

National Pollutant Discharge Elimination System (NPDES)

Public Notice Date: June 23, 2022

The Iowa Department of Natural Resources is proposing to approve an application for issuance of an NPDES AT permit for the facility described below:

Applicant Name And Address: Gregory Feedlots, Inc (North)
66592 US Hwy 275
Tabor, Iowa 51653

Facility Location: SE¼ of Section 28, T71N, R42W, Rawles Township, Mills County, Iowa

Description of Facility: The applicant currently operates an Alternative Technology (AT) 13.5-acre open feedlot operation that has a total maximum animal capacity of 2,000 head of beef cattle. The AT system consists of three solids settling basins followed by one vegetative treatment area. Because this is an AT System, it is allowed to discharge. AT systems must provide equivalent performance to that achieved by a properly designed and operated 25-year, 24-hour runoff control system. Generated manure must be land applied according to the DNR approved nutrient management plan (NMP).

Discharge Whenever Precipitation Events Cause An Overflow Would Be To: Plum Creek

Basis For Limitations In Permit: Federal Effluent Guidelines

Anyone wishing to comment on or object to the proposed issuance of this permit must do so in writing within thirty (30) days of the date shown at the top of this notice. All comments received will be considered in the final determination. If no objections are received within thirty (30) days, the Department will issue a final permit. Anyone desiring a public hearing must cite their specific reasons why a hearing should be held. Copies of the proposed permit and other information may be viewed online using the Wastewater Permit Information Exchange (WWPIE) system at <https://programs.iowadnr.gov/wwpie/> by clicking on search and then change permit status to “draft” or from 8:00 AM to 4:30 PM Monday through Friday at the above street address.
