: MWA explored an option to reduce the chlorinated hydrocarbon groundwater impact through a pilot test injection of Hydrogen Release Compound (HRC) in the vicinity of monitoring well MW-29.
- 2008-2009: Final cover was installed over the Phase I landfill, including a composite final cover with a geomembrane component over the south and southwest slopes.
- 2019: The Northwest Constructed Wetlands were constructed as a new specific source control to address subsurface gas migration.

Historically, there has been evidence of potential leachate impact in the south, east, and northwest CAMP areas. There has also been evidence of landfill gas impacts via subsurface migration to the east and northwest. However, the migration does not extend offsite and appears to be limited to the area immediately adjacent to the Phase I MSWLF unit.

Leachate and landfill gas are extracted by dual-extraction wells (DEWs) throughout the Site. Extracted volumes and leachate levels in the DEWs are monitored. Active extraction wells that operate near the designated CAMP areas are listed below. DEWs listed in bold font indicate wells that extract both leachate and landfill gas, and DEWs that are not bolded indicate that the wells extract leachate only. The status of pumping and extraction of individual DEWs may vary based on site operations.

South:

- **DEW-8R**
- DEW-9R08
- DEW-37R
- **DEW-39**
- **DEW-91**
- **DEW-94**
- DEW-98
- **DEW-100**
- **DEW-101**
- **DEW-102**
- **DEW-103**

- DEW-40R
- DEW-65R
- **DEW-67**
- **DEW-70**
- **DEW-71**
- **DEW-74**
- **DEW-90**
- DEW-97R
- **DEW-126**

Northwest:

- **DEW-2R**
- **DEW-3R**
- **DEW-4R**
- **DEW-7R**
- **DEW-14**
- **DEW-16**
- **DEW-23**
- **DEW-105**
- **DEW-106**

Landfill gas extraction wells (GEWs) GEW-77, GEW-78, GEW-79, GEW-80, GEW-81, GEW-82, GEW-84, GEW-85, and GEW-101 extract landfill gas near the South area.

Ongoing collection of groundwater data will be used to evaluate whether groundwater quality is improving in response to source control activities. Total organic carbon (TOC) concentrations will be evaluated to determine the extent of organic plume stability once sufficient data has been collected. MWA will periodically review leachate and landfill gas extraction activities and evaluate possible additional measures that could be implemented.

2.7 Surface Water Evaluation

Camp Creek surface water monitoring points are located both upstream (SW-101, SW-106, and SW-107) and downstream (SW-102 and SW-103) of the Phase I MSWLF unit. They are depicted on **Figure 3-1** of the Corrective Action Groundwater Monitoring Program (CAMP) report dated July 2014. The surface water sampling points were sampled for arsenic, cobalt,

and total suspended solids during the October 2024 sampling event The sampling results from the past seven years (2018-2024) are summarized in **Table 4**.

There is not a considerable difference in arsenic and cobalt concentrations between the upstream and downstream sampling locations. Most of the differences appear to be correlated with high total suspended solids (TSS), particularly in the April 2018 detections at SW-106 (1240 mg/L) and SW-102 (1490 mg/L) and in September 2023 detection at SW-103 (3900 mg/L). Higher concentrations of TSS tend to be associated with higher metal concentrations. It does not appear surface water is being impacted by the Phase I MSWLF unit.

Table 4: Surface Water Summary

Monitoring Point	Date	Arsenic (mg/L)	Cobalt (mg/L)	Total Suspended Solids (mg/L)
Upstream				
SW-101	4/3/2018	0.00128J	0.000437J	9.62

	10/10/2024	0.00140J	0.000342J	12.2

Notes:

mg/L = milligrams per liter

ND = Constituent was not detected above the laboratory reporting limit (RL).

NM = Constituent was not measured during the sampling event.

J = Value is above the laboratory's method detection limit (MDL) but below the RL and is therefore considered an estimated concentration.

3 Proposed Remedy End Date

The current estimated end date for completion of the remedy is June 3, 2038. The end date is evaluated annually based on the results of the analyses presented in the CAMP report. It is expected elevated metal concentrations are predominately caused by redox reactions brought about by organics present in the groundwater and biological activity alterations. Metal concentrations are not likely to decrease appreciably as long as organics are present in groundwater. The metal concentrations are expected to decrease as source control measures and natural attenuation reduce the concentrations of organic constituents in the groundwater. It is not recommended that the end date of the proposed remedy be changed at this time.

4 Summary

The CAMP evaluation includes several analyses to monitor the performance of the selected remedy. The following is a summary of the findings of the 2024 CAMP evaluation:

1. The recent trend analyses at the 98% confidence limit indicates most well-constituent pairs evaluated were stable. 84 out of the 92 trends evaluated were stable and 5 of the 92 trends evaluated were decreasing. There were 3 out of the 92 trends evaluated that were increasing (see **Attachment 1**).
2. The longer-term trend analysis at the 98% confidence limit indicated that approximately 9% of well-constituent pairs were increasing, 15% were decreasing, and 76% were stable (see **Attachment 2**). This is a lower percentage of decreasing trends compared to previous years. Well-constituent pairs that are considered stable increased in percentage when compared to previous years. The concentrations and trends will continue to be analyzed in the 2025 CAMP evaluation.
3. The COV evaluation indicates that most constituents are stable over the most recent eight samples.
4. Organic constituents identified as SSLs in 2024 are currently stable based on the short-term trends.
5. Concentration maps were updated for arsenic, cobalt, benzene, and VC.
6. Source control infrastructure in the form of leachate and landfill gas extraction systems has been installed in the Phase I MSWLF unit. Measurements suggest leachate has historically impacted groundwater quality and subsurface gas migration has impacted groundwater in the east and northwest areas of the Site. MWA has implemented measures to address the subsurface gas migration via completion of the Northwest Constructed Wetlands project in 2019.
7. Downstream surface water monitoring points exhibit similar arsenic and cobalt concentrations when compared to upstream monitoring points. It appears surface water is not being adversely impacted by the Phase I MSWLF unit.

5 Recommendations

Based on the CAMP evaluations prepared herein, the following items are recommended:

1. Continue CAMP groundwater sampling in accordance with **Table 1**.
2. Adjustment of the current remedy completion timeframe is not recommended at this point. The remedy completion date will remain June 3, 2038.

Hollow symbols indicate censored values.

