Mr. Brian Rath  
Environmental Engineer Senior  
Iowa Department of Natural Resources  
6200 Park Avenue, Suite 200  
Des Moines, Iowa 50321

**Notification of Completed Work on Property Under Environmental Covenant  
Riverside Generating Station  
6001 State Street, Bettendorf, Iowa 52722**

Dear Mr. Rath:

This letter serves as a notification to the Iowa Department of Natural Resources (IDNR) that the planned intrusive work at MidAmerican Energy Company's (MidAmerican's) former Riverside Generating Station (RGS) in Bettendorf, Iowa was completed as described in the April 3, 2025, notification letter. The work was initiated on April 14, 2025, and completed on April 18, 2025.

An environmental covenant, recorded March 15, 2021, covers the closed North Coal Combustion Residue (CCR) Impoundment (North Impoundment) at RGS. MidAmerican completed additional characterization of the former North Impoundment. The activities included three cone penetrometer test (CPT) holes and four borings advanced with hollow stem augers. Piezometers were installed in each of the four borings. The CPT probe holes were sealed with bentonite. Recovered materials are stored in 55-gallon drums at the closed South CCR Impoundment and will be disposed at MidAmerican's Louisa Generating Station CCR Monofill or the Scott County Landfill.

Similar activities were completed at the closed South CCR Impoundment which is not subject to the environmental covenant.

Should you have any questions or require additional information, please do not hesitate to contact Mike Alowitz or Kevin Armstrong of GHD at the contact information below or Josh Love of MidAmerican at +1 712-277-6367 or via e-mail at [joshua.love@midamerican.com](mailto:joshua.love@midamerican.com).

Regards,

GHD
