Subject: 2026 Financial Assurance  
Cherokee County Sanitary Landfill  
Permit No. 18-SDP-01-75P

Dear Roman;

SCS Engineers (SCS) has completed the 2026 closure, post-closure, and corrective action cost estimates required by the Iowa Code and the Cherokee County Sanitary Landfill (Landfill) permit. The Iowa Department of Natural Resources (DNR) requires the owner/operator of a landfill to have a detailed written estimate, in current dollars, of the cost of hiring a third party to close the facility and conduct post-closure care in compliance with the facility's approved closure/post-closure plan. In addition, financial assurance is required for corrective action activities in compliance with the facility's corrective action plan.

The 2025 closure and post-closure cost estimates for Cells A-1 through A-6 were inflated by the 2026 inflation factor of 1.033 to estimate the 2026 total cost. The original landfill area post-closure cost estimate was divided by 2025's remaining years in post-closure (15) to determine the annual cost (\$16,366). The inflation factor was applied to this cost to determine the 2026 annual cost (\$16,906), then multiplied by the current years remaining in post-closure (14) to calculate the total cost for 2026 (\$236,683). A combination of the approaches above was used to update the cost estimate for corrective action. Lump sum tasks (Tasks 2 and 3) were updated using only the inflation factor. Annual tasks (Task 1) were updated by inflating the annual cost and multiplying by the remaining years in corrective action, which is assumed to be the same as the remaining years in post-closure (14). This results in an overall decrease of 2.70% in estimated corrective action costs. The itemized cost estimates are included in Attachment A and a summary can be found in Table 1 below.

Table 1. Closure, Post-Closure and Corrective Action Cost Estimates

Estimate	2025 Total Cost	Inflation Factor	2026 Total Cost
Cells A-1 through A-6 Closure Cost	\$2,864,313	1.033	\$2,958,836