Time Series

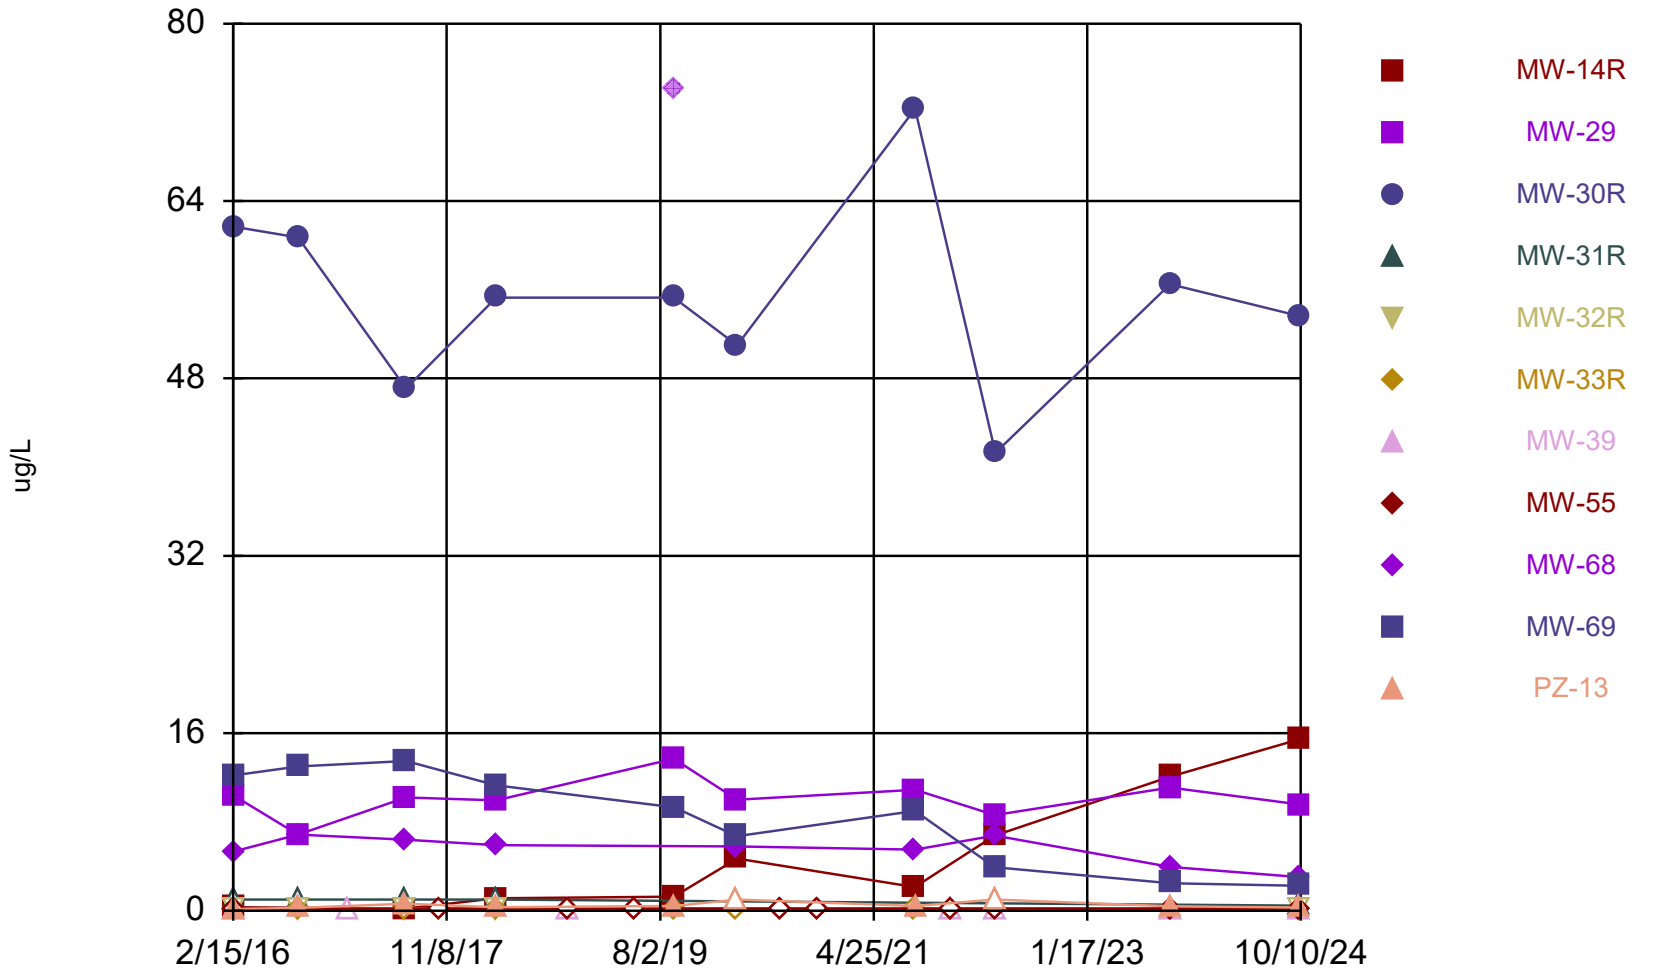
Constituent: Chlorobenzene Analysis Run 12/14/2024 3:04 PM View: South Area Cross-Sectional Time S

Metro Park East LF Data: MPE Phase I Database

Hollow symbols indicate censored values.

