**RE: Notice of Expiration  
Northern Plains Regional Landfill  
74-SDP-02-76P MLF**

Dear Mark Krieg,

The sanitary disposal project permit for the facility referenced above expires on 3/4/2026. A request for an operating permit renewal shall be in writing and filed at least 90 days before the expiration of the current permit pursuant to paragraph 113.4(8)“a”. Therefore, a complete application for a timely renewal is due by 12/4/2025.

All permit renewal applicants shall submit a completely updated set of permit renewal documents to address the permit requirements of IAC 567 Chapter 113 unless it can be shown that previously approved documents comply with the applicable rule requirements.

Unless otherwise authorized by the department, a permit applicant shall submit, at a minimum, a completed Form 50 (see attached).

All information provided must at least reflect site operations for the permit renewal period. In addition, any necessary changes to the current Permit Special Provisions, request for variances, and amendments shall be identified.

The department may request that additional information be submitted for review to make a permit issuance decision. The department may review and inspect the facility, its agents and operators, and compliance history and consider compliance with related requirements, such as financial assurance and comprehensive planning when making a decision to renew the permit.

If the department finds the permit application information to be incomplete, the department shall notify the applicant of that fact and of the specific deficiencies. If the applicant fails to correct the noted deficiencies within 30 days, the department may reject the application and return the application materials to the applicant. The applicant may reapply without prejudice.

Field Office Inspection

The Department's field office may conduct an inspection of the sanitary disposal project following receipt of the application for renewal. Any needed corrective measures identified during the inspection must be completed prior to renewal of the permit.

If you have any questions, you may contact me at (515) 249-1482 or at [becky.jolly@dnr.iowa.gov](mailto:becky.jolly@dnr.iowa.gov).

Sincerely,

Becky Jolly
