Jeff - Good afternoon. In reviewing my email, I realized that I didn't put a schedule for my request. Please provide a document showing the current conditions and the waste limits together on a single plan sheet for our records by the end of August. Thanks.

Jeff - The DNR concurs with the proposed investigative work, and we look forward to receiving the report upon completion.

Meanwhile, although it is noted that the proposed work is outside of the waste, the submitted document does not show the waste limits. Further, our review of documents in our files does not show waste limits in reference to the as-built documents, unless I have overlooked something. Can you provide a document showing the current conditions and the waste limits together on a single plan sheet for our records?

Thanks,  
Brian

Hi Brian,

Please see the attached Cap Disturbance Operations Plan for the closed CCR surface impoundments at the former Sixth Street Generating Station in Cedar Rapids, IA. This plan has been prepared in anticipation of Geoprobe borings and installation of monitoring wells to support compliance with the federal Coal Combustion Residuals (CCR) Rule.

We respectfully request the Department's review and concurrence with this plan prior to our scheduling mobilization to the site on August 4-5, 2025.

Thanks in advance for your review. Please give me a call if you have any questions or concerns.

Regards,

Jeff