Time Series

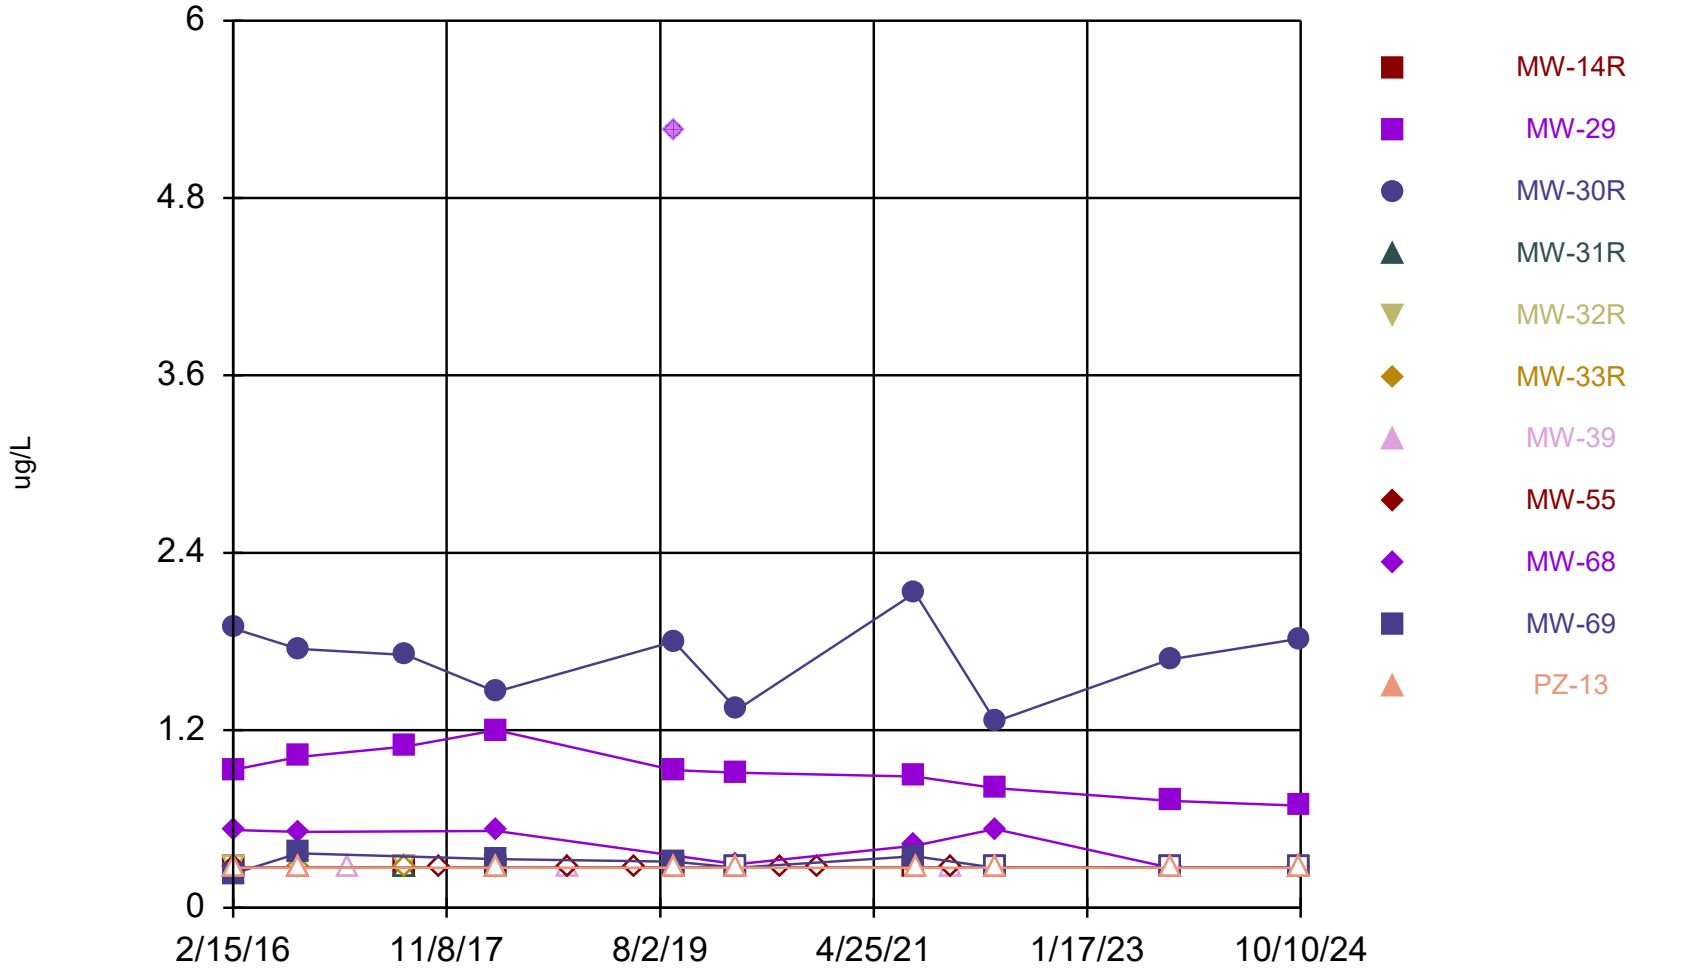


Constituent: cis-1,2-Dichloroethene Analysis Run 12/14/2024 3:04 PM View: South Area Cross-Sectional

Metro Park East LF Data: MPE Phase I Database

Hollow symbols indicate censored values.

