**Re: A-line Iron & Metals  
Solid Waste Database ID No. 07-CRT-08-22  
Cathode Ray Tube (CRT) Collections – Expired Registration**

Dear Kimberly Rochholz:

The Iowa Department of Natural Resources (DNR) has reviewed our records regarding the above-referenced CRT Collection Registration and confirmed that A-line Iron & Metals has failed to submit an Annual Activity Report ([DNR Form 542-8131](#)) as required by [rule 567-122.11\(455D\)](#). This report is due to the DNR by February 1<sup>st</sup> of each year for the previous calendar year to fulfill the annual registration renewal requirement for the following year.

Following a courtesy notice issued to all registered CRT Collection facilities in December 2025, the failure to submit this report has resulted in the expiration of your CRT Collection Registration effective March 1, 2026.

A-line Iron & Metals must immediately cease all CRT collection activities at this location and properly manage any remaining discarded CRTs onsite. The DNR has removed this registration from our list of active projects and has closed this project file. No further action is required at this time.

If A-line Iron & Metals wishes to resume CRT collection activities at this location, please submit a new CRT Collection Registration Form ([DNR Form 542-0060](#)) to the DNR.

Thank you for your efforts to comply with Iowa's environmental requirements. If you have any questions, please contact me at [\(515\) 201-8272](tel:515-201-8272) or [chad.stobbe@dnr.iowa.gov](mailto:chad.stobbe@dnr.iowa.gov).

Sincerely,

Chad A. Stobbe  
Interim CRT Program Administrator  
Land Quality Bureau
