Subject: Permit Amendment

To: [mike.smith@dnr.iowa.gov](mailto:mike.smith@dnr.iowa.gov) <[mike.smith@dnr.iowa.gov](mailto:mike.smith@dnr.iowa.gov)>, Stalcup, Bryce <[bryce.stalcup@wastecom.com](mailto:bryce.stalcup@wastecom.com)>, Seals, Brian <[brian.seals@wastecom.com](mailto:brian.seals@wastecom.com)>

Mike,

We are requesting an amendment to our current landfill permit 82-SDP-09-92 to include two updates to our operations:

1. **Use of Oat Hulls in Solidification Pit:** We would like to add oat hulls as an approved absorbent agent for use in our solidification pit. Based on their composition and performance, we believe oat hulls will be a suitable material for this purpose and will help improve the efficiency of our solidification process. They act very similar to saw dust which has already been approved.
2. **Delayed Landfilling of Railroad Ties:** We are also requesting flexibility in how we manage railroad ties. Specifically, we are seeking approval to temporarily store railroad ties onsite rather than landfilling them immediately. This will allow us to explore alternative disposal or recycling options where feasible.

Please let us know if you need anything else from us.

Thanks,