Time Series

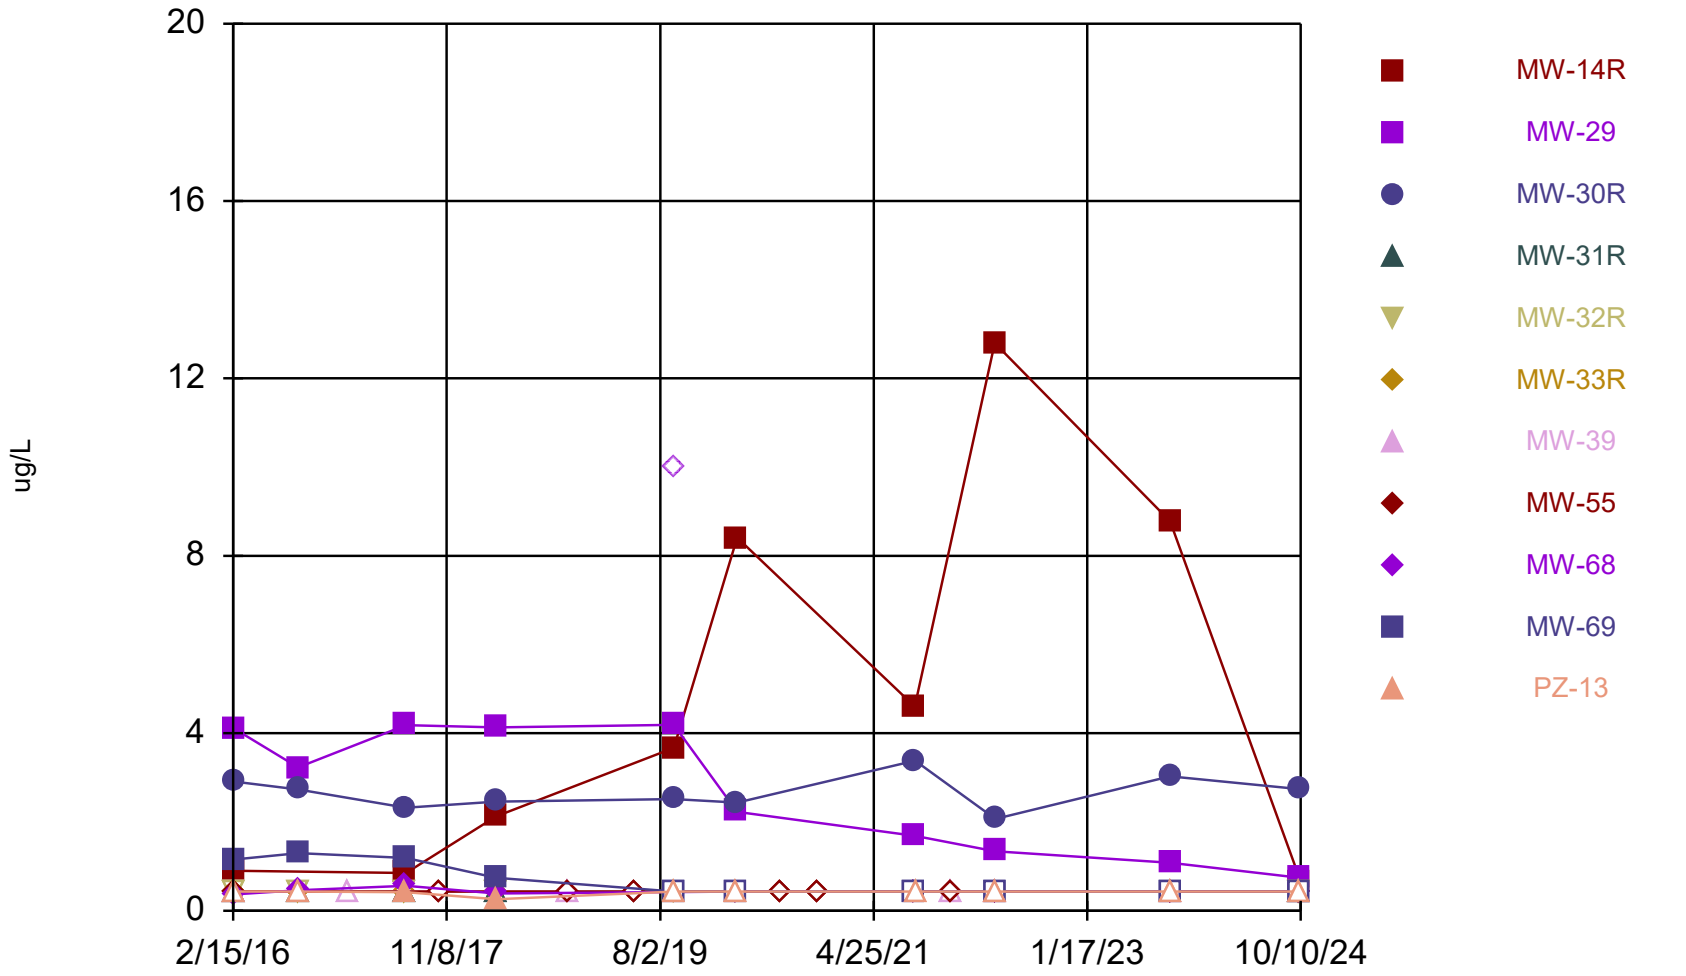


Constituent: trans-1,2-Dichloroethene Analysis Run 12/14/2024 3:04 PM View: South Area Cross-Section

Metro Park East LF Data: MPE Phase I Database

Hollow symbols indicate censored values.

Time Series

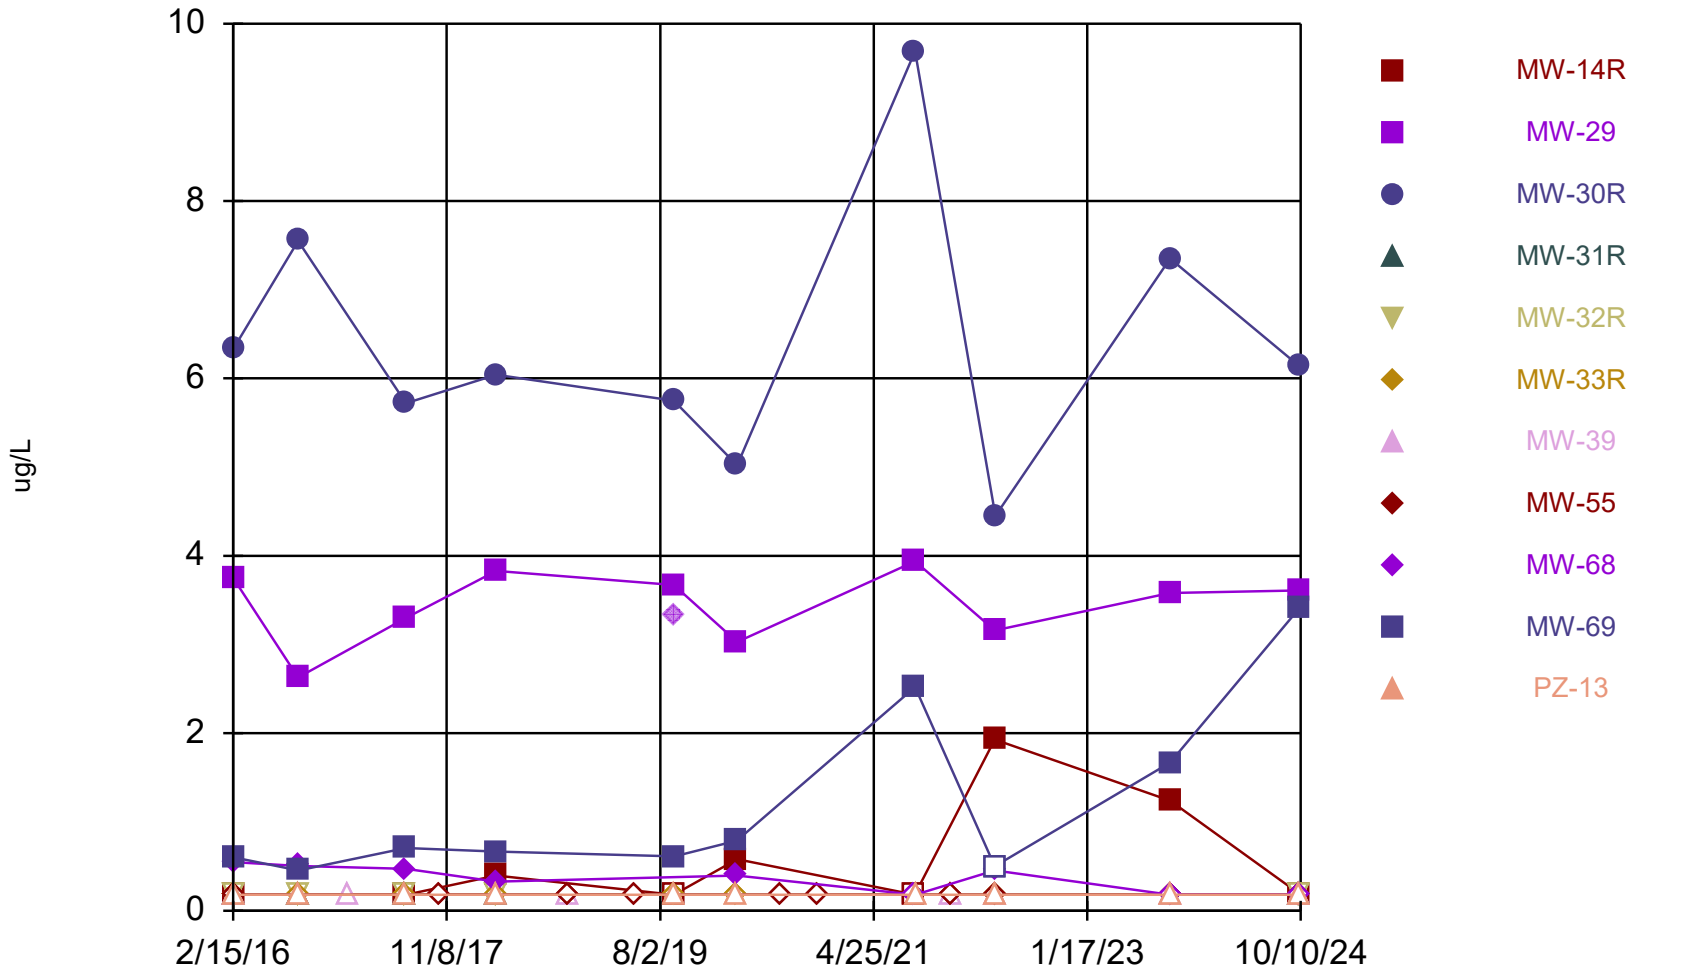


Constituent: Trichloroethene Analysis Run 12/14/2024 3:04 PM View: South Area Cross-Sectional Time S

Metro Park East LF Data: MPE Phase I Database

Hollow symbols indicate censored values.

