Good morning Mary,

As of July 1, 2026, the South Dallas County Landfill Agency transferred all assets, including the funds restricted for closure and postclosure activities, to the City of Adel. As a result, the landfill is now operated by the City of Adel as the Adel Municipal Landfill and Recycling Center. The transfer of the SDP Permit from the South Dallas County Landfill Agency to the City of Adel is ongoing.

The FY 26 audit for the South Dallas County Landfill Agency has been completed and filed on the State Auditor's website. Since the Agency no longer exists, what documentation will IDNR require from the City of Adel to include with the 2027 Financial Assurance documentation for the landfill? Would the balance of closure and postclosure funds on July 30, 2026 suffice, or will additional supporting documentation be needed?

Thank you for your help,

Doug
