ENGINEER'S REPORT

APPANOOSE COUNTY SANITARY LANDFILL

CLOSURE PERMIT NO. 04-SDP-01-76C

This is to certify that the semi-annual inspection of the North Unit of the Appanoose County Sanitary Landfill was made by me or under my direct personal supervision on April 22, 2026 in conformance with referenced Closure Permit. Based upon that inspection, the landfill site was found to be in substantial compliance with the permit requirements and the approved closure plans.

The North Unit continues to be monitored for water quality in accordance with the approved HMSP, and Special Provision 4 of the 9th Revised Closure Permit issued on November 5, 2026.

The Indian Hills Community College (IHCC) Sustainable Agriculture Program continues to provide landfill site maintenance work.

Site Maintenance Comments and Recommendations

North Unit:

Cottonwood Tree and Red Cedar Tree saplings are beginning to grow along the drainage outlet.

IHCC continues to work on small areas with little or no vegetative cover. New seeding is germinating in many such areas.

Access road between the North and South Units has erosion ditches up to 8 inches deep along the road centerline for about 300 feet at the South side of the North Unit.

The low water crossing between the North and South Units is not passable due to recent heavy rainfall events.