Time Series



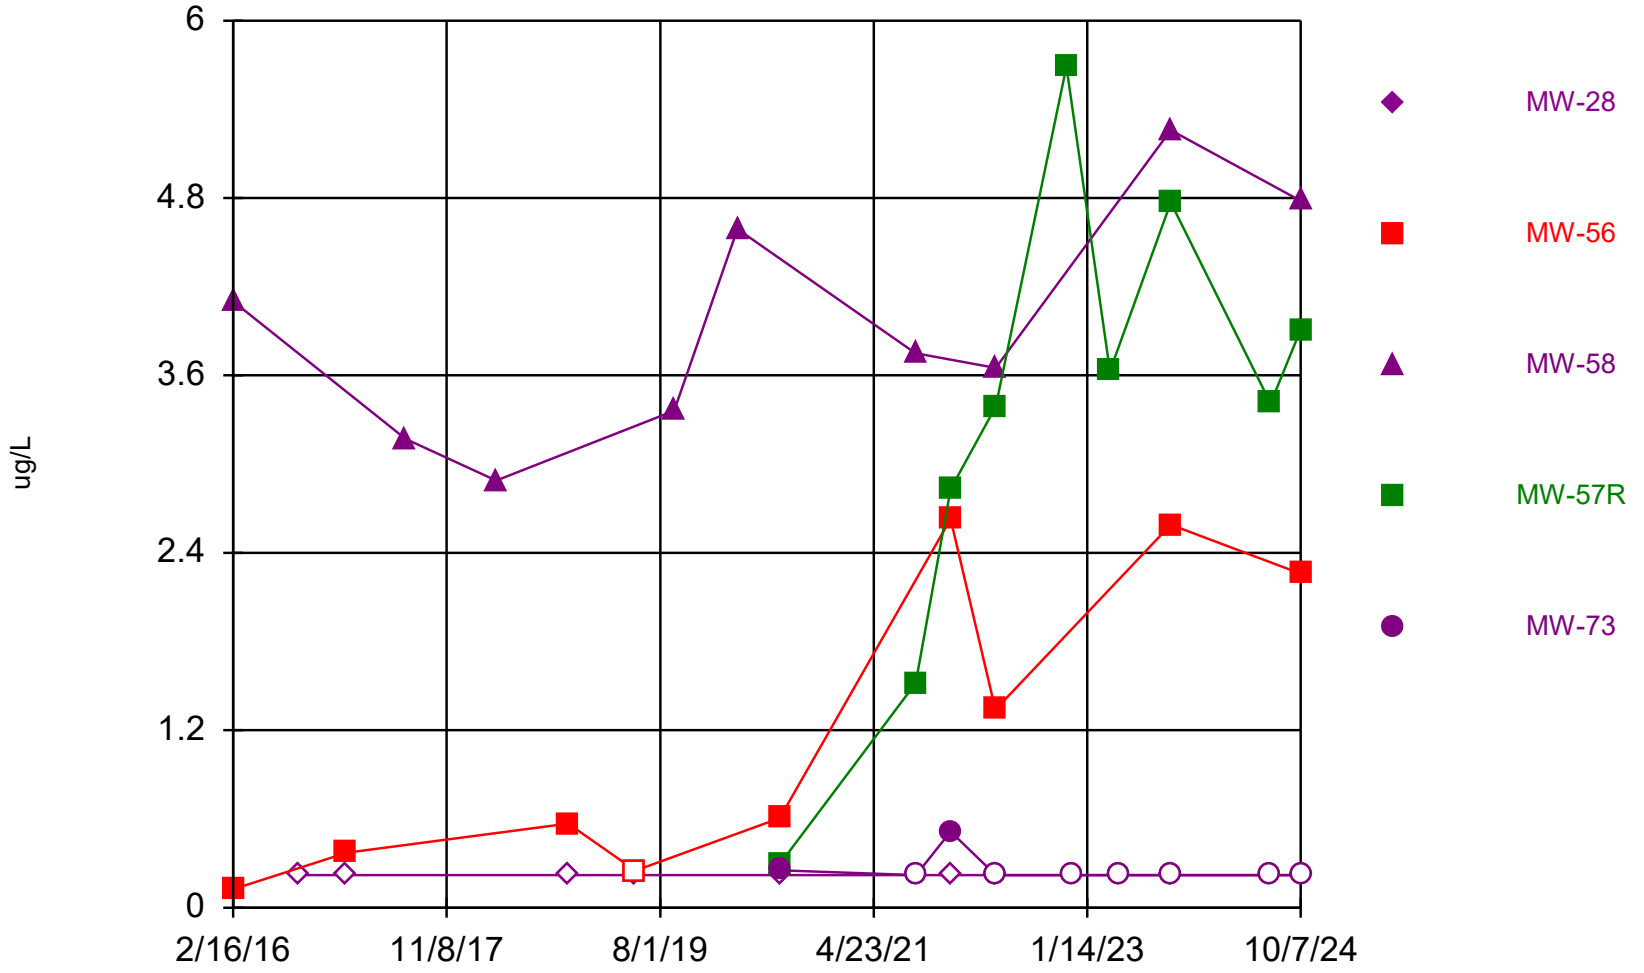
Constituent: Vinyl Chloride Analysis Run 12/14/2024 3:04 PM View: South Area Cross-Sectional Time Ser

Metro Park East LF Data: MPE Phase I Database

Northwest Area Cross-Sectional Time Series Graphs

Hollow symbols indicate censored values.

