Hello Mike,

As discussed during our call on September 25, we are requesting an alternate notification timeline for the Winneshiek County Sanitary Landfill as allowed under 567 IAC 101.110(1)b(2), 101.110(1)b(5), and 101.110(1)b(7).

Specifically, we request that the fall statistical notifications otherwise required under 567 IAC 101.110(5)c(1), 101.110(6)d(2), and 101.110(6)g be addressed through the Annual Water Quality Report (AWQR), submitted by March 31 in accordance with 567 IAC 101.110(10) and Permit Special Provision X.4.e., rather than through separate notifications.

Should IDNR approve the requested alternate notification timelines, we request a revision to Permit Special Provision X.4 to incorporate the approved notification requirements. Proposed language is provided below.

Special Provision X.4.g. For the fall semiannual sampling event, in accordance with subrule 101.110(1)b(2), 101.110(1)b(5), and 101.110(1)b(7), notification and placement of notice in the operating record for SSI over background, Appendix II constituents detected, and SSL over the groundwater protection standard shall be submitted to the DNR with the AWQR.
