Re: Iowa Waste Services, LLC (IWS)
Loess Hills Regional Sanitary Landfill
Hydrogeologic Investigation Workplan
Permit #65-SDP-01-72P

Dear Mr. Danielson:

The Iowa Department of Natural Resources (IDNR) has reviewed the *Hydrogeologic Investigation Workplan (Workplan)*, dated October 21, 2020, as submitted on your behalf by Evora Consulting (Evora).

The Workplan contains a proposal to investigate additional acreage for landfill development in the area labeled as the *East Expansion Area* as shown on Figure 4-1.

The Workplan appears to comply with 567 IAC Chapter 113.6(3) and should result in sufficient information to complete the site exploration and characterization report, and the hydrologic monitoring system plan and design. Approval of the Workplan does not indicate pre-approval of the hydrogeologic investigation report findings which will be reviewed based on the rules along with field and laboratory test results collected from the site.

If you have any questions, please contact me at (515) 725-8309.

Sincerely,

A handwritten signature in blue ink that reads "Nina M. Booker". The signature is written in a cursive, flowing style.