Time Series

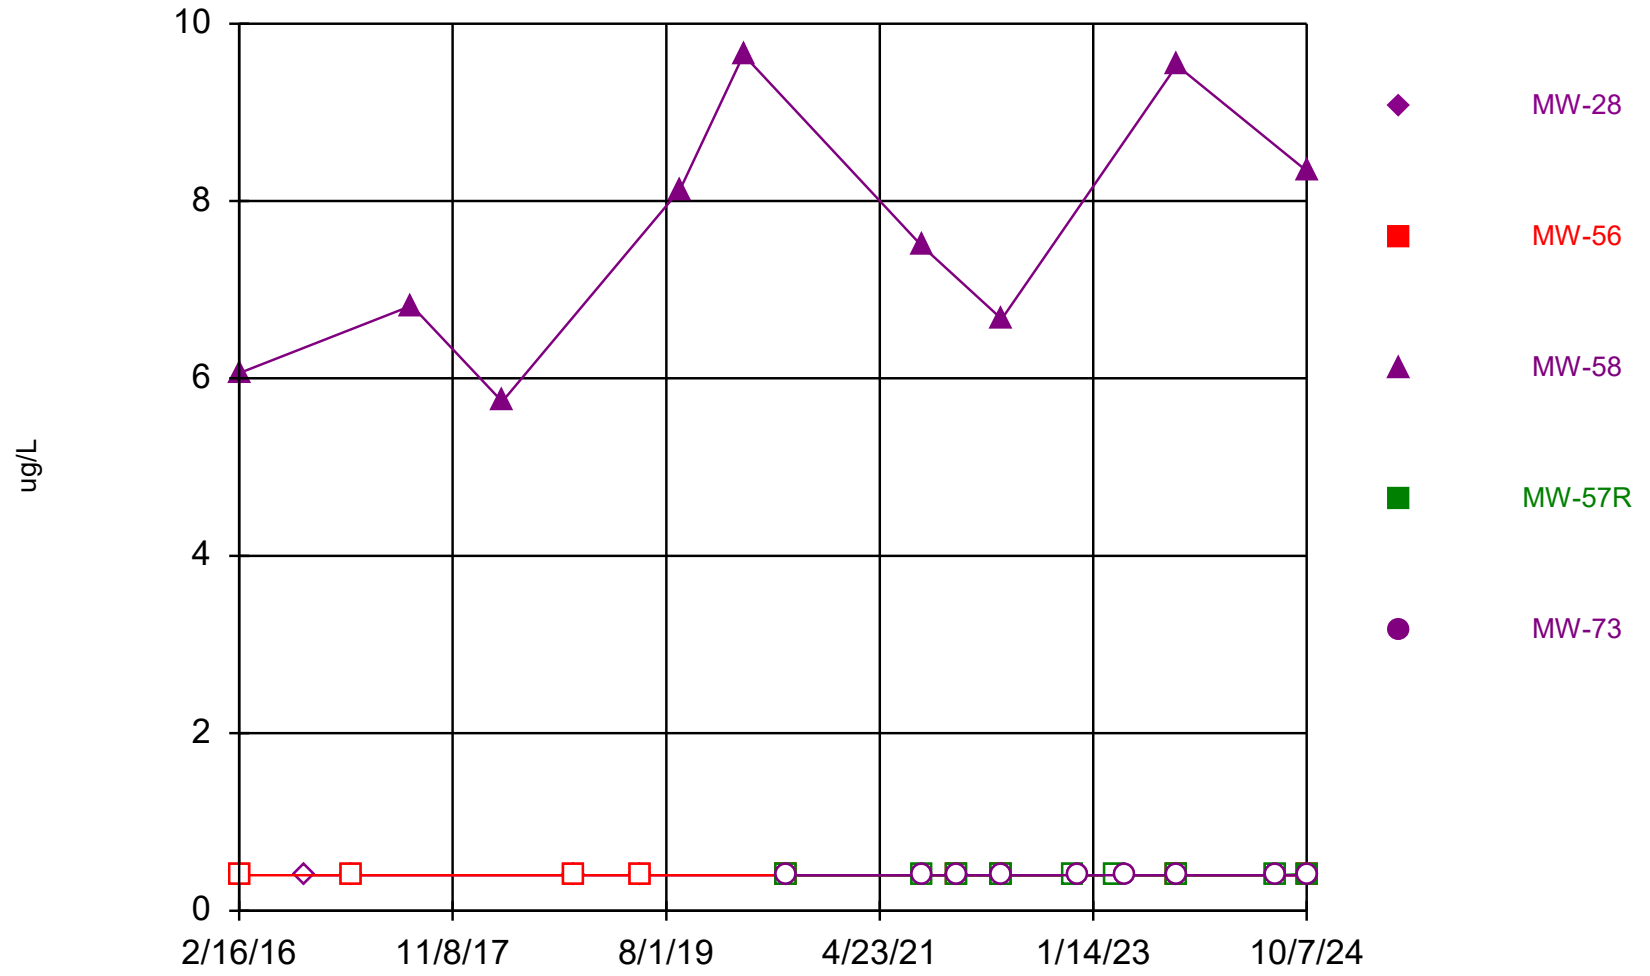


Constituent: Benzene Analysis Run 12/14/2024 3:02 PM View: Northwest Area Cross-Sectional Time Seri

Metro Park East LF Data: MPE Phase I Database

Hollow symbols indicate censored values.

Time Series

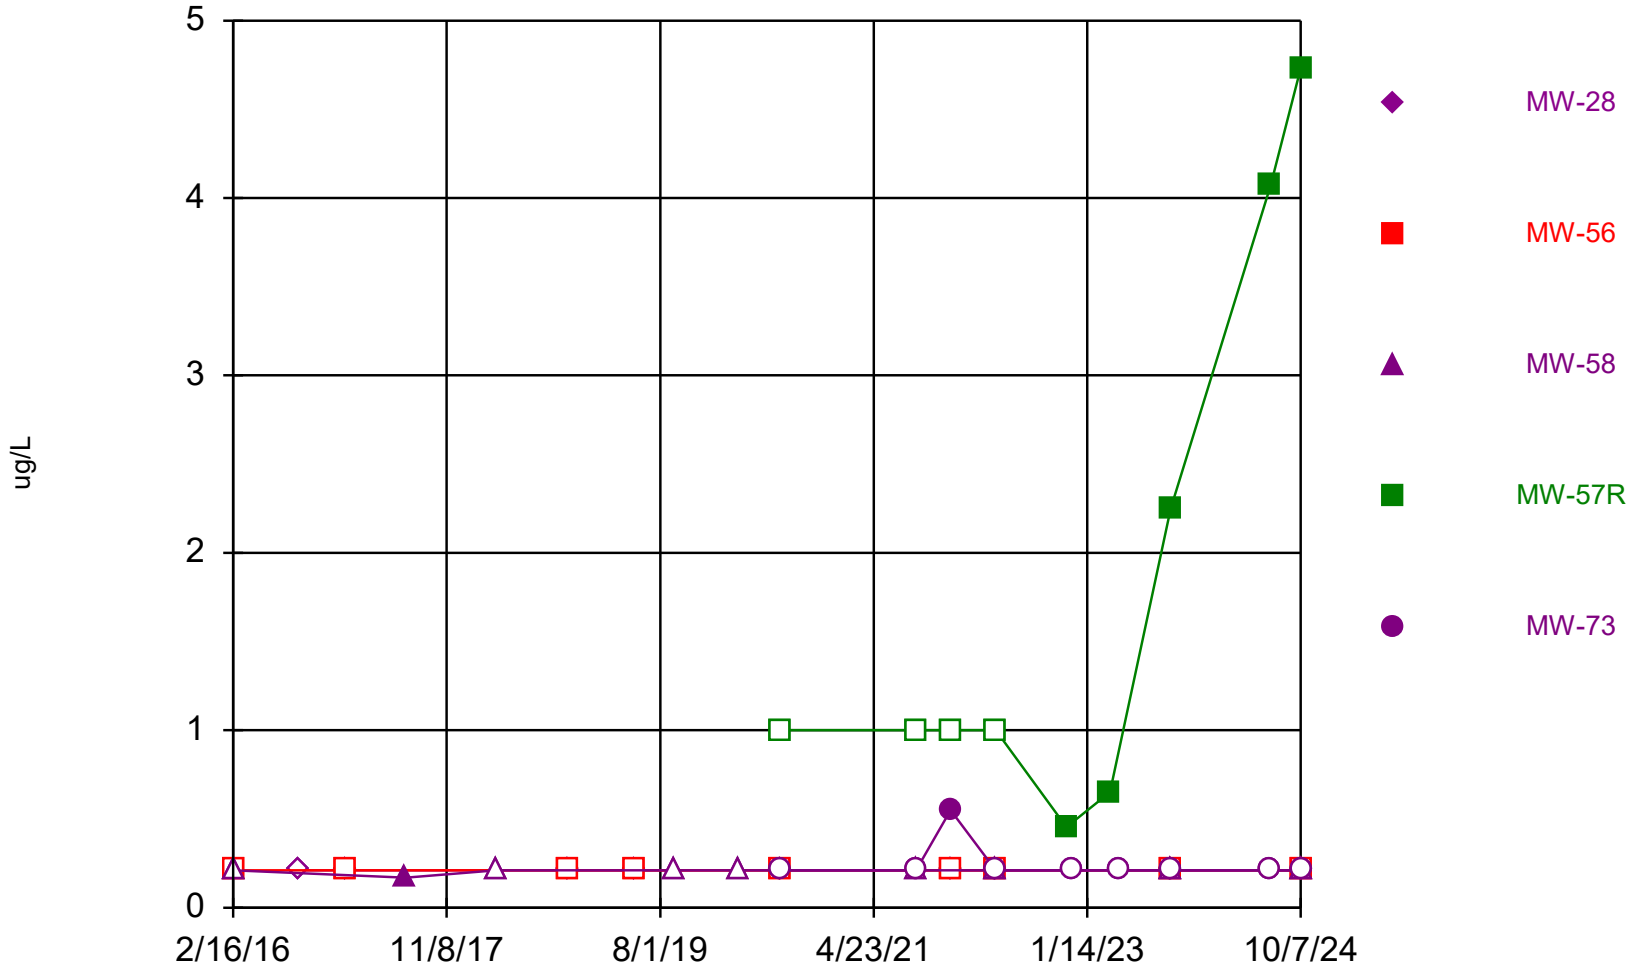


Constituent: Chlorobenzene Analysis Run 12/14/2024 3:02 PM View: Northwest Area Cross-Sectional Tim

Metro Park East LF Data: MPE Phase I Database

Hollow symbols indicate censored values.

Time Series

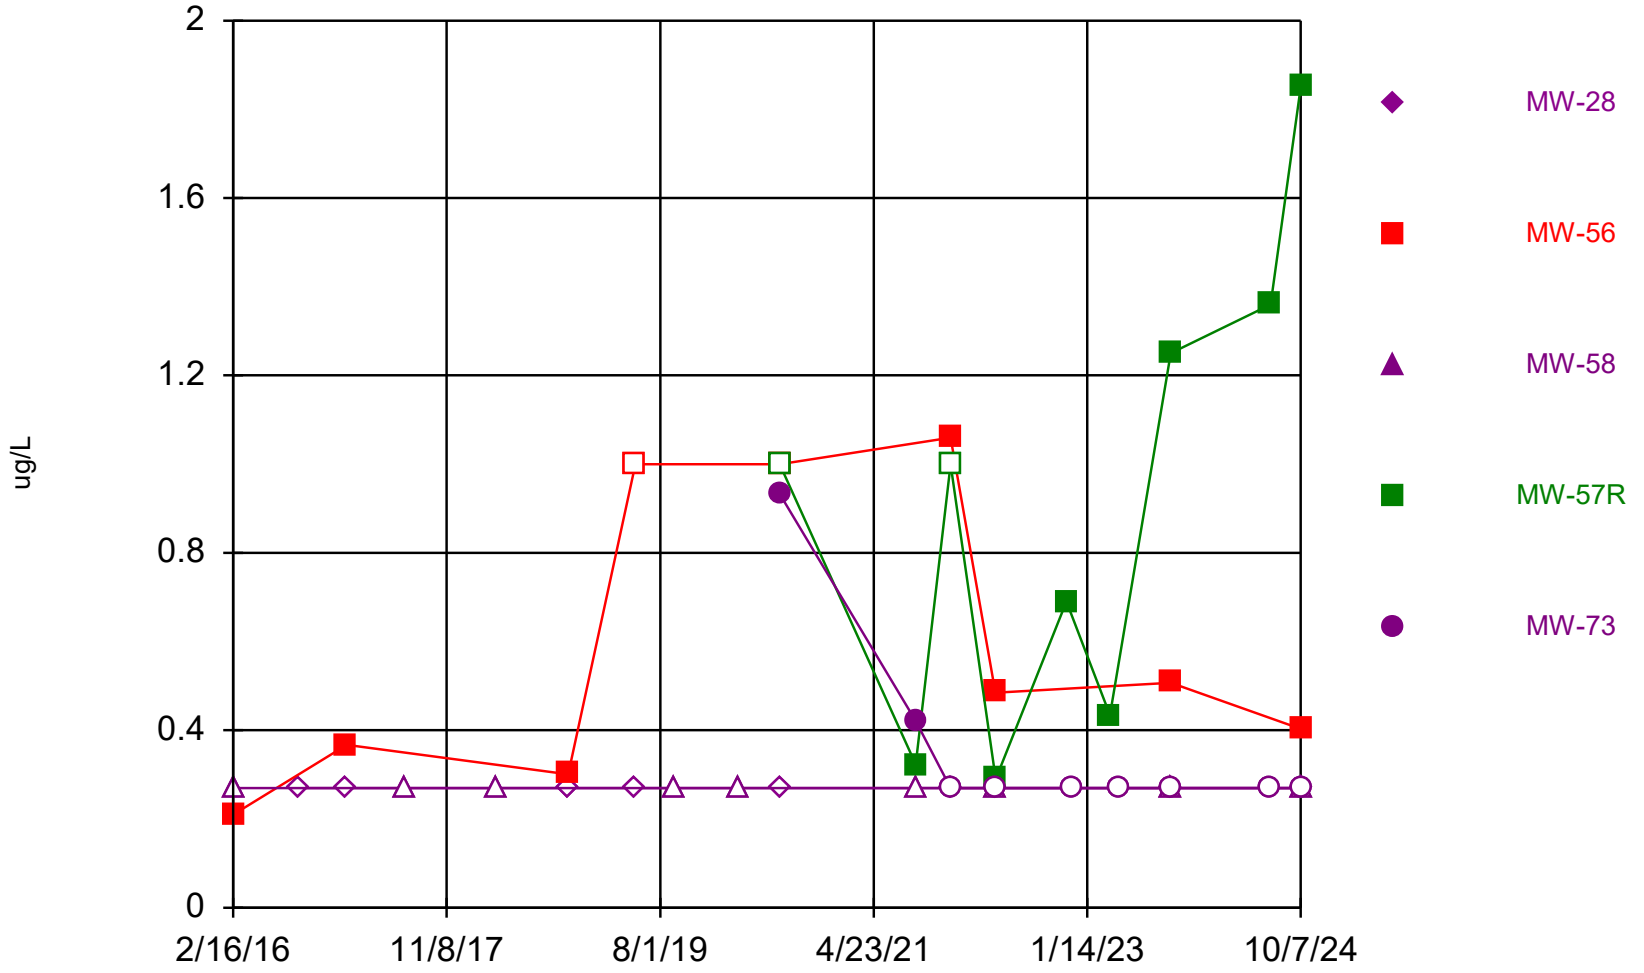


Constituent: cis-1,2-Dichloroethene Analysis Run 12/14/2024 3:02 PM View: Northwest Area Cross-Sectio

Metro Park East LF Data: MPE Phase I Database

Hollow symbols indicate censored values.

Time Series

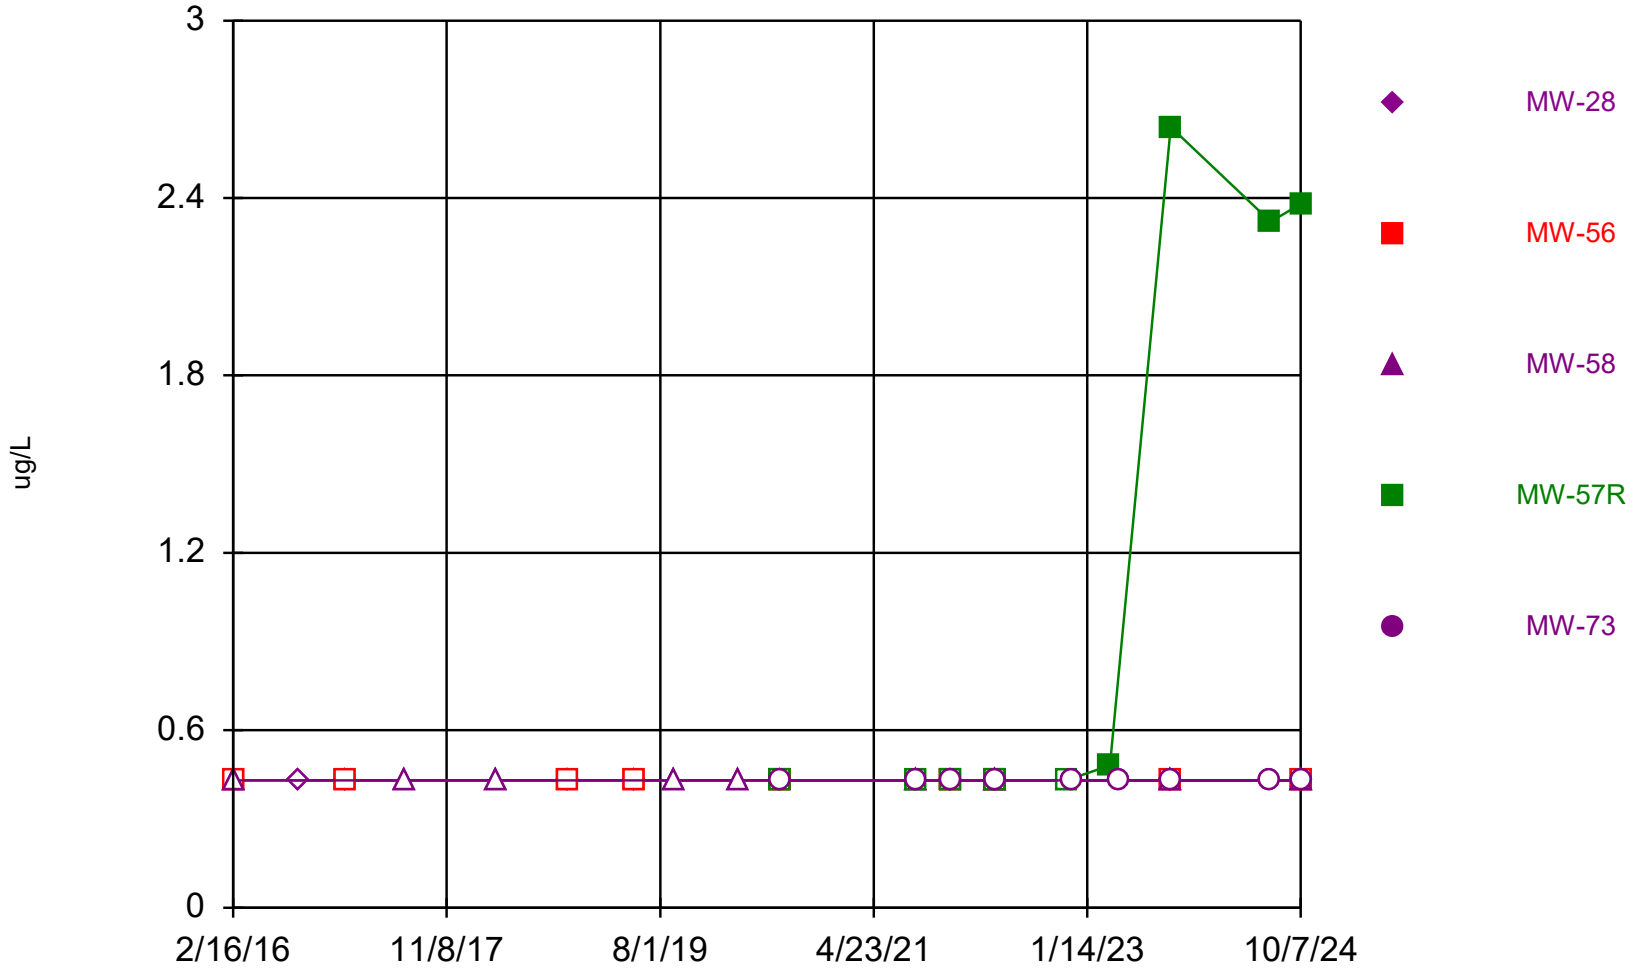


Constituent: trans-1,2-Dichloroethene Analysis Run 12/14/2024 3:02 PM View: Northwest Area Cross-Sec

Metro Park East LF Data: MPE Phase I Database

Hollow symbols indicate censored values.

Time Series



Constituent: Trichloroethene Analysis Run 12/14/2024 3:02 PM View: Northwest Area Cross-Sectional Ti
